VICTORIA WELCOMES PRINCE TODAY

PRINCE HONORS FAMILY PARTY

His Royal Highness Spends Afternoon and Evening Privately With Friends in Vancouver

SMILINGLY DOFFS HIS HAT TO DISAPPOINTED CROWD

Enjoys Complete Privacy in Isolation on Eighth Floor of Hotel With Separate Elevator Service

VANCOUVER, Oct. 4.—Squash-racquets at the home of his friend, Colonel John G. Fordham, luncheon and golf at the Jericho Country Club, dinner and dancing at Col. Fordham's home again, when he made many of the friends he made on his first visit here five years ago, His Royal Highness the Prince of Wales has spent his one day in Vancouver in comparative solitude.

Numbers of Vancouver residents went home late tonight disappointed with the brief glimpse of the royal visitor, which His Royal Highness plans for the day had brought about. The hotel Vancouver was thronged throughout the day with loyal subjects of His Majesty who wished to see the heir apparent, and their only reward was a fleeting view as the Prince walked to and from the elevator.

No Public Functions

By his own wish the Prince did not appear at any public function. Having spent the evening at the Fordham home, Prince Edward did not return to the hotel until 1:20 a.m. and consequently did not arise until the early morning. He had breakfast in his comfortable suite and descended to the grounds of the hotel shortly after 11. He wore a suit of light brown tweed, with long trousers, and a pinkish shirt, with a sports tie.

Golf clubs and a leather bag of clothes were carried into the waiting motor.

Acknowledges Greetings
Smiling slightly as he strode down an aisle between two rows of interested spectators, the Prince acknowledged the greetings and applause. Only General Trotter and several plain clothes men accompanied him. A woman larger stopped him at the turn door, but General Trotter having told her to see the Prince again outside no stop was made between them.

FALLS THOUSAND FEET TO DEATH

RACING AIRPLANE BREAKS IN PIECES IN MID-AIR
Huge Crowd at Aviation Contest Witnesses Tragedy to Captain of United States Service

DAYTON, O., Oct. 4.—Captain H. H. Skelton, commander of the twenty-seventh Squadron of the First United States Army pursuit group, Mount Clemens, Mich., fell to his death from an altitude estimated at about 1,000 feet at Dayton Field today, as he was preparing to swing into a flying start in the Pulitzer race, the last event of the international air races.

Forty thousand spectators saw Skelton's plane break into pieces and fall from the sky. As the seemingly matchless sprinter rained down, Lieutenant W. H. Brookings, of McCook Field, shot his Curtiss racer over the spot where his fellow flyer's body lay imbedded fifteen feet in the soft clay.

Lieutenant H. H. Skelton, flying a Sperry racer, won the race, traveling the two hundred kilometers course at a speed of 216.55 miles an hour.

First Fatality of Races
Captain Skelton's death was the first fatality of the races thus far, and the initial one of the Pulitzer race since it has been contested, and threw a pall of gloom over the concluding ceremonies of the air races. All social events, including the formal presentation of prizes to the winners, which were to have taken place tonight, were cancelled. According to army regulations, a board of inquiry will be appointed.

Two other races constituted the closing day's programme, the John L. Mitchell trophy event and a light airplane race for the Dayton Bicycle Club trophy.

Lieutenant Cyrus Bettis making a speed of 175.43 miles an hour in a Curtiss P.W.-8, won the first Mitchell Cup, and second and third places were taken by Lieutenants Donald F. Stace and Thomas K. Matthews.

All the officers are of the first pursuit group.

Lieutenant Stace's time was 17.7 miles an hour, and that of Lieutenant Matthews 17.32.

The light airplane event was won by H. C. Mummet, of Jamaica, N.Y., who flew a Mummet sport plane around a fifty-mile course at the rate of 33.24 miles an hour for a prize of \$1,600.

Heir to British Throne With Companions of Canada Tour

The Prince of Wales and His Suite. From Left to Right—Brigadier-General G. F. Trotter, the Prince, Captain Allan Lascelles and Mr. David Boyle, Members of His Party.

HOTEL IS READY FOR ROYAL GUEST

MEAN WORK NIGHT AND DAY ON SPECIAL SUITE

Entire Third Floor Is Given Over to Party—No Effort Spared for Comfort and Convenience

No effort has been spared by the staff of the Empress Hotel to provide for the comfort and convenience of the Prince of Wales during his brief visit in Victoria. The third floor of the hotel has been entirely set aside to accommodate the royal visitor and his party, and the suite reserved for the Prince has been painted and decorated in a most pleasing color scheme, the work being carried on day and night to complete the undertaking before the arrival of His Royal Highness.

The Prince will occupy a suite situated in the southwest corner of the hotel, where each window frames a picture of wondrous beauty, overlooking the harbor and beyond the long line of the book hills, where the setting sun throws rays of golden flame, reflecting the glory of autumn.

The suite comprises sitting-room, dining-room, service-room, bedroom, dressing-room and bathroom.

The sitting-room, a bright room with cream walls, decorated with beautiful reproductions after Gainsborough and Reynolds, has curtains of rich plum colored silk, with sun-shine cloth inner curtains, while the easy chairs and Chesterfield are covered with a striking chintz of black background with pattern of orange and yellow foliage and birds of gaudy plumage. The furniture is wicker, and the tables are covered with the same chintz under glass. A handsome walnut Victoria cabinet with numbers of "jazz" records holds a prominent place in the room, which is carpeted with heavy Havana pile, and the dahlia are beautiful in the extreme, both for the vividness of their color.

HONDURAN REBELS ARE PUT TO FLIGHT

Revolutionary Leader Takes to Mountain Followed by Newly Armed Federalists

TEGUCIGALPA, Honduras, Oct. 4.—All of western Honduras is under control of the Government, the revolutionary leader, General Ferrera, having fled to the mountains. Government forces, however, are on the trail of Ferrera, and new artillery, machine guns and rifles have been received by the Government to insure its success in operations against the rebels.

OREGON TRAIL BLAZER COMPLETES HIS FLIGHT

Era Meeker, Western Pioneer of 1832, Landed on Arrival at Dayton Aviation Field

DAYTON, O., Oct. 4.—Era Meeker, of Seattle, nonagenarian traveller, flew out of the West today to see the last day's programme of the international air race at Dayton Wright Field, and became the lion of the day. Meeker, Oregon trail pioneer, made his first trip across the continent in 1852 in a covered wagon. In 1904 he drove over the route again. This time he decided he wanted to do it in a little better time, and he asked Assistant Secretary of War Davis for permission to fly from Seattle to Dayton with Lieutenant Oakley Kelly.

Here is One of the Most Recent Portraits of the Prince. It Reveals the Forceful Character and Determination Which Are the Marks of Kingship.

MAJOR RETALLIC DIES IN NORTHERN ALBERTA

Well-Known British Columbia Pioneer and War Veteran, Passes Away on Trail

VANCOUVER, Oct. 4.—Death of Major John Ley Retallic, pioneer of British Columbia, occurred on the trail in Northern Alberta at 4 o'clock this morning, according to word received here this afternoon. The body will be brought to this city, and arrangements are being made for a military funeral. Details of his passing are lacking, but it is thought he succumbed to pneumonia.

Major Retallic was born in Quebec on December 2, 1843, and went to England for his education. He returned to Canada in 1863. For five years he served with the Royal Northwest Mounted Police, and received his discharge in 1868 with the rank of sergeant.

Came to B.C. in 1860
He came to British Columbia in January, 1860, and settled in the Kootenay section in the same year. While there he became engaged in railway construction, banking and mining, conducting his own private bank.

In February, 1915, Major Retallic enlisted in the 48th Battalion as quartermaster, giving up a profitable business to serve his country. He was at Ypres, and at the Somme in 1916, after which he was invalided for six months. Still later he joined the Canadian Railway troops headquarters to assist in organizing the corps in December, 1916, and from March, 1917, to December, 1918, he acted in France as D.A. G.M.C. Canadian Railway troops. He was Public Utilities Commissioner for British Columbia until that office was abolished.

CHINESE PEDDLER OF DRUGS CAPTURED

Detective Arrests Peter Gong, Alleged Operator in Wholesale Way in Vancouver

VANCOUVER, Oct. 4.—Continuing their relentless campaign against traffic in narcotics, Detective Rice and Mitchell arrested Peter Gong, Chinese, alleged peddler of narcotics on a large scale and seized fifteen large packets of alleged morphine after staging a sensational descent upon a Union Street house.

VICTORIA INVENTOR AWARDED DAMAGES

Mr. Sydney Ashdown Succeeds in Suit at Vancouver Against Nickerson Construction Company

VANCOUVER, Oct. 4.—After deciding that Sydney Ashdown, a Victoria fruit rancher, invented an improved hauling tackle device, Mr. Justice D. A. Macdonald awarded him \$400 damages against the Nickerson Construction Co.

The defendant company is also restrained by injunction from further infringing on the invention, which Ashdown patented fourteen years ago.

OMAHA STOCKYARDS SCENE OF BIG FIRE

Million Dollars Worth of Damage Done, and Flames Still Spreading at Early Hour This Morning

OMAHA, Neb., Oct. 5.—The second million-dollar fire at the Union Stockyards of South Omaha within a period of two years, destroyed four buildings, threatened two others, and caused the entire fire-fighting forces of Omaha and South Omaha to put forth their best efforts to save other plants of the stockyards this morning.

The cause of the fire, which started in the plant's lumber yard, is unknown. Five box cars laden with lumber, on a side track near the yard, were destroyed, sparks from the original fire quickly engulfing them in the spreading flames.

Besides the lumber yard, the box factory, hide factory, Dutch cleaner plant and several smaller buildings were destroyed. Company officials at the scene of the conflagration declined an official statement, but estimated the loss would approach a million dollars.

At a late hour this morning further damage seemed probable in view of the wind shifting from the northwest to a southerly direction. The south wind, it was indicated, is fanning the flames in the direction from which they had spread.

PROTOCOL DOES NOT BIND AUSTRALIA

PREMIER BRUCE STATES POSITION TO FEDERAL HOUSE
Neither Parliament Nor People Controlled by Treaty Without Their Consent

MELBOURNE, Oct. 4.—Premier B. M. Bruce, of Australia, speaking in the House of Representatives on the compromise arbitration and security protocol of the League of Nations, said nothing done at Geneva binds the people or the Parliament of Australia without their consent.

It was a matter of great regret, he added, that the question of domestic jurisdiction should have arisen among the Commonwealth of Australia. The federal agents to involve the new treaty in this matter to be questioned.

OPEN SWITCH CRASH CAUSES FIVE DEATHS

Engineer and Fireman, Together With Three Passengers, Killed on Missouri Pacific Road

SWIFTON, Ark., Oct. 4.—Five men were killed, one seriously injured and a score or more of passengers were more or less seriously injured tonight when the Missouri Pacific passenger train No. 8, northbound from Texarkana to St. Louis, crashed into an open switch here.

The dead included the engineer and fireman, both of Little Rock; an unidentified white passenger and two negroes.

The engine and eight cars were derailed, the mail and express cars being virtually demolished. Most of the passenger coaches remained on the tracks. These were taken in tow by train No. 13 and carried to their destination.

AERIAL EDUCATION UNIVERSITY'S LATEST

New York Institution of Learning to Inaugurate Air College With Broadcasting of Lectures

NEW YORK, Oct. 4.—Aerial education is to be New York University's next contribution to the cause of higher learning. The institution's "air college" will open Monday. With the aid of the radio, the university will extend its campus to the shores of the Mississippi for twenty minutes for five nights of each week. A diversified course will be broadcast by faculty members and all who will, may go to college.

DESULTORY FIRING MARKS BATTLE LINE

Rain Again Interferes With Warfare Hosts in Front of Shanghai—Predict Early Resumption

SHANGHAI, Oct. 5 (3:20 a.m.).—Only desultory firing took place on the battle lines near Luho during last night. The Longhua headquarters of the Chinese army this morning again predicted an early offensive by the Kiangsu troops in the Sung Kiang district, 35 miles southwest of here, where there was an engagement on Friday.

A drenching rain along the battle-fronts south and west of Shanghai, where armies of rival provincial military governors are fighting for possession of this city, halted firing yesterday.

CLEVER RUSE FOILS RUNNERS

Speedy Delivery of the Wet Goods From Ship in Rum Row to Shore Results in Big Capture

VESSEL AND 11,000 CASES IS CAUGHT AT GOTHAM

Officers Stall for \$100,000 Purchase, and Launch Proves Freighters Distance From Shore

NEW YORK, Oct. 4.—With the capture of a rakish British steamer, with 11,000 cases of whisky aboard, Prohibition officials today claimed to have caused the collapse of an "Anglo-American banker-bootlegger alliance, which in the last six months has flooded this country with illicit liquor."

As the result of three months' investigation, coast guardsmen seized the 374-ton steamer Frederick B., and her crew of twenty men, fifteen miles off Montmouth Beach, N.J., in which the Federal officials call for the first real test of the liquor treaty with Great Britain. Bankers in Montreal and New York, and distillers and shipping men in London and Halifax, are said to be members of the international bootlegging ring, which, the dry raiders said, has \$10,000,000 behind its operation of a four-ship fleet.

In addition to the prize capture of the Britisher, four smaller craft, fleet motor boats that bring the liquor from the rum fleet to Long Island and New Jersey shores were taken. The capture of these launches included a half hundred cases of whisky. Fifteen prisoners were made by the marine police.

One lone police boat with lights out, got three of the little craft off the dockways. While headed for the fourth was taken at Staten Island, while her crew was unloading whisky on a dock.

A novel ruse was employed by the Federal agents to involve the crew of the Frederick B. in a test of the new treaty, which extends the ancient three-mile limit to the distance of an hour's sailing. After handing the vessel's master \$100,000 in cash and cheques to make a fat liquor purchase agreement binding, agents asked for twenty-five barrels of whisky to take ashore at once. They put the "stuff" aboard the fastest speed boat they could get, and need ashore in forty-two minutes. The agents, who involved the bootlegging ring in a violation of the Anglo-American treaty.

Race Against Time
Their race against time completed, the agents pressed the coast guard cutter Manhattan into the work. That formidable armed vessel steamed alongside the whisky-laden Frederick B., placed under arrest the crew and two women found aboard, and preceded the ship to an under guard anchorage off the Statue of Liberty.

John Holley Clark, assistant United States District Attorney, later said the capture was the most important since the United States entered into the new liquor treaty with Great Britain. Although the captors were inclined to be reticent about the affair, a few facts were gleaned concerning the Frederick B. and her operations. It was learned, for instance, that one of the women aboard—she is about twenty-six and rather strikingly dressed—was the daughter of one of the King's higher-ups in the rum-running conspiracy. Her companion, said to be a woman of about forty, was described to be the younger one's chaplain.

Two of the crew, who said they were Harry Klein and L. Fletcher, both of Newark, N.J., were arraigned before a United States Commissioner and held in \$5,000 bail. The eighteen others of the crew were held for appearance before the Federal commissioner next Monday.

EASTERN FINANCIERS MAKING VISIT HERE

Montreal Bankers and Business Men Arrive—Dine at Government House Last Night

A party of prominent Montreal financiers, including several officials of the Bank of Montreal, reached Victoria yesterday in course of a trip throughout the Dominion investigating economic conditions. Last night they were guests of His Honor, the Lieutenant-Governor, at Government House, together with Mr. W. W. Symons, local manager of the Bank of Montreal, and other leading Victoria banking men. The party spent the week-end in the city.

Among the visitors are Sir Gilbert Fox, Bart., director of the Colonial Bank, and one of the highest figures in the sugar industry in Great Britain; Dr. Lorne McGibbon, Montreal, president of the Ames Holden, McCready, Limited, the Atlantic Sugar Refiners and the Larose Consolidated Mines Company, and director of the Eastern Trust Company; Mr. R. Parker, vice-president of the American Sugar Refining Company; Mr. Harold Kennedy, director of the Bank of Montreal; Dr. D. A. Kingston, son of the late Sir William Kingston, Montreal, and Mr. D. R. Clark, assistant general manager of the Bank of Montreal.

BOAT EXPECTED IN AFTERNOON

His Royal Highness Will Sail From Vancouver on Princess Louise Some Time This Morning

ARRIVAL HOUR NOT DEFINITELY KNOWN

C.P.R. Officials Believe Royal Visitor Will Step Ashore at 3 o'Clock—May Try to Give Crowds Slip

HIS Royal Highness the Prince of Wales will reach Victoria this afternoon. But the hour of his arrival is a matter of conjecture. It was not to be ascertained definitely up to a late hour last night.

He will leave Vancouver on the Princess Louise some time this morning, according to dispatches from the Mainland city yesterday. He will step ashore at the Belleville Street depot in the neighborhood of 3 o'clock in the afternoon, C.P.R. officials believe.

The Prince's whim will govern the hour of his arrival. It was rumored last night that the royal wish would dictate a cruise amongst the beautiful Gulf Islands off the Strait of Juan de Fuca, which would delay his arrival here considerably.

Another rumor was to the effect that the Princess Louise would dock at the Outer Wharves to enable His Royal Highness to escape the demonstrative welcome, which, it is generally accepted, awaits him here.

The democratic nature of the Prince's trip was again emphasized yesterday when Mayor Hayward received his telegram from his secretary declining the offer of a limousine to convey him to the Empress Hotel.

Baron Renfrew was traveling as a private citizen, the message indicated, and would prefer to proceed to the hotel in an ordinary taxicab, likewise other private citizens.

There will be nothing formal about the Prince's arrival here, Mayor Hayward and some of the aldermen.

MANSLAUGHTER IS MOTORIST'S CHARGE

SIX-YEAR-OLD BOY KILLED BY LADY IN VANCOUVER

Child Rushes in Front of Motor and Is Run Over Before Driver Can Check Car

VANCOUVER, Oct. 4.—A charge of manslaughter arising out of the death of Gordon Town, aged six, against Mrs. J. F. Burns, 2933 Fifth Avenue West, by city police Saturday afternoon, Mrs. Burns was freed on bail of \$1,000.

The child, son of A. Town, proprietor of a grocery on Broadway West, was playing at the corner of the intersection of the accident, placing nails on the car track, and according to the autist's story, ran out from the curb towards the car track as Mrs. Burns approached the accident, wards the sidewalk. He was struck by the front of the car, carried underneath and was found lying beside the left rear wheel.

Car Skidded
The car skidded, according to police figures, thirty-seven feet eight inches on the pavement. Police took measurements of the scene of the accident and superintended the removal of the boy to the office of Dr. Graham, Fourth Avenue West, where the child died within a few minutes.

Mrs. Burns, who is the wife of J. F. Burns, proprietor of the Imperial Trunk and Leather Goods Co., Hastings Street, telephoned the police office in a hysterical condition immediately after the accident. She said, according to the police, that she was proceeding towards the city at a reasonable rate of speed, when the child ran out in front of the car, turned and ran back, and in doing so, rushed directly in the path of the car. She applied the brakes but the child was carried underneath the car.

Mr. and Mrs. Burns came to the police station with the officers where the manslaughter charge was laid and bail immediately applied for. The inquest on the body of the small victim will be held at the city morgue Monday afternoon and the manslaughter charge will be called in the police court Monday morning.

SCHOONER LETTY IS REPORTED TOTAL LOSS

Captain Reaches Nome and Tells of Wrecking—Cargo of Furs Saved

NOME, Alaska, Oct. 4.—The trading schooner Letty, wrecked while attempting to enter a lagoon at Wainwright, on the Arctic coast, near Point Barrow, was a total loss, Captain Crawford reported on his arrival here today. A cargo of valuable furs, obtained at Banksland, was saved and brought to Nome.

The schooner owned by J. H. Hays Company, was returning to the United States.

LOAN TO GERMANY MAKING PROGRESS

J. P. MORGAN & CO. EXPRESSES SATISFACTION WITH TERMS

United States Will Absorb Fifty Per Cent of Amount, and Great Britain Takes Third

LONDON, Oct. 4.—Continued progress of the negotiations going on between Dr. Hjalmar Schacht, president of the Reichsbank; Dr. Hans Luther, German Finance Minister, and American and British continental bankers, regarding the 140,000,000 German loan, is indicated by a statement issued by J. P. Morgan & Company.

The head of the Morgan Company declared his firm had already satisfied itself concerning the underlying security, and had been requested by the British, French and Belgian Governments to facilitate placing the loan by issuing a portion of it for the American market. The statement follows: "Our position at present is that we have been requested by the British, French and Belgian Governments to use our good offices to facilitate the placing of the German loan under the Dawes plan by issuing a portion for the American market; that we have satisfied ourselves as to the underlying security of the bonds; and have already begun negotiations with the authorized representatives of the German Government.

Distribution of Loan

"The necessity of simultaneous discussions with various continental markets whose co-operation is essential to the success of the loan has necessarily delayed the completion of the matter. Meantime, while it is known that approximately fifty per cent of the loan of 140,000,000 will be placed in America, thirty-five per cent in England, and the remainder on the Continent, considerable speculation has been rife as to the interest yield and other details. But it is unlikely these will be finally arranged until preliminary matters, such as the exact apportionment, arrangement of securities, and the terms for the issue, have been settled.

"The favorable results of the preliminary conference already have had an effect in London, where a pronounced hostility was displayed against the loan a fortnight ago. This now appears largely to have been mitigated by assurances that the American experts see little difficulty in the way of the successful flotation of the same.

"With the arrival of Dr. Luther Wednesday night, the conferences began to take on a more official character. Financial circles expect it will be a matter of only a short time before the loan document will be ready for Dr. Luther's signature."

URGE LEADERS TO AID CHINESE REBEL CHIEF

Meeting in Tokyo Demands Japan Take Part of Manchurian Government Against Peking Government

TOKIO, Oct. 4.—Five thousand persons, including members of the House of Peers and representatives attending a meeting in Shiba Park today, adopted resolutions urging the Japanese Government to interfere in the civil war in China as ally of General Chang Tso-Lin, who is carrying on hostilities against the Peking army for the control of the central government of China.

"The Japanese Government must carry out a policy in China independently of other powers," the resolution read. "This is made necessary owing to Japan's special position in China."

"Major-General Sato, retired, addressing the meeting, said: 'Japanese troops should be sent to China before the Peking troops enter Manchuria,' where General Chang Tso-Lin rules.

Huge Moonshine Still Seized
BUFFALO, N. Y., Oct. 4.—Deputy sheriffs today were engaged in dismantling one of the largest moonshine stills discovered in Western New York. Five men were arrested when the distillery, in an outlying house in Ebenezer, was raided. Four 130-gallon stills and several smaller ones for distilling 200 barrels of mash, 50 barrels of illicit whiskey, 15,000 pounds of molasses and 700 pounds of yeast were seized.

WHERE THERE IS WAR

Britain has mandates and protectorates in most of the territory shown on the map. Mecca has been taken by rebellious tribesmen known as the Wahabites, who have beaten the forces of King Hussein of the Hedjaz. The British will probably interfere in this conflict. A more direct menace is that of the Turks, who are threatening Mosul, an oil field centre. They have twice been beaten back by British armies. The Turks are apparently ignoring the reference of the dispute to the League of Nations.

U. S. PRESIDENT SPEAKS ON LEAGUE

RECALLS WISH FOR AMERICAN MEMBERSHIP IN ASSEMBLY

Says Dawes Plan Lays Firmer Foundation for Industrial Prosperity and Peace

WASHINGTON, Oct. 4.—In the presence of veterans of the First Division of the American Expeditionary Forces, President Coolidge dedicated a monument to their dead here today as "a lesson of the supreme blessing of peace with honor, a symbol of stern warning."

"The peace now established must be nourished," the President declared. "In this country's international relations, while recalling his wish for American membership in the world court and further disarmament, the President warned in reference to the country's international relations that 'we do not propose to entrust to any other power or combination of powers, any authority to make up our mind for us.'"

Commends Dawes Plan

In his discussion of international affairs, Mr. Coolidge pointed to the accomplishments of the Dawes plan in promoting the revival of Europe, which, he said, "lays a firmer foundation for industrial prosperity and more secure peace."

"We want to see the Allies protected," he continued. "We want to see Germany restored to a condition of productivity and progress under which she will be able to take up the burden of civilization."

"I am in favor of treaties and covenants conforming to the American policy of independence to prevent aggressive war and promote permanent peace. But they have little value unless the sentiment of peace is cherished in the hearts of the people. Peace is the result of mutual understanding in honorable action."

AGED CIVIL ENGINEER DIES AT OTTAWA

Last Member of the Original C.P.R. Survey Party Succumbs at Age of Seventy-Seven

OTTAWA, Oct. 4.—Napoleon Rheame, formerly consulting engineer for the Canadian Government with the Department of Railways and Canals, died here today, aged 77. He was born in Quebec City and entered the government service with the accommodation of light hon. Alexander Mackenzie. He was superannuated four years ago.

Rev. Father Rheame, parish priest of St. Edwards, Winnipeg, was at the bedside of his father when the aged civil engineer died.

Mr. Rheame was the only survivor of the original party of surveyors who set out in 1872 to map out the first route which it was proposed the C. P. R. should follow through the Rockies, but which is today followed by the C. N. R. Under his direction many of the important waterway controls were constructed on the St. Lawrence.

Cleaning Up Vancouver

VANCOUVER, Oct. 4.—Chinese, alleged to have been engaged in gambling games last night, enriched the city coffers to the extent of \$415 when their names were called in court this morning. The amount was made up of fines and forfeits from the Orientalists, who were accused, in the majority of cases, of playing the Chinese game called um gow.

PARTIES PREPARE FOR EVENTUALITIES

POSSIBLE CRISIS IN BRITAIN RESULTS IN ACTIVITIES

Labor Organ Declares Feeling Is Overwhelmingly Against the Proposed Soviet Treaty

LONDON, Oct. 4.—Rumors of every kind are rife concerning a possible political crisis, but nothing definite is developing. Premier MacDonald has gone to Chequers Court for a few days' rest. He will return Monday for a cabinet council which, it is expected, will decide on the government's policy.

Meantime all three parties are busy preparing the party machinery for eventualities and are generally engaged in what is known as maneuvering for position.

Urges Against Resigning

The Statesman, which, although not a government organ, represents Labor's attitude, strongly urges Premier MacDonald against resignation or dissolution, either on the question of the Russian treaty or because of the Workers' Weekly case.

The Workers' Weekly case, it says, is too insignificant an issue, and the Russian treaty is not a good issue on which to fight an election.

"It is perfectly clear," the Statesman adds, "that there is an overwhelming majority, both in parliament and the country, against subsidizing the Soviet government out of the pockets of the British taxpayer. Therefore there is no sense in pressing that policy, and Mr. MacDonald would be well advised in declining to submit the Russian treaty to parliament for ratification and resuming negotiations with the Russian delegates in order to get a more acceptable agreement."

DARK MAN WITH CLUB WARNING UNHEEDED

Spiritualist Tells Husband of Menace and Beaten Body Taken From River Weeks After

NEW BEDFORD, Mass., Oct. 4.—A theory that Frederick A. Clements, who turned from a ministerial training in Newfoundland to run a garage in Burlington, was killed by a man after a quarrel over money matters, occupied the attention today of the officials investigating his death.

A warning that his safety was menaced by a "dark man with a club" was given Clements by his wife, known as Madame Sanderson, a spiritualist medium, but the advice did not save him. On Thursday boys fishing in the Shawheen River found his body in seven feet of water. It was wrapped in sackcloth, bound with wire and weighted down with two auto cylinder heads. The body had been in the water two weeks and that the man had been beaten over the head with a hammer was the medical evidence.

DENY ALARMIST STORY AS TO GERMAN CROPS

Minister States This Year's Wheat Harvest Luck, But One-Fifth of That of Last Season

BERLIN, Oct. 4.—The Food and Agriculture Ministry has denied reports that the German harvest is alarming. A decrease in the harvest, including grain, vegetables and food, is estimated at twenty per cent over last year.

Wheat and rye are estimated at eleven per cent less than in 1923, and the general grain harvest only five and four-tenths per cent under last year's exceptionally good crop.

The ministry asserts that it has no thought of introducing the bread card rationing system. The possible shortage, it was explained, is already covered by arrangements for purchases of grain abroad.

Bootleggers Flourish in Ukraine

KHARKOV, Russia, Oct. 4.—There is one illicit still for every five hundred persons in the Ukraine, according to official statistics issued by the Ukrainian Commissioner of Finance. Up to date no less than 8,400 bootlegging establishments have been discovered, and it is estimated that nearly 150,000,000 pounds of rye bread have been consumed in the manufacture of home-brewed alcoholic beverages.

For Boys

New Arrivals in English Breeches Suits for Boys

We have just received these garments, and they are up to our expectations in quality, finish and value.

**Victoria Port Is Logical
Export Clearing House**

Trade With China Is Natural Path to Commercial Expansion for This City, Says Writer, Who Points to Immense Potential Demand for Goods Created by Development of Former Celestial Empire Along Lines of Western Civilization—Possibilities Discussed

By E. M. YOUNG

AN ocean port is the natural clearing house for the international trade. For Victoria, the chief foreign markets are China, Japan, Australia, New Zealand and some other smaller British dependencies in the Southern Pacific. Of all these, China is one of the greatest markets now and potentially.

China, of course, is no longer the "Celestial Empire" of exclusiveness, or the forbidden country which treated or considered all intruders into its ancient fastnesses as "foreign devils." She is now a young and immense republic, gradually adapting and assimilating Occidental or Western ideas in business and private life. She is introducing and is eagerly welcoming the foreign trader and his goods.

According to Mr. W. Whiteley, now on a visit to Victoria, the recent and previous insurrections and revolutions have not, and did not, materially interfere with the foreign trading of China. In fact, Mr. Whiteley, the fighting is more or less localized, and so vast is the country that great areas in the interior are practically unaffected by the political turmoil.

Victoria's Opportunity
"I think," said Mr. Whiteley, who has had business connections with China for many years, "that Victoria is in a splendid position for securing increased business with the Orient, particularly China. During the past few years many business representatives have been going out of Victoria and Vancouver on the Empress boats, but comparatively few belong to British Columbia. They are mostly being sent out by enterprising Toronto or Montreal firms, or American corporations to spy up the land and drum up the trade of China and Japan."

"When last in China on a business tour I found Canada very badly represented. It is true that an office is maintained in Shanghai. But there should also be Government offices, with live representatives in all the chief Chinese ports or cities. The United States has established in several ports branches of the American Chamber of Commerce, which act in an advisory capacity to any business men who wish advice on subjects pertaining to trade with China."

"The wealth and resources of China are simply incalculable. More than formerly she is disposed to spend a large part of that wealth on manufacturing plants, on machinery of all kinds, on modern conveniences, on building railroads, improving her canals, building street car systems and interurban lines, in shipbuilding and other industries."

Trade Representation
"Canada should be well represented in China by either Government agents or chambers of commerce, like the United States. There are at least five cities that should be thus represented, namely, Shanghai, Canton, Tientsin, Hankow, and Peking."

"The ports from which all or a great part of the shipping comes from, and they are the ports where the foreign trader goes to buy or sell."

"China wants your lumber, fish, iron and steel, pulp, paper, flour, agricultural implements, coal, clothing, steel rails, pipes for water and other purposes, and many other things that she now gets chiefly from the United States, Great Britain and Japan."

"In return China can supply British Columbia and Canada with raw materials, silk, tea, cotton, tin (in slabs), fruits of various kinds, leathers, hides, corn, rice, beans, peas and many other commodities."

Great Potential Market
"But it is not sufficient," said Mr. Whiteley, "that government or commercial agents should be appointed. The manufacturers, exporters and merchants of British Columbia should follow British, American and Japanese examples in sending out drummers and studying the Chinese particular needs and customs."

"The China is the greatest undeveloped market in the world is generally recognized by the principal commercial countries and ports of the world. And there are not many other parts of the globe more favorably situated for dealing with this great market than the Pacific Coast ports, including Victoria."

A Shipowner's Views
A British shipper, passing through Victoria recently said, in effect, that there was a field in China for "every manufacturer, exporter or jobber in Victoria and British Columbia. But the sooner the field is covered the easier it will be to open up and consolidate profitable trading connections."

The veteran Captain Robert Dollar, is the pioneer of the Pacific trade with China. He owns up to having made millions out of it. But he has asserted on several occasions that there are still boundless opportunities for British Columbia trade with the "Celestial Republic."

Captain Dollar has declared, moreover, that he has seldom made a bad debt in all his many years' trading with the Chinese. They may sometimes wait long credit, but they will eventually meet their obligations with scrupulous honor.

Although not so immense a market as China, Japan offers a big field for the products of British Columbia. In foreign trade, Japan has had for several years shipping connections with Victoria. But the competition of other Pacific ports is becoming keener all the time, and a port must seek to attract trade and ships lest they go elsewhere.

The Japanese Boycott
During recent years, Seattle has captured the "lion's share" of Japanese trade and shipping. The harbor authorities of that city began by constructing a port unit for handling

the special kind of goods that come from Japan. Every facility was afforded to insure the speedy dispatch of Japanese ships berthed there, saving time and expense (by low port charges) to their owners. A big and profitable trade followed with Japan, where American representatives co-operated in drumming up business.

At the present time there is a boycotting campaign in Japan against American goods in retaliation for the action of Congress in passing the recent immigration law. But both are not likely to have anything but a temporary effect, as leading Japanese merchants and shippers realize that they cannot do without certain American goods.

Mr. O. Ukita, a well-informed Japanese merchant who was recently in Victoria, stated that Canadians must adopt American methods of seeking Japanese trade "if they want it."

Chances in Japan
He thought that business representatives of Victoria should be sent to Japan to study the conditions prevailing in that country. He considered, for instance, that the lumbermen, architects and builders of British Columbia were lax in not sending representatives over to Japan soon after the great earthquake and fire there. Americans had done so and obtained nearly all the business in lumber and other building material.

There are four or five cities in Japan to which representatives should be sent. There are Tokyo, Yokohama, Nagoya, Osaka and Kobe. Osaka is the principal manufacturing centre of Japan, but the ships make their call chiefly at Kobe, which is an important port for the commerce of the Pacific.

Japan Needs Timber
Asked as to what kind of goods Japan chiefly needs, Mr. Ukita said he believed timber, pulp and paper, iron and steel machinery, motor cars, salmon and salt herrings were now in demand. When woolen cloth and woolen yarn were also being more largely imported than in former years.

As to the articles which Japan can supply to this province, they include silk, fancy goods, toys, sulphur for the powder factories, cane sugar, rice, and fruit such as mandarin oranges. Of these latter, of course, Victoria has been importing a considerable quantity for years.

**FIRE PREVENTION
MEANS EDUCATION**

CAMPAIGN TO SPREAD KNOWLEDGE STARTS TOMORROW

Lecturers Will Visit Various Public Schools of Victoria During Next Week

Combined efforts on the part of Victoria fire insurance companies, the Victoria Fire Department and the service clubs, will be used next week to spread knowledge of fire prevention. The campaign is being conducted by the Victoria Fire Prevention League, which has arranged for a series of lectures to be given during the week.

The Victoria and District Fire Insurance Agents' Association has also announced an essay contest. Prizes will be given by Messrs. D. W. Campbell and H. G. Dalby for the four best essays, two by seniors and two by juniors, in the public schools. In connection with this contest, Mr. Donald Fraser has promised to publish the winning essays in the School Magazine. The Association has also arranged to donate two prizes for the best decorated store windows in the city showing the benefits of fire prevention.

FREEMASON PARTY VISITS VICTORIA
ON PLEASURE TRIP AFTER SESSIONS OF SUPREME COUNCIL

City Delights Visiting Party of Fifty Members of Ancient and Accepted Scottish Rite

Delighted with the West and enthusiastically appreciative of the hospitality accorded them, fifty Freemasons of the thirty-third degree, Scottish Rite, from all over the world, were in the city yesterday, having arrived on Friday from Vancouver where the 50th annual session of the Supreme Council of Thirty-Third Degree Masons for the Dominion of Canada was held earlier in the week.

The visitors were welcomed on their arrival here by members of the local Scottish Rite body, who conducted them on a motor tour of the city yesterday afternoon. Today they will be motored out to Butchart Gardens.

CORNS
Lift Off—No Pain!

Beautiful home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can dye or tint lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton, or mixed goods.

Don't hurt one bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers.

Your druggist sells a tiny bottle of "Freezone" for a few cents sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Freezone is a tiny bottle of "Freezone" for a few cents sufficient to remove every hard corn, soft corn, or corn between the toes, and the foot calluses, without soreness or irritation.

Centenarian Passes Away
PAWTUCKET, R. I., Oct. 4.—Mrs. M. H. Campbell, thought to have been the oldest woman in New England, died at Pawtucket at the age of 109. Mrs. Campbell's long life was a record of hard work, regular hours and abstinence from eating sweets.

HAVE DARK HAIR AND LOOK YOUNG
Nobody Can Tell When You Darken Grey, Faded Hair With Sage Tea
Grandmother kept her hair beautifully darkened, glossy and attractive with a brew of Sage Tea and Sulphur Compound now because it darkens so naturally and evenly that nobody can tell it has been applied—it's so easy to use, too. You simply dampen a comb or soft brush and draw it through your hair, taking one strand at a time. By morning the grey has disappeared; after another application or two, it is restored to its natural color and looks glossy, soft and beautiful.

This afternoon the party will leave for Portland, Oregon, where they will be guests of the Ancient and Accepted Scottish Rite of that city. Prominent in the party are: Sir John Gibson, of Hamilton, former Lieutenant-Governor of Ontario, and a former sovereign grand commander; Mr. Alexander McDougall, of Montreal, grand chancellor; Mr. D. A. F. Webster, of Toronto, Lieutenant grand commander; Dr. L. F. Biggs, of Toronto, captain of the guard, Supreme Council; and Mr. W. H. Ballard, of Hamilton, secretary-general, Supreme Council.

Deputies from the Provinces of Canada who attended the Vancouver session are as follows: J. H. Winfield, of Halifax, N.S.; Rev. Frank Charters, of Montreal, Quebec; F. J. Howell, of Hamilton, Ontario, deputy, and Mrs. Howell; J. Miller, of Winnipeg, Manitoba, deputy; Alexander Sheppard, of Regina, Saskatchewan; Dr. E. A. Braithwaite, of Edmonton, Alberta, deputy, and J. H. Seymour, deputy, of British Columbia.

NEW ZEALAND WOULD BETTER RAILROADS

General Manager of Railways Asks Programme Costing Some \$65,000,000 for Improvements

AUCKLAND, N.Z., Oct. 4.—The annual railway statement, presented to Parliament, contains important policy proposals made by the Minister, J. G. Coates. The Minister's opinion is that the state has a splendid railway system which can be made to pay a reasonable interest on the capital and render more satisfactory service.

The Minister proposes reforms which constitute an admission that criticism of railway methods is justified. He will attempt to put the whole system on a business footing. No new lines should be built unless it is shown that interest can be earned within a reasonable time. The system of railway accounting should be reformed to bring it into line with commercial undertakings, so that the financial position of the system may be clearly shown. The Minister believes that district managers should exercise more authority, also that more energy should be shown to meet the growing competition of motor transport. He reduces freight charges on certain goods to meet this competition. Motor trains will be introduced for short distances.

The report of the General Manager of Railways states that a programme of improvement of works totalling \$65,000,000 is required to be adopted. Those works were greatly delayed by war subsequent to a financial shortage. The Minister's statement was made on the eve of an inquiry into the whole system two English railway experts, who have just concluded investigations in New South Wales. The Minister wishes his ideas to go before this commission.

PRINCE HONORS FAMILY PARTY

Continued from Page 1

the entrance and the waiting automobile. Traffic was tied up temporarily while the street spectators crowded around to see the royal visitor and their cheers and hand-clapping the Prince drove away.

The entire eighth floor of the Hotel Vancouver is closed to everybody save the Prince's suite and his guests. No elevators in the hotel other than the one reserved for the use of the Prince and his suite stop at that floor. The Prince has as much privacy as if he were in his own castle, for none can either see in or get in. The private elevator for the suite is standing at the eighth floor all the time. In the event of the arrival of telegrams or visitors the elevator is called down by telephone.

H. J. Musket, private secretary to the Lieutenant-Governor, was the first visitor received today by the Prince. Mr. Musket extended an invitation to the Prince to be the guest of the Lieutenant-Governor at dinner at Government House in Victoria on Monday evening. The invitation was accepted.

The royal Highness was the recipient of special game licenses for the day and will probably enjoy some shooting while in British Columbia. The license, which is of a complimentary nature, was issued by the Game Conservation Board on instructions from Victoria. Mr. Frank Butler, secretary to the board, conferring with the Prince's secretary on the matter.

Where the license will be used, or whether it will be used in not known, but it is probable that Mr. Butler will accompany the party to make the necessary arrangements in the event of His Royal Highness desiring to bag some of British Columbia's game.

HOTEL IS READY FOR ROYAL GUEST

This coupon entitles you to a sample of my Home Treatment. Fill out your name and address and send it to J. W. McWHERRY, 111 Main Street, Marshall, Mich., and the sample treatment will be sent you by mail.

Unexampled Daring Of War Heroes to Be Commemorated

The Second Battle of Ypres will be the synonym of unexampled daring so long as there is a god of battles. The German was at least successful with his new and infamous engine of war, poison gas, so far as the sector on our left was concerned. The 45th (French) Division retired, but the Boche triumph was short-lived. The Canadians, entrenched Langemark, filled the gap and the following day counter-attacked, at the same time extending their front from 3,000 to 3,600 yards. Touch was regained with the French, and in the interim we had recaptured the guns lost by our allies.

Do we not all remember the horrible casualty list of that week, when every third name was that of a relative, friend or acquaintance, and all Canada mourned, yet rejoiced, because of her hero dead?

The War Memorial Fund headquarters are at 610 Port Street, open daily for collections.

Designed Memorial**MR. SYDNEY MARCH**

One of the talented family of March Bros., of Farnborough, Kent, Eng., who have made many of the war memorials which have been erected throughout the British Isles and elsewhere in the Empire, to commemorate the soldiers who fell in action in the Great War. Mr. Sydney March's design for the Victoria War Memorial, which is being erected in the Parliament Building grounds, was approved as soon as the committee had the opportunity of seeing it, being in his hands by the time the British sculptors were invited to submit designs. The March family numbers among its members the brothers Percival, Dudley, Walter, Elsie, Harry, Edward, Sydney and Vernon. The two last work together, and between them have designed many memorials for Whitfield, Redcliffe, Gosport, Hadfield, Bromley, Lewes, Sydenham and Cape Town. Mr. Sydney March is a native of England, coming to this country fourteen years ago, and leaves to mourn her loss a husband, W. H. Bolton, of Bay Road, Mt. Toimie, and one brother, Thomas, Haddock, of Victoria. The remains are resting at McCall Bros' Funeral Home and will be removed to St. Luke's Church at 1:30 o'clock on Monday afternoon, where services will be conducted by Rev. W. Carroll at 2:30 o'clock. The remains will be laid to rest at St. Luke's Churchyard.

BOBENCE—The funeral of the late Sarah Bobence, who passed away at St. Joseph's Hospital on Tuesday morning, took place yesterday afternoon at 2 o'clock from McCall Bros' Funeral Home. Relatives and numerous friends were in attendance, and the many floral tributes were beautiful. Rev. W. G. Wilson officiated. The following friends were pallbearers: G. W. Smith, G. H. Eccles, W. Hayswood, A. W. Bennett, and A. Mayo. The remains were laid to rest at Ross Bay Cemetery.

COLLICTUTT—There passed away at the Royal Jubilee Hospital on Saturday evening G. M. Collictutt, aged 70 years, of 459 Obed Avenue, Saanichton. The remains were removed to McCall Bros' Funeral Home. Funeral arrangements will be announced later.

ILES—The funeral of William Douglas Iles, who passed away at St. Joseph's Hospital, took place yesterday afternoon at 3:30 o'clock from the Sande Funeral Chapel. Relatives and a large attendance of friends were in attendance and the floral tributes were many and beautiful. Mr. H. C. Bickell officiated, and the hymns sung were "Hear the Call" and "On the Resurrection Morn." The pallbearers were Messrs. W. C. Bickell, C. Hates, A. H. Winkler, T. Gibson and James Martin. The remains were laid to rest in Ross Bay Cemetery.

BENNETT—The death took place Friday on Mayne Island of one of the island's most popular and highly-respected citizens in the person of Thomas Bennett, age 80 years, born in the County Down, Ireland, and a resident of Mayne Island for the past 40 years. The late Mr. Bennett, as well as his wife, will always be remembered for the many kind deeds and services rendered during their many years on the island. The deceased is survived by, besides his widow, five sons, one in this city and the others on the island; two daughters, Mrs. P. G. Glickson, Mayne Island, and Miss Bennett, at home; two sisters, Mrs. W. Crombie, of San Francisco, and Mrs. M. Blair, on the island; also one brother in Ireland, and nineteen grandchildren. The funeral, which is being arranged by the Sande Funeral Co., will take place on Monday, Oct. 6, at 2 o'clock, from the family residence. Rev. Mr. Porter will officiate and interment will be made in the church cemetery.

ARMY AND NAVY

The Victoria Unit, Army and Navy Veterans, will hold their general monthly meeting on Thursday, when the delegates to the Dominion convention recently held at Winnipeg, will deliver their report on the proceedings. Several matters of great interest were discussed, and several important resolutions passed. The members of this unit are particularly requested to attend.

SALT SPRING

Comox Visitor
Mr. Sidney D'Esterre, of Comox, arrived on the island last Tuesday and made a short stay at Ganges, the guest of Mr. and Mrs. W. E. Scott, before leaving next week for a six months' visit to the Bermudas.

At Harbor House
Mr. Hugh Green, of South Salt Spring, arrived on Monday at Ganges where he intends spending some time. He is a guest at Harbor House.

OBITUARIES

SMITH—The remains of the late George Smith, who passed away very suddenly on Wednesday evening, were laid to rest in Ross Bay cemetery yesterday afternoon. Service was held at the Thomson Funeral Home, 1625 Quadra Street, at 3 o'clock, when the Rev. W. G. Wilson, D.D., of the First Presbyterian Church, officiated. The hymn sung was "Jesus, Lover of My Soul." During the service a solo was rendered, "There Is No Night There." Mr. Lawton Partington presided at the organ. There were many friends present and many beautiful floral designs covered the casket, testifying to the high esteem in which the late Mr. Smith was held. The following acted as pallbearers, all members of Court Camosun (No. 2323) A.O.F.: Brothers G. W. Andrews, Charles Fry, J. P. Torrance, George Gedrin, J. G. Wilson, and F. E. The late Mr. Smith was a native of London, England, and had been a resident of this city for the past fourteen years.

JENKS—The remains of the late Joseph L. Jenks are resting at the Thomson Funeral Home, 1625 Quadra Street, pending arrival of his family from California. Due notice of the funeral will be given later.

SPENCER—Mrs. Annie Spencer, widow of the late Stephen A. Spencer, of 1223 Yates Street, a pioneer resident of this Province, passed away suddenly at Fort Langley, B.C., on October 2. The deceased leaves to mourn her loss four sons, C. M. Spencer, A. H. Spencer and R. H. Spencer, all residing in Victoria, and S. A. Spencer, of Long Beach, Cal. The remains will be forwarded to this city and will repose at the B.C. Funeral Chapel. Notice of the funeral will be given later.

LEWIS—The death occurred at Ignace, Ontario, on September 30, 1924, of Frederick Robert Lewis, aged 25 years and 7 months, son of Mr. and Mrs. A. E. Lewis, of 1410 Harrison Street. He was born in Belleville, Ontario, and had resided in this city for the past eight years. The remains will arrive Tuesday morning and will be conveyed to the chapel of the B. C. Funeral Co. where services will be held in the afternoon at 2:30. Interment will take place at Royal Oak Burial Park.

MEARNS—There passed away yesterday afternoon, in this city, Mrs. Jane Clarke Mearns, aged 82 years, beloved wife of William Mearns. She was born in Windsor, Ontario, and had been a resident of Victoria for 21 years. The remains are resting at the B.C. Funeral Chapel, where services will be held Wednesday afternoon at 2 o'clock. Interment at Royal Oak Burial Park.

BOLTON—There passed away at the Royal Jubilee Hospital on Friday evening Ann Bolton, aged 73 years. The deceased was a native of England, coming to this city fourteen years ago, and leaves to mourn her loss a husband, W. H. Bolton, of Bay Road, Mt. Toimie, and one brother, Thomas, Haddock, of Victoria. The remains are resting at McCall Bros' Funeral Home and will be removed to St. Luke's Church at 1:30 o'clock on Monday afternoon, where services will be conducted by Rev. W. Carroll at 2:30 o'clock. The remains will be laid to rest at St. Luke's Churchyard.

BOBENCE—The funeral of the late Sarah Bobence, who passed away at St. Joseph's Hospital on Tuesday morning, took place yesterday afternoon at 2 o'clock from McCall Bros' Funeral Home. Relatives and numerous friends were in attendance, and the many floral tributes were beautiful. Rev. W. G. Wilson officiated. The following friends were pallbearers: G. W. Smith, G. H. Eccles, W. Hayswood, A. W. Bennett, and A. Mayo. The remains were laid to rest at Ross Bay Cemetery.

COLLICTUTT—There passed away at the Royal Jubilee Hospital on Saturday evening G. M. Collictutt, aged 70 years, of 459 Obed Avenue, Saanichton. The remains were removed to McCall Bros' Funeral Home. Funeral arrangements will be announced later.

ILES—The funeral of William Douglas Iles, who passed away at St. Joseph's Hospital, took place yesterday afternoon at 3:30 o'clock from the Sande Funeral Chapel. Relatives and a large attendance of friends were in attendance and the floral tributes were many and beautiful. Mr. H. C. Bickell officiated, and the hymns sung were "Hear the Call" and "On the Resurrection Morn." The pallbearers were Messrs. W. C. Bickell, C. Hates, A. H. Winkler, T. Gibson and James Martin. The remains were laid to rest in Ross Bay Cemetery.

BENNETT—The death took place Friday on Mayne Island of one of the island's most popular and highly-respected citizens in the person of Thomas Bennett, age 80 years, born in the County Down, Ireland, and a resident of Mayne Island for the past 40 years. The late Mr. Bennett, as well as his wife, will always be remembered for the many kind deeds and services rendered during their many years on the island. The deceased is survived by, besides his widow, five sons, one in this city and the others on the island; two daughters, Mrs. P. G. Glickson, Mayne Island, and Miss Bennett, at home; two sisters, Mrs. W. Crombie, of San Francisco, and Mrs. M. Blair, on the island; also one brother in Ireland, and nineteen grandchildren. The funeral, which is being arranged by the Sande Funeral Co., will take place on Monday, Oct. 6, at 2 o'clock, from the family residence. Rev. Mr. Porter will officiate and interment will be made in the church cemetery.

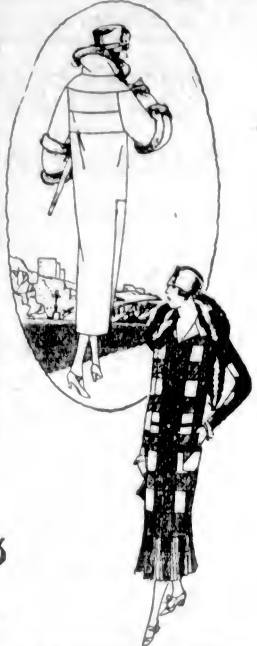

Graceful Lines in the New**Coats**

Smart straight lines with choker collars, novelty sleeves, a tendency towards button trimmings and but little embroidery—such is a very brief outline of the general characteristics in the coats for Fall.

In colors, fabrics and furs, there is a choice that permits far greater selection than ever before. Furthermore, the values are such that even the most exacting will find no cause for complaint. Fur-trimmed coats are priced from

\$35 to \$75

**Farewell Lecture**

Chamber of Commerce Auditorium

Tuesday, October 7, at 8 P.M.

I want to publicly thank the citizens of Victoria for their patronage, and at the same time tell those whom we have not yet had the pleasure of meeting, that there is a way of preventing disease, preventing in turn loss of time and loss of money, through illness.

My Winter series of health lectures begin in Vancouver the first of November, and for this reason I will be unable after this date to longer give my personal attention to the Victoria office.

Our system has been introduced here, however, and you have many proofs of its efficiency by the large number of citizens benefited. Those requiring our services will find Dr. J. Ross Higginbotham thoroughly conversant with and efficient in the application of my system, and for this reason he will be left in charge of the Victoria office after November first.

If you desire to know more about disease causation and prevention than you have gleaned from our advertising,

HEAR MY ILLUSTRATED LECTURE.

BRING YOUR FRIENDS AND YOUR QUESTIONS

A. McKay JORDAN, Energician,
1009 Cook Street, Victoria, B.C.

What Constance Errol, a press representative, wrote after four weeks' continuous investigation of the Jordan System in the Vancouver office, and published in the magazine section of The Sunday Sun, October 1, 1922.

CONSTANCE ERROL

So much interest was aroused by an article which I wrote recently, describing the success of Dr. Jordan in treating advanced cases of tuberculosis, and so many inquiries poured in upon me from all parts of the country, that I was forced to the conclusion that the only way to satisfy in any measure public curiosity and interest, was to apply to Dr. Jordan himself for a clear exposition of his theories and their application to the eradication of disease.

Some of the inquiries plainly showed skepticism regarding the possibility of effecting the cure of diseases, which if not pronounced incurable by medical authorities, are yet considered by them to be beyond the reach of medicine. These doubters cannot be blamed for their distrust. I confess that when, on the suggestion of one of Vancouver's best known women, I undertook to investigate the claims of Dr. Jordan regarding his discovery, I approached the subject with more than a little skepticism, and it was only when I had seen case after case where the patients were literally snatched from the grave, after a long course of treatment by orthodox medical methods, that I was compelled to believe that Dr. Jordan had in reality discovered a principle of health hitherto neglected, and a means of applying it with success to diseases hitherto considered incurable.

It is a difficult matter to free the mind of accepted faith. There are still persons in the Twentieth Century, ages after the earth was first circumnavigated, who believe that our sphere is flat, and the discoveries of geologists, backed by incontestable evidence, have failed to convince a very considerable number of people that the Universe was not created by the Deity in six days, a matter of five or six thousand years ago.

It is to be expected, then, that Dr. Jordan's theories will meet with unbelief, and at times with obloquy, even though there are many living proofs of their soundness going about their daily tasks in Vancouver and elsewhere today. That these theories are founded on a basic law must be acknowledged, for the number and diversity of cases coming under my own notice, are too great to be the outcome of blind chance or happy coincidence. Further, this principle of his was not hit on by accident. It is the result of a lifetime of study and research, of single-minded purpose and bulldog tenacity. It was one-third inspiration and two-thirds perspiration. Though primarily his researches aimed only at the eradication of disease, Dr. Jordan discovered, in the course of his studies, that there is one fundamental law underlying all true science of whatever kind, and that the principle which he applies to healing has a universal significance. Whether one agrees with his findings or no, there are no scientists alive today, not excepting Sir Oliver Lodge and the now famous Dr. Abrams of San Francisco, who have been able to produce an argument to dim the brilliance or lessen the magnitude of this science of the cause and eradication of disease.

Illustrated Lecture

"The Trail to the Yukon"
By REV. R. W. HIBBERT

Centennial Church.

MONDAY, OCT. 6 AT 8 P.M.
Miss Clare Powell and
Miss Scowcroft Assisting

Hollywood Presbyterian Mission—The hundredth anniversary service of the Hollywood Mission was held last Sunday, at 3 p.m., the Revs. W. Leslie Clay, D.D., and T. Menzies officiating. Many children and parents were present. The speakers briefly gave the history of the Mission since its inception, contrasting the small beginning ten years ago at the home of Miss Mortimer to the present comfortable hall. On Tuesday evening, a supper was served, when plates for sixty people were set. The tables were elegantly spread with the good things provided by the indefatigable Ladies' Aid, including a large birthday cake in the center. The superintendent, Mr. Muir, did the honors, and vocal and instrumental solos were rendered by Mrs. W. Grant, Mrs. Bain and Miss Jessie Smith. The collections at the services were in aid of the Mission repair fund. The Ladies' Aid is planning a Silver Tea for November 27, at the Mission.

DIZZY?
You're
Bilious!

CASCARETS 10¢

For Constipated Bowels, Sick Headache,
Colds, Sour Stomach, Biliousness

To clean your bowels without cramping or overacting, take Cascarets. You want to feel fine; to be quick-free from sick headache, distaste, biliousness, colds, bad breath, sour, acid, ranky stomach. One or two Cascarets, anytime, will start the bowels acting. When taken

at night, the bowels work wonderfully in morning. Cascarets never sicken or inconvenience you next day like pills, calomel, salts or oil. Children love Cascarets, too. 10 cent boxes, also 25 cent and 50 cent sizes. Any drug store. (Adv.)

City and District

Equimault Chapter—The Equimault Chapter, I. O. D. E., will meet on Monday afternoon at 2:45 at Lady Barnard's home.

Habit Breckers—The Habit Breckers' Association will meet on Tuesday evening at the Y.M.C.A. at 8 o'clock.

Gonzalez Chapter—I. O. D. E.—The regular monthly meeting of Gonzalez Chapter will be held at headquarters on Tuesday at 10:30 a.m.

Canadian Daughters' League—The regular meeting of the Canadian Daughters' League will be held on Monday evening, at eight o'clock, in the Sons of Canada headquarters.

Holding Dance—The Girls' Club of Keating is holding a novelty dance on October 24, in the Temperance Hall, with Charlie Hunt's orchestra in attendance.

Navy League Chapter—The regular monthly meeting of the Navy League Chapter, I.O.D.E., will take place in the Hamley Building on Friday, October 10, at 2:45.

Friendly Help—The regular monthly meeting of the Friendly Help Association will be held on Tuesday morning, at 10:30 o'clock, in the rooms (upstairs), the Chosen Building, Cormorant Street.

Meeting Tomorrow—A meeting of Florence Nightingale Chapter, I. O. D. E., will be held on Monday afternoon at 3 o'clock at the home of Mrs. James Baker, 714 Discovery Street.

Auxiliary to Meet—The Ladies Auxiliary of St. Joseph's Hospital will meet at the home of Mrs. W. F. Orme, 2721 Fernwood Road, on Wednesday, October 8, to sew for their coming bazaar in November.

At Baptist Church—Rev. Wm. Bickle Haynes, a prominent Baptist minister from the South of England, is visiting the Coast and will occupy the pulpit of Emmanuel Baptist Church at both services today.

Joining Staff—Mrs. S. MacLure, who has recently joined the Dominion Academy of Music staff as assistant in the piano department of Madame Kate Webb, the principal, will begin her classes during the coming week.

Cedar Hill Tennis—The Cedar Hill Tennis Club will hold a military "100" drive next Thursday evening, October 9th, in the Parish Hall, at 8:15 o'clock. Prizes will be given to the winning tables. Refreshments served at the interval.

Theosophical Society—The Victoria Theosophical Society will hold a public meeting this evening at 8 o'clock, in the rooms of the society, 101 Union Bank Building. Mr. W. R. Deane will present part two of his "Introduction to a Study of Theosophy." Dismissal will follow the address.

Treasury Appointment—Hon. T. D. Patullo, Minister of Lands, was appointed a member of the Treasury Board by an order-in-council passed by the cabinet yesterday. The board consists of Premier Oliver and other members of the cabinet and deals exclusively with financial questions affecting the Government.

Giant Sunflower—Mr. H. C. Williams, of 911 Market Street, a member of the Victoria and District Gardeners' Association, brought to the Colonist Office yesterday a sunflower measuring seventeen inches in diameter, and stated that he had grown it from a seedling produced by twenty blooms on one stalk.

Women's Liberal-Conservative—The regular bi-monthly meeting of the Women's Liberal-Conservative Club will be held in the clubrooms, Campbell Building, on Tuesday evening, October 7, at 8 o'clock. An active winter campaign is being planned, and all members are requested to be present.

Charged With Stealing—In the police court yesterday morning a charge of stealing bottles of materials from the Thomas Shotbolt Company laid against Fred Dora, a witness pleaded not guilty, stating that he did not remember being in the store at all. The case was adjourned until Monday.

Bridge and Mah Jong Party—Next Friday afternoon, at the Empress Hotel, a big bridge and Mah Jong party will be held under the auspices of the Dr. O. M. Jones Chapter, I.O.D.E., in aid of the Chapter funds. Table reservations may be made by phoning Mrs. Grate (4232) or Mrs. Foot (62561). During the tea hour an interesting musical programme will be rendered.

Medal Presented—On Friday a pleasing annual ceremony was performed at Equimault High School, which was presented with a gold medal for the highest standing, 1923-24, to Miss Donella Willing. The Reeves, in a few well-chosen words, made clear his interest in the progress of education in the municipality, and was thanked by Major Sisman, the chairman of the School Board.

Lake Hill Events—Lake Hill W.I. will hold its regular monthly meeting on Tuesday, at 8 p.m., in the Community Hall. The Institute will hold a military "100" drive tomorrow. Players are asked to be seated by 8:15 p.m. Every Monday evening scores of the players will be kept and prizes (donated jointly by Women's Institute and the Community Centre), will be given at the end of the season for the highest average scores.

Luxton Hall Dance—A dance will be held in Luxton Hall, under the auspices of Luxton and Happy Valley Women's Institute, on October 16. Pitt's orchestra has been engaged and a good time is promised to all. The Halloween party will be followed by an adult dance, as previously announced. The evening will be devoted entirely to the children. It is hoped as "many children as possible" will wear fancy dress. Prizes will be given.

12th Siege Battery—Parades of the 12th Siege Battery will take place on Tuesday, and on succeeding Tuesdays until further notice, at 7:55 p.m. Battery work will take place from 8 to 8:45 p.m., and physical training games, under Sgt. Kelly, from 8:45 to 9:15 p.m. A meeting will follow to arrange the programme of social and sport activities which the battery

intends to carry out on the weekly parade during the winter season. Each member of the battery is especially requested to be present.

Grass Hockey Club Dance—The members of the Victoria Grass Hockey Club and their friends have arranged to hold their opening dance on Wednesday, October 23, in the K. of C. Hall, Government Street. The music will be furnished by Ozzard's orchestra. The ladies of the club will supply the refreshments for the occasion. This affair, which promises to be a very enjoyable one, will be the first of a series of dances to be held by the club during the winter. Tickets may be obtained from members of the club.

Study Asiatic Issue—Following the instructions of the Grand Council of the Native Sons of Canada, Victoria Assembly, No. 1, of that society, held a meeting on Thursday evening to discuss ways and means of combating the Asiatic menace, and several suggestions were offered which will be analyzed. By the direction of its governing body all the assemblies in British Columbia, twenty-eight in number, are studying the Asiatic question, with the idea of presenting a plan to the various legislatures in the Province whereby this question might be solved to the economic advantage of the white inhabitants of British Columbia.

Scotch Concert—The first Scotch concert of the season will be held on Saturday evening, October 18, in the Chamber of Commerce Auditorium, an excellent programme will be given under the chairmanship of Mr. John Hodge, president of the Victoria Burns Club, and an evening's good music will be well-known exponents of Scottish minstrelsy will be looked forward to eagerly by Scottish Victorians. This concert is being held under the auspices of the ladies' committee of the Girls' Refuge Club on Stanley Avenue, of which Miss Crease is president. The proceeds will be devoted to the funds of this very worthy work of providing shelter to homeless girls in the town while in search of employment.

On the Trail to Yukon—On Monday evening, in Centennial Church, Rev. R. W. Hibbert will give his lecture on the Yukon. Hibbert lived in Dawson for the period between 1911 and 1919, and thus is able to give many of his descriptions at first hand. He will also tell the story of the unparalleled stampede of 1897, when thousands from all directions responded to the call of gold and went over the trail of 1898 to Dawson and the gold-bearing creeks in the vicinity. As a part of the programme for the evening Miss Clara Powell will read Robert Service's "Call of the Wild" with piano accompaniment, and Miss Scowcroft will read "The Cremation of Sam McGee" and "Good-bye, Little Cabin." Mr. Joseph Patrick, president of the Canadian Club, will occupy the chair.

JUVENILE SOCCER
According to present indications it is more than likely that a junior soccer league comprising some five or six teams of boys 17 years of age and under, will be formed in the immediate future.

At a meeting held on Thursday evening last, entries were received from teams representing Saanich, Thetis, Oaklands and Equimault; whilst inquiries were received from at least two other teams. With this fact in mind the committee in charge decided to extend the time for receiving entries to the proposed league to Thursday, October 10, at 3 o'clock. An active interest in the league is being shown by many of the young men of the city.

The committee in charge is hopeful of receiving such financial support as will warrant the provision of medals or other suitable trophies for the winning team, and every effort will be made to give the utmost encouragement to all junior soccer players in the city and surrounding districts.

Beauty

A Gleamy Mass of Hair

35c "Danderine" does Wonders
for Any Girl's Hair

Girls! Try this! When combing and dressing your hair, just moisten your hair brush with a little "Danderine" and brush it through your hair. The effect is startling! You can do your hair up immediately and it will appear as thick and heavy—a mass of gleamy hair, sparkling with life and possessing that incomparable softness, freshness and luxuriance. With the beautifying hair "Danderine" is also toning and stimulating each single hair to grow thick, long and strong. Hair stops falling out and dandruff disappears. Get a bottle of "Danderine" at any drug or toilet counter and just see how healthy and youthful your hair appears after this delightful refreshing dressing. (Adv.)

For the Suite of H.R.H. the Prince
of Wales at the Empress Hotel

—A Victrola

When His Royal Highness The Prince of Wales toured the world, he chose the Victrola and "His Master's Voice" records for his private suite on board H.M.S. Renown. Once again he will enjoy this peerless instrument, for we have been requested to supply a handsome art model Console Victrola for his private suite in the Empress Hotel.

The most celebrated artists in all the world have endorsed the Victrola by making records for it exclusively, and it follows as a matter of course that the Victrola is the chosen instrument of those who appreciate all that's best in the realm of music.

MR. McMINN GIVING
SECOND BIBLE TALK

The evening subject at the First Congregational Church will be: "If Not the Literal Word, What?" This will be a follow-up sermon to the one preached by the pastor last Sunday evening, on "The Bible and Literalism." Mr. McMinn undertook to answer the question whether the Bible should be accepted literally. He declared that the question was not one of yesterday, that it was not raised by "Modernism" so called, or by any twentieth century invasion of the church by wordlines. The modern scientific method of literary criticism had presented a new phase of the question, and added fresh vigor to the controversy, but the question itself went back almost as far as written documents of religion.

Mr. McMinn described typical scenes of strife in church history which showed that theological controversy usually turned upon this ground of literal interpretation of the Bible, and that where the parties were unyielding on that "all-important point," it never failed to lead to prolonged wrangling and endless division.

The pastor then experimented with the literal method in interpreting the

Genuine English
Navy Serge Suits \$30
Made to Order for Men
and Women

Charlie Hope

Phone 2689 1434 Government Street

Bible, and allowed the people to see for themselves that it only led to endless confusion or lent itself to fanciful and absurd theories and theologies which were neither true to the spirit of Christianity, nor the ethics of the Bible. Mr. McMinn then claimed that the prophets certainly were not literalists; that Jesus, judged by the literalists' standards, was a heretic and that He was put to death primarily because He would not adhere to the letter of the Jewish scriptures. Literalism, said the pastor, in concluding, was the safeguard of all evils that were in good social standing. It was the most successful and subtle method of misleading the sincere and uninformed. It was an effective block of all progress and the bitter enemy of Jesus and the spirit of Christianity now as then. What then was the alternative to literal interpretation?

Mr. McMinn's morning subject, "The First of the Prophets," is the second sermon in a series, "The Great Religious Leaders."

"That Meal Upset Me Too,
But I took Pape's Diapepsin"

Almost Instant Relief from Indigestion, Gas, Heartburn,
or Sour, Acid, Upset Stomach—Anytime!

Correct your digestion and quiet your rebellious stomach by eating a few tablets of Pape's Diapepsin—anytime. Nothing else known relieves the distress of Indigestion, Gas, Heartburn, Flatulence, Bloating or Acidity so promptly—besides, the relief is pleasant and harmless.

Millions know the magic of "Pape's Diapepsin" and always keep it handy to reinforce the digestion, should they eat too much or eat something which does not agree with them. 60 cent packages guaranteed by druggists everywhere. (Adv.)

Social Events

Celebrate Anniversary

On Saturday, September 27th, Mr. and Mrs. R. W. Hurst, of 2535 Government Street, entertained about fifty guests in honor of their twenty-fifth wedding anniversary, which took place in Christ Church, Robsonay, Ontario. The second occasion was the announcement of the engagement of their eldest daughter, Helena Rose, to James Hansen Francis, which is to take place shortly. A very pleasant evening was spent in cards and dancing, and several vocal solos were rendered by Mrs. Bertucci. Among the out-of-town guests were Mrs. Hovey and Mrs. Farrier, of Vancouver; also Mrs. R. Fletcher of Robsonay, Ontario, an old friend of the family.

Dance Hosts

Mr. and Mrs. J. W. Whitehouse, 74 San Juan Avenue, entertained Friday evening for the pleasure of their

Dear Sirs

Please guard your hair
By Edna Wallace Hopper

I feel sorry to see men grow bald. It is a pity to lose and to cultivate hair, and you owe it to yourselves and to us.

For many years I have sought and consulted some of the world's greatest experts on hair. They all agreed that hair comes from a clean and healthy scalp.

Combat the hardened and dandruff which stifles the hair roots. Tons and stimulates the scalp. Then hair thrives in a well-kept garden.

Those experts have always supplied me with the best help I know to science. Each new and better help discovered has come to me at once. Now I have had all of these combined in a product I call my Hair Youth.

I have placed it on drug and toilet counters at every woman's call. But men need it more than women, so this is written to urge men to learn how much it does.

I am no longer young. For years I have been a stage star. But my hair today is thicker and finer than 40 years ago. I have never had falling hair or dandruff and never a touch of grey. Now I offer you in my Hair Youth every help which brought these results to me. I am well assured that they combine the greatest half helps in existence. Edna Wallace Hopper's Hair Youth is sold by Owl Drug Co.

Write me for my Beauty Book and I'll send with it something else to please you. Edna Wallace Hopper, 124 Lake Shore Drive, Chicago.

Calgary Visitors

New Method Laundry
Limited

Fashions and Foibles

By Shirley Sharps

Plaits enjoy an excellent position at the side front of a new semi-sports frock, for every one sees them and no one—meaning the wearer—sits on them.

For the polo matches smart women choose a type of dress that suggests the sports frock, and a new model with fine plaits and a belt set in across the front, giving the effect of a two-piece dress, is especially good. As early autumn days can be devastatingly hot, these little frocks are made in the silk and satin crepes, printed silks and crepes de Chine. A creamy tan for the frock and hat and brown for the gumps, pumps are smart, while pale French grey for the entire costume from head to heels is new and exquisite. The plaits are very well placed, for you don't sit on them and therefore they keep to their original creases.

McPherson was hostess at a charming farewell tea in honor of Miss Nell Hannah, who is leaving soon for Vancouver. The rooms were prettily decorated with chrysanthemums, sweet peas, daisies, and the table was centered with a bowl of bright pink dahlias. An interesting guessing contest took place, the prize being won by Mrs. Norman Dickinson. The invited guests were Mrs. Walter Thatcher, Mrs. W. A. Scott, Mrs. M. Lyman, Miss Nell Hannah, Mrs. F. O. Barrie, Mrs. Norman Dickinson, Mrs. Sidney Clark and Mrs. Bert Beer.

Attend Dance
Among those who motored from Nanaimo to Nanaimo on Wednesday to attend the Malaspina dance were Mr. and Mrs. Bert Beer, Miss Agnes Ferguson, Miss E. Watson, Miss Dolly Haarer, Mrs. W. Pendleton, Mr. and Mrs. J. Schell, Miss Lorna Schell, Messrs. Harry Pack, Charlie Guertel, John Melville, Eddie Stone and Norman McLeod.

Pay Brief Visit

PLAN GREAT RALLY

A most elaborate and interesting programme has been arranged for the great Sunday School rally to be held in the Auditorium of the First Presbyterian Church this afternoon, commencing at 1:30 o'clock. The original hour set was 3 p.m., but owing to the unusual circumstances it was decided by the teachers and officers to set the hour for 1:30 in order that there may be a very large attendance of scholars, also parents and friends. The body of the church will be occupied by the scholars, who will sit with their teachers, and it is hoped that the remaining seats in the gallery and elsewhere will be filled with adult members of the congregation.

The Sunday School choir, under the leadership of Mr. Alfred Gurney, will lead the singing. Miss Carol Menzies will render a vocal solo. During the offering the choir will render a special number. A very interesting feature in this service will be the promotions in every grade from the cradle roll up. Rev. Dr. Wilson will give an address also.

Tomorrow evening the annual rally day concert will be held in the Church Hall, commencing at 8 p.m. A high-class programme has been arranged for the occasion.

C.P.R. SOCIAL CLUB
All arrangements have been completed for the opening dance in the Empress Hotel ballroom, Thursday evening, under the auspices of the C.P.R. Social Club.

The dance will commence at 9 o'clock and will continue until 2 o'clock. Professor Osard's orchestra is prepared to put on the very latest in dance music, and an enjoyable evening is assured.

Invitations are not required for this dance, and it is expected that the committee shall be in a position to distribute, on Thursday evening, the invitations for the small dances to be held during the ensuing season.

Many inquiries have been made for

reservations for Thursday night, and it is expected that there will be a large turnout of members and friends. Tickets may be obtained from the C.P.R. Ticket Office, Government Street; C.P.R. Wharf Ticket Office; Empress Hotel, and from any member of the committee.

VICTORIA WOMEN'S INSTITUTE

The Victoria Women's Institute met on Friday for a social afternoon, when the programme of rules and regulations of the Fall fair were thoroughly gone over and discussed. As so many of the outside Institute members were present, it was an entertaining afternoon, and an educational one, also. Different suggestions were given, and a few alterations made to the present rules, so that both judges and institutes might understand fully what was meant.

The Fall bazaar was also announced to take place on October 18. All the members of the Victoria Institute extend a hearty invitation to the public to attend, so as to make it both a financial and social success.

Miss Ivy Cobbett favored the meeting with two songs which were much appreciated, and after refreshments were served, the meeting adjourned.

Egypt has a legation at Washington for the first time in history.

"See how they wear"

Keep them care-free

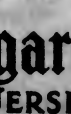

DON'T WORRY the children about their clothes—let them be happy, unrestricted and care-free. YOU need not worry about wear and tear on clothes either, if you dress your children in

NEWS OF THE SPORTING WORLD

Giants Score First Win Over Senators In Twelve Innings

Senators Tie Score in Ninth With Spectacular Rally, Making Fighting Finish to Thrilling Baseball Battle—Walter Johnson Loses His Game but Makes Record in Striking Out Twelve Giants

WASHINGTON, Oct. 4.—The New York Giants fought their way to victory today over the Washington Senators in the opening game of the 1924 world's series, after one of the most thrilling, dramatic battles ever known. The Giants won by the narrow margin of 4-3, in twelve bitterly-contested innings, and the quarter Washington's heroic moundman, Walter Johnson, but the Senators, although beaten in the first bid they have ever made for the game's greatest crown, covered themselves with glory in a fighting finish that drove a crowd of over 35,000 into a frenzy.

Come From Behind
Coming from behind when it seemed that two amazing home runs by George Kelly and Bill Terry had clinched the game for the Senators, the Giants, however, emerged from the score in the ninth with a spectacular rally and then, in the twelfth, after the Giants had gained another commanding lead, scored their third run off Art Nehf, Giant southpaw, and threatened once more to deadlock the game in a final desperate spurt.

The Giants triumphed by the sheer resistance power of an attack that Johnson and the Senators, despite their most heroic efforts, could not check. But the American League champions, though they emerged defeated in this gripping, three-hour struggle for supremacy, left the field amid one of the most remarkable demonstrations any team—victor or vanquished, ever could.

Coolidge Elected
The first citizen of the nation, President Coolidge, chief among a host of notables forming the brilliant gathering, threw himself into the fight at the end of that pulse-quickenning twelfth inning as he waved his hat and joined in the mighty tribute to the Senators who had fought their fight courageously and came within an ace of turning the tide that throughout the game had seemed irresistibly against them.

It was a stunning blow for Washington's high hopes, a defeat for Johnson that had its tragedy after the fact, but could not cross, as the Senators' victory, but it left "Bucky" Harris, 27-year-old pilot, and his men undaunted, undismayed, and confident that they have suffered only a temporary setback in the fight that will lead to ultimate triumph.

Hero in Defeat
Johnson, the idol of all fandom, the masterpiece of Washington's hopes, emerged a hero even in defeat. For while the gallant veteran was hit hard and paved the way for his own defeat in the twelfth inning, when he faltered, he gave a brilliant exhibition, flashing all the amazing speed that has made him famous. Johnson struck out twelve of the Giants and in nine of the twelve innings baffled them with the craft and "smoke" of his delivery. But two mighty home runs by Kelly and Terry, the latter with the suddenness of lightning, and a savage drive in the twelfth inning, brought about the veteran's undoing.

Play by Innings
First Inning
Giants—The crowd let loose roars of applause as the Senators ran to their positions on the field. Johnson also came in for a big hand as he walked to the mound. Lindstrom tied out to McNeely. Frisch popped to Blumie trying to bunt. Young struck out. No runs, no hits, no errors.

Second Inning
Giants—Kelly got a long hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Third Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Fourth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Fifth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Sixth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Seventh Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Eighth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Ninth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Tenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

SOCCER STANDING

The league standing of clubs in the First Division Football League is as follows:	P.	W.	L.	D.	Pts.
Requimait	2	1	0	1	3
United Services	1	1	0	0	2
Veterans	2	1	1	0	2
Sons of England	2	1	1	0	2
North Wards	1	0	0	1	1
Victoria Wards	1	0	1	0	1
Moose	0	1	0	0	0

Yesterday's results:
Requimait, 2; Wards, 2.
S.O.E., 1; Moose, 6.
United Services, 3; Veterans, 1.

McNeely, making a nice play on McNeely's slow roller. Harris filed out to Wilson. Rice walked. Rice stole second. Goslin struck out. No runs, no hits, no errors.

Ninth Inning
Giants—Wilson shot a single into right field. Jackson sacrificed. Blumie to Judge. Wilson going to second. Gowdy beat up air and sat down. Nehf singled into right and Wilson was called out at the plate. Rice to Ruel. No runs, two hits, no errors.

Tenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Eleventh Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twelfth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Thirteenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Fourteenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Fifteenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Sixteenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Seventeenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Eighteenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Nineteenth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twentieth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-first Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-second Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-third Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-fourth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-fifth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-sixth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-seventh Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-eighth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Twenty-ninth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Thirtieth Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Thirty-first Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Thirty-second Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

Thirty-third Inning
Giants—Johnson struck out a batter. Kelly got a hit into the left field bleachers for a home run. Terry shot a line single over second. Wilson struck out. Jackson walked. Gowdy hit into a double play. Peckinpaugh to Blumie. No runs, two hits, no errors.

CHESTER THORN CHOSEN AS HEAD

P.N.W. GOLF TOURNAMENT IS AWARDED TO SPOKANE

All Rounds of Amateur Championship to be Held at Thirty-Six Holes—Handicap Eliminated

SEATTLE, Oct. 4.—Chester Thorn, Tacoma, was named president of the Pacific Northwest Golf Association at the annual meeting held here today, and the Spokane Country Club was awarded the 1924 tournament.

Other matters decided at the conference were the substitution for the former handicap event of a scratch tournament for players with handicaps over 10, the decision to have all rounds of the amateur championship at 36 holes, and the elimination of the match play feature for the Davis Cup competition at future cup tournaments.

Twenty of thirty-two membership clubs were represented by delegates. Other officers elected were: Vice-president, Biggerstaffe, Wilcox, Victoria Golf Club.

Treasurer, R. M. Jackson, Tacoma Country Club; Secretary, H. H. Pearson, Waverly Country Club; W. H. Payne, Ingleside Country Club, Seattle; Dr. T. W. Watts, Portland Golf Club; R. Knox Walker, Shagbush Golf Club; Judge J. H. Riggs, Yakima Country Club.

The retiring president, under a change made in the by-laws, also becomes a director ex officio. The petition of Fircrest Club, of Tacoma, for membership was accepted, as was also the resignation of the Gearhart Club.

The treasurer's report, presented by K. A. McLennan, of Vancouver, B.C., showed the association to have a balance of \$1,062 for the year. The nominating committee for next year was chosen as follows: H. A. Fleeger, Seattle, chairman; H. P. Taylor, Jericho; Ben J. Lindsay, Spokane; H. Hart, Portland; S. S. Anderson, Fircrest.

VALADOR WINS HANDICAP
HAVRE DE GRACE, Md., Oct. 4.—Valador won the \$10,000 Havre de Grace Handicap for horses aged four and up at a mile and a furlong here today. Spot Cash was second and Donoghue third. The time was 1:51.

UPLANDS GOLF CLUB
The ladies' monthly medal competition of the Uplands Golf Club played yesterday was won by Mrs. Maxwell with a gross score of 110, net 75. Mrs. Wilding was runner-up with 90 gross and 74 net.

VICTORIA GOLF CLUB
The ladies' monthly golf competition will be postponed this month for one week. It will be played on Friday, October 24.

White Sox Score Third Straight Win Over Cubs
CHICAGO, Oct. 4.—The White Sox slugged themselves to their third straight victory over their Cub rivals today, 13 to 9. The American League outplayed their rivals at all stages of the game and made it easy for Ted Blankenship to register a shutout.

RECORD FOR JOHNSON
WASHINGTON, Oct. 4.—When he struck out twelve Giants today, Walter Johnson tied the world's record hung up in 1906 by Ed. Walsh, of the Chicago White Sox. Walsh's mark, however, was made in a nine-inning game, while Johnson took twelve innings to reach his figure.

PHENOMENAL BATTING FEATURE OF SEASON
Rogers Hornsby Set New Mark for Hitting Average in Spite of Injury—Ruth Home Run King

CHICAGO, Oct. 3.—Battles are over in the major league pennant year. The 1924 campaign, while lacking the sensational, individual home run hitting that marked Babe Ruth's performance in 1923 and 1924, as a whole, nevertheless, was a phenomenal season in batting. Rogers Hornsby, of the National League, finished with an average of .424, setting a new mark for hitters.

Habe Ruth closed the season with a mark of .373, falling down in his home-run hitting in the closing days of the race. He made 48 homers, however, the high mark of either league.

Hornsby, if not for a sprained back that put him out of the game for ten days at a time when he was at the top of his form, possibly would have established an inconceivable batting record. Still, the St. Louis star had one of the best seasons of his career.

Wards and Esquimalt Play to Two-All Draw

Fast Soccer Game Played at Beacon Hill—Sons of England Score Eight Goals to Nil in Game With the Moose—United Services Celebrate Entry Into First Division by Defeating Veterans by Three to One

STAGING a terrific rally in the last fifteen minutes of their match with the Esquimalt eleven, the North Wards drove in two goals in quick succession and held their opponents to a two-all draw at Beacon Hill Park yesterday afternoon. The match was the first in which these two teams have met this year, and was played at a fast pace throughout. About 800 people were present.

Play was even in the first period, although the Esquimalt team's shooting was much more accurate than that of the Wards, and two goals were credited to their score, while the Wards ended the first half scoreless. From the beginning of the second period it looked as if the Wards were going to have it all, but the Esquimalt team came back strong and drove in two goals to equal the score.

The First Score
Habe Ruth closed the season with a mark of .373, falling down in his home-run hitting in the closing days of the race. He made 48 homers, however, the high mark of either league.

Hornsby, if not for a sprained back that put him out of the game for ten days at a time when he was at the top of his form, possibly would have established an inconceivable batting record. Still, the St. Louis star had one of the best seasons of his career.

The petition of Fircrest Club, of Tacoma, for membership was accepted, as was also the resignation of the Gearhart Club.

The treasurer's report, presented by K. A. McLennan, of Vancouver, B.C., showed the association to have a balance of \$1,062 for the year. Sportive Fences

By the "Old Un"

There is a boyish sport of ancient origin and long tradition which appears to be either unknown here or at least not upheld with that customary and seasonable regularity with which it is indulged in by the youth of Old England.

The sport referred to is the ancient and honorable game of "conquerors," and the season for playing it is now when the ripe horse chestnuts are falling off the trees.

When the Old 'Un was a Young 'Un he and his companions used to collect the ripe chestnuts and carefully pick out the medium-sized ones which in their wisdom they opined would prove the toughest.

These were taken home and stored on a string after being bored (with care to avoid splitting) with a gimlet. One then selected a chestnut and threaded it on a string of its own with a knot at the end and then sallied forth for the combat.

Each boy in turn held up his chestnut at the end of its string for the other to hit at with his own until one or the other yielded to the repeated blows, cracked and fell to pieces. The surviving chestnut was then credited with being the conqueror of the broken one and as many as the loser had previously conquered.

And the word of the owner of a "conk" was taken without question as to the number of victories credited thereto. Which was in the Old 'Un's opinion, one of the beauties of a game which sounds simple and childish, but did call for a certain amount of skill and honorable dealing.

Every once in a while a "black sheep" would try dishonest practices and play an unfair dodge by playing with a "rock" or a "brick," as it is known, meant a chestnut hardened by slow roasting in the oven.

But the punishment was swift and dire for such evil practices, and it was hardly unusual to find the offender in the gutter in a playground full of boys all armed with "conquerors" at the end of strings, swung swiftly and skillfully against the back of a running boy's legs.

Nowadays games and sports are more elaborate, but sometimes one is inclined to wish the punishment for dirty work were as swift and effective as to make it as scarce as it used to be in the ancient and honorable game of "conquerors" played in our early youth.

During the first period the Sons had most of the play, although the Moose would break away with some rushes, but through failure on the part of their forwards to take advantage of the openings, no scoring was done. Four goals were registered by the Sons when the first half ended. Play continued about the same throughout the second half, with the result that four more goals were added to the Sons' total. Ockwell handled the game, and the teams were as follows:

Sons of England: Hetherington, Church, Harwood, Reg. Shankes, Crowe, Dryborough, Richardson, Newman, Southern, Swan and Conneron.

Moose: Holman, Milton, Turner, Hagen, Merris, Moulton, H. Bray, Johnson, H. Moulton, Glatier and M. Martin.

PATTULLO WINS THE MEDAL ROUND

PLAY STARTED FOR CHALLENGER AND MITCHELL CUP

Good Scores Turned In in Annual Handicap Competition of Victoria Golf Club

The qualifying round in the Challenger and Mitchell Cup competition of the Victoria Golf Club was played yesterday on the Oak Bay links. The course was in perfect condition, and the weather ideal for the game, and some excellent scores were turned in. Hon. T. D. Pattullo won the medal round with a net score of 65. The scores follow:

	Gr. Hcap	Net
T. D. Pattullo	89	65
Hew Paterson	78	66
W. L. McIntosh	80	66
E. D. Todd	86	67
K. Hayman	91	67
C. W. Pangman	85	67
Harold Haynes	82	68
Dr. Baillie	85	68
T. O. Mackay	83	69
J. H. Wilson	82	69
E. A. Burton	79	69
A. E. Haynes	84	69
Dr. Barrett	84	70
L. E. York	85	70
F. A. MacCallum	84	70
H. H. Smith	90	70
The above qualify for the cup flight.		
A. T. Goward	78	71

Cricket Notes

By A. B. BROWN

Positions in County Championship

The final standing in the English County cricket championship for the past season follows:

Pts.

Yorkshire 78.52

Gloucestershire 69.00

Surrey 67.00

Lancashire 62.80

Kent 62.30

Nottinghamshire 55.65

Gloucestershire 55.65

Somersetshire 53.00

Warwickshire 46.00

Sussex 40.40

Leicestershire 39.20

Hampshire 35.83

Glamorgan 35.00

Worcestershire 29.56

Essex 28.47

Northamptonshire 18.82

Derbyshire 15.73

Unsatisfactory System

Thus at the close of the inter-county championship Yorkshire has a clear lead of 1 1/2 per cent over Middlesex.

The system of reckoning is very unsatisfactory, declares a writer in England, because Yorkshire is again the champion shire, and yet the three counties immediately below them—Middlesex, Surrey and Lancashire—have beaten them.

It is true, continues the London writer, that Middlesex at Lord's had only to meet half the strength of Yorkshire owing to the trial match at Nottingham, but Surrey overcame them in a critical game at the Oval, and Lancashire had the distinction of defeating their neighbors for 11 at Leeds.

The Old Order

If the old order of reckoning on the fewest losses had been in vogue, Surrey (one defeat) would have been the champions, with Lancashire second (two losses).

Totals in bound to admit that the sixteen complete winners of Yorkshire (Surrey had nine and Lancashire eleven) far exceed those of any other shire and gave them an unequalled winning percentage.

Skill Not So Great

Although Yorkshire has carried off the title in three successive years, it is impossible to escape the conclusion that their skill and resources are not so great as in their earlier triumphs, according to one critic who has had an excellent opportunity to judge of their play.

Lord Hawke's View

Lord Hawke, in his introduction to the history of Yorkshire County cricket from 1803 to 1923, says:

"Twenty years ago I was captain of what I still believe was the greatest county team that ever entered the field."

"If I say that I do not think the present team is quite equal to mine, it is only because I do not consider it has been opposed by quite such good cricketers as we had to play against."

Open to Argument

It is open to argument that Yorkshire had not "the greatest county team" of all time, as Lord Hawke suggests, for I for one declares the London writer cannot forget the days of the Graces and Gloucestershire, and the wonderful Nottinghamshire teams which earned the highest positions between 1855 and 1886 inclusive.

There is no doubt, however, regarding the merits of this year's champions—the Yorkshire eleven—has been the best balanced side and has included the cleverest all-round players.

The object of the Yorkshiremen has been to win. Their cricket has been grim and safe rather than graceful and spirited.

Wet Weather

Taking the past county season as a whole, the year will be long remembered for the unfavorable conditions that prevailed.

Summer in England since 1921. It seems as if the Australians took the sun away with the "Ashes."

Rhodes—The Evergreen

Wilfred Rhodes, the famous Yorkshireman, has undoubtedly been one of the outstanding cricketers of the season. For a man in his 47th year to capture over 100 wickets and score over 1,000 runs is truly amazing. This is the eighteenth year since 1893 that Rhodes has taken over a hundred wickets.

Rhodes now holds the record for double—one thousand runs and a hundred wickets in a season. He has done it on fifteen occasions, and has thus passed his old friend, George Hirst, who had fourteen to his credit.

English Team for Africa

The following players will comprise the English cricket team to play in South Africa this winter: Tennyson, captain, Hampshire; Jamieson, Hampshire; Marriott, Kent; A. H. Gilligan, Sussex; Day, Hampshire; E. Tydesley, Lancashire; Garry, Leicestershire; Holme, Yorkshire; Russell, Essex; Parker, Gloucestershire; Bowley, Sussex; and Kennedy, Hampshire.

Advocate New System

The Yorkshire Cricket Club, has agreed to support Lancashire's proposal for the abolition of the present system of reckoning points and percentages in the championship.

The principles proposed by Lancashire will be laid before the Advisory County Cricket Committee at Lord's on October 23.

The new method abolishes the points on the first innings and ignores draws, but inspires all teams to work for a win outright, and that there must be a minimum of ten finished matches for a county to qualify for a place on the championship chart.

Mr. Toone Optimistic

Prior to the departure of the M. C. C. team for Australia, the other day, Mr. T. C. Toone (Yorkshire), manager of the party, expressed the opinion that his team was a pretty strong one.

He thought it would be a question of endurance, for both sides would

be stronger in batting than in bowling.

Mr. Toone thought they had a really good chance of recovering the "Ashes," but it would be a big task to select the best side for the test matches. There are seventeen players in the combination.

LEXINGTON RACING

Title Brooks Two Towers Stake Record in Winning Walnut Hall Cup—Field Outclassed

LEXINGTON, Ky., Oct. 4.—In winning the Walnut Hall Cup here today, Title Brooks lowered the stake record twice in her heats in 2:02 1/4 and 2:01 1/4. It was the fourth time that

Driver Tommy Murphy had won the event. The winner far outclassed her field, the second best being Holly-wood Prince. The Kentucky Futurity for two-year-old trotters proved to be quite an upset, the hitherto unbeaten Allen Guy making breaks in each heat and finishing outside the money. Sam Williams, from the Good Time stable at Goshen, N.Y., won the event in straight heats. Soubrette was second. Derby Dillon disposed of a good field of pacers in the 2:05 pace.

The 2:15 trot, the first race, was won by Owl B, which nosed out the favorite, Hurry Up, in each heat.

The first mandala used in Egypt were constructed of papyrus.

Christendom the World Over

A Weekly Review of Religious News

As provided for by the memorable Church Union Bill which passed the Federal Parliament last July, the new United Church of Canada will be constituted in Toronto on June 10 of next year. During the preceding week the General Assembly of the Presbyterian Church in Canada, the General Conference of the Methodist Church, and the Congregational Union of Canada will close up business as separate denominations and, on the historic day, the three uniting groups will march from their respective meeting places to a central assembly room where the United Church will be duly consummated. The initial administration of the new Church will be under the General Council consisting of 160 Methodists, 150 Presbyterians, 40 Congregationalists and 15 representatives of the Independent Union churches. The General Council will set in motion the coordination of the world-wide work of the erstwhile separate denominations. Later the Provincial Conferences and the District Presbyteries will function in their respective spheres. It is pointed out that in the management of local affairs each congregation may maintain its usual practices in membership, church ordinances, and Sunday School and Young People's work. The Scotch religionists may sing the Psalms and paraphrases, Wesley's adherents may praise God in Wesley's hymns, and the Congregationalists continue their monthly meetings of the congregation. Regarding the minister, the Presbyterian Witness assures the hesitating that the congregation, as is now the Presbyterian practice, will have the right of choice; the actual appointment being lodged in the Settlement Committee instead of the Presbytery at present. This committee is composed of a minister and layman from each of the district presbyteries. Both parties being agreeable, the honored minister may remain for life. For over two years the Settlement Committee plan has been in successful operation in Manitoba by the Presbyterians and Methodists, over fifty appointments having been made. The Witness claims that self-sustaining congregations, especially in cities, will hardly feel the jolt of uniting, and that any later union of local congregations will be the result of harmonious arrangement. Meantime the unionists are perfecting plans for the continuance of a Presbyterian Church in Canada, though debarred during the last half century. "The Presbyterian Church in Canada," the non-concurrence of the Synod of Kingston and adjourned recently to meet as Presbyterians next October. The proportion of those who will stay out of the United Church is variously estimated, the general average being about twenty-five per cent of the Presbyterians, the larger share of these belonging east of the Great Lakes. Every congregation that takes no action goes in automatically. The voting on the matter may be taken any time between December 10 and June 10 and is by ballot, the time for voting extending over two weeks.

The Fraternity of Lady Poverty
Few happenings in British Christian history are more simply picturesque than the coming into Canterbury of the nine ragged and hungry, but withal light-hearted brothers of the Order of Saint Francis, who brought into England the spirit of the saint of Assisi. They were so ragged that their passage had to be paid for them; they were so ragged they were locked up for a night on the suspicion of being disreputable characters. This was 708 years ago on September 10, and the historic occasion was appropriately observed last month in Canterbury by services in Canterbury Cathedral, in which some Nonconformists participated, and a Roman Catholic pilgrimage, led by Cardinal Bourne, of London. The Bishop of Truro, in his sermon, outlined the Franciscan spirit as consisting of a great love of poverty, a primordial simplicity, coupled increasingly with a solid learning and their unquenchable gaiety. They were "such good company." In the garden of the old-time monastery the Roman Catholic pilgrims gathered, and there among the fruit trees and flower beds sang the Te Deum, though only a restored part of the kitchen remains of the isolated retreat built where the first joyous pilgrims sang it, full seven centuries ago.

After Five Hundred Years
Evoking less interest to us Britishers, but of surpassing moment to the sturdy and patriotic Serbians was the recent enthronement at Peitch, in Serbia, of Archbishop Dimitri as Patriarch of the Serbian Church. For the Serbian Church, which is Eastern Orthodox, has been exiled from its original centre of unity since the defeat of the Serbs by the Turks in 1521. Now that they have become an independent people, the restoration became possible. With great ceremony and rejoicing all the Orthodox Bishops of Serbia, the King also assisting, the Patriarch Dimitri was duly installed in the ecclesiastical capital of Peitch, where St. Sava, the great national saint of Serbia, set up his throne as Metropolitan in 1218.

More Ancient History
The ejection in 1662 of 2,000 clergy from their livings by the Act of Uniformity has been recalled at the two hundred and sixtieth anniversary of the Ramsgate Congregational Church. The original site of the first meeting place is unknown, since these Nonconformists of necessity gathered in secrecy. The foundation of a Christian church of very early date has been unearthed at Yavich, in Asia Minor, the inscriptions of which, referring to a bishop who lived about 375 A.D., seem to indicate that the commodious edifice, 200 feet long and in familiar basilica style, may have been built by the congregation immediately succeeding that to which the Apostle Paul preached in Antioch of Pisidia.

Christian History Up to Date
Fifteen international visitors deliberated with the Canadian delegates of the Young Women's Christian Association, who convened for their biennial conference at Preston, Ont. The underlying purpose of the association is to bring girls and young women of all types and conditions into right relations with God, the Father through Jesus Christ the Son — working out its programme of "more abundant life" through its appeal to the awakening of the mind, the love of companionship, the surroundings of home, the incentive of service. The Y.W.C.A. maintains its helpful Travelers' Aid women at all transportation centres and, in addition, has an International Migration

service in eleven countries which cares for girls in going from one country to another.

Another arm of the church's varied service was in action at the lecture course for the rural leaders of Manitoba, promoted by the principals of the Wesley and Manitoba colleges and attended by some seventy in number. Book keeping, bacteriology, social problems, young people's work and organized play were among the subjects discussed. Principal Dr. John Mackay, formerly of the Coast, gave addresses on "Christian Doctrine."

Lady Colvin

The Empire Review republishes a remarkable tribute to the late Lady Colvin, which her husband wrote anonymously, and which Mr. E. V. Lucas published in his book—"Her Infinite Variety" (Methuen).

"When she hears the best music (and she will hear none but the best) every lineament of her countenance is transfigured. Her friends not only learn in her company how to enjoy, but in her absence no very choice experience can befall them but of her they will be reminded, and to her involuntarily give thanks for the best part of what they feel."

"But life itself is most truly of all her sphere. She has the genius of the heart, and in her own spirit a blend of sensitiveness and high honor and fortitude which makes of her a priceless counsellor. Comfort abounds when she is by; something hides all who are not ungentle, men, women and children, turn to her and trust her. She cools and soothes your

Your Wrinkles Take Wings—in 15 Minutes

Want to have those unwelcome marks of age, illness or fatigue disappear in a few minutes? A spoonful of powdered tartroot, in a spoonful of lemon juice, smooths this skin, the emollient over your face—then go to the mirror and see what happens! You will surely have the surprise of your life. You will readily concede that you have never seen or heard of anything that could cause so remarkable and so quick a rejuvenation of face and features.

While this simple home treatment has such a wonderful effect upon a wrinkled or saggy skin, it is altogether harmless. Its influence upon the system is equally beneficial. Tartroot is not to be confused with any cosmetic or skin-soap, for it is to be washed off, leaving no trace of itself. An original package from the nearest chemist should make the cost less than three cents a treatment. (Adv.)

"Cheese—and ways to Serve it"

is the name of a little booklet every housewife, particularly every mother, should have. It contains nearly a hundred tested, economical recipes besides a wealth of authoritative facts about cheese. It suggests ways to serve "something different" in the menu of children and grown ups without sacrificing essential nourishment. It is indexed, illustrated in color—and free. Fill out and mail coupon below.

Kraft Cheese always bears the Kraft trade mark on the tinfoil. Varies in taste on seeing it before you buy, even though you have taken care to ask for "Kraft Cheese."

KRAFT CHEESE

Name _____ Address _____

secret snarl before you can name it, she divines and shares your hidden joy, or shames your fretfulness with loving laughter; she unravels the perplexities of your conscience, and finds out something better in you than you know of; she fills you not only with generous resolutions but with power to persist in what you have resolved.

"In the fearlessness of her purity she can afford the frankness of her affections, and shows how every fastidiousness of her sex may in the most open freedom be the most honorably secure. Yet in a world of men and women, such an one cannot walk without kindling once and again a dangerous flame before she is aware. As in her nature there is no room for vanity, she never foresees these insatiable combustions, but has a wonderful art and gentleness in allaying them, and is accustomed to convert the claims and cravings of passion

into the lifelong loyalty of grateful and contented friendship.

"With her own sex she is the soul of loyalty, and women love and trust her even more devotedly than men. She loves to be loved, and likes to be praised; but no amount of love or praise can make her believe that there is much remarkable about her."

WHY VIENNA GRUMBLES

VIENNA, Oct. 4.—To get a telephone connection in Vienna takes so much time that the whole city is complaining. The telephone administration seeks to remedy the situation by establishing special services. There is a "rapid" rate, which costs nine times the normal, and also a "lightning" rate, which must be paid for at thirty times the normal charge.

The average living-room is dryer than the driest desert.

Queensland to Benefit Local Meat Producers

BRISBANE, Queensland, Oct. 4.—An interesting experiment in co-operative meat selling is being tried in Queensland. With the object of securing better returns to meat producers, a strong financial group in Brisbane has launched a company with a capital of \$5,000,000 to handle the product from the producer to the consumer on a co-operative basis. One part of the plan is the establishment of a number of retail shops in Great Britain to which supplies would be shipped from Australia.

The author of the plan is Sir Henry Jones, of Tasmantia, who expects that the producers will not only obtain higher prices, but will receive additional money in the form of profits, which will be distributed by the company among the co-operative owners.

DOMINION LINOLEUM RUGS

Reduced in Price this Season.

Replace those worn-out floor coverings with bright, cosy Dominion Linoleum Rugs. You can do it to-day cheaper than ever. Prices are greatly reduced and women who love a bargain will be quick to seize this chance of saving money. House Furnishing, Departmental and General Stores everywhere, are featuring Dominion Linoleum Rugs.

Many new and attractive patterns

The new Fall patterns are wonderful. Selection is a pleasure. There are designs and colorings for every room and every rug lies flat without fastening. But shop early — otherwise you may be disappointed — the demand will be so great and you may not be able to get the pattern you want.

Everybody likes these floors

Beautify your home and save money while doing it. Give yourself the pleasure of warm, cheery genuine Linoleum floors that add zest to indoor days. You'll also save yourself endless work because Dominion Linoleum Rugs are the easiest of floor coverings to clean. A few mop strokes cleans them perfectly. For long wear, comfort and economy, you cannot beat these floors.

Dominion Linoleum by the Yard

For those who wish to cover the entire floor without crack or seam, Dominion Linoleum by the yard offers all the beauty and durability of Dominion Linoleum Rugs.

Reduced prices now in effect

Do not delay—Shop early and take your pick of these wonderful floor-covering bargains. At all House Furnishing, Department and General Stores.

Always turn over the edge and look for the backing mark. It's your guarantee of long and satisfactory service.

Made in Canada.

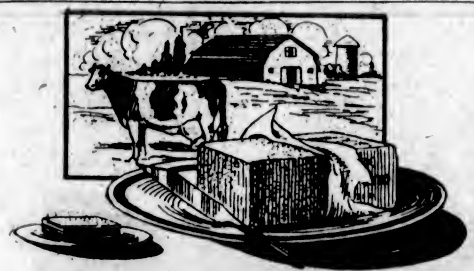

Hats for Afternoon Frocks Now Take the Centre of the Stage

Earl of Leitrim Makes Visit to This Country

Right—The Earl of Leitrim, photographed about the Canadian Pacific Hotel, Vancouver, B.C., during his visit to the country.

THE Earl of Leitrim, who has been spending a vacation on this side of the Atlantic, passed through Montreal on his return home, sailing last week by the Canadian Pacific steamer Montclair.

People are apt to think that the northwest coast of Ireland is inaccessible, but as a matter of fact the Earl says he has frequently motored from Belfast to Rosapenna in five hours. The roads are being improved and motor traffic in Ireland is on the increase, particularly now that so many Canadians and Americans are taking their own cars with them to

the Old Country. The Earl of Leitrim, who has crossed Canada before this, is much interested to see the development of Canadian tourist resorts. He was particularly struck by the tremendous crowds he found at the Chateau Frontenac, in Quebec. It will be a long time, he says, before Donegal has such a hotel, but the present ones are very comfortable and surprise visitors from this side by the conveniences they offer. Rosapenna, for instance, having suites of rooms with private bath.

Owing to the greater ease in securing labor, the rates are also not so

high as on this side—one can get very fair accommodation with meals included for five dollars a day, and this provides the opportunity for excellent salmon fishing in season.

Another erroneous opinion, according to the Earl, was that it rained all the time in the West of Ireland. The average rainfall in Rosapenna is only from forty to forty-five inches a year. Visitors, he says, are too apt to think the climate of the whole of Ireland is the same as that of Killarney, which he admits is wet.

PRAIRIE GRAIN CROP BRINGING PROSPERITY

Winnipeg Business Man Speaks Encouragingly of Work of Western Wheat Pool

Rising wheat prices at Winnipeg hold much promise of prosperity throughout the Canadian West, in the opinion of Mr. James Miller, secretary of the well-known jewellers Messrs. D. R. Dingwell, Limited, Winnipeg, who is a visitor in Victoria, a guest at the Dominion Hotel. Mr. Miller, who is visiting the Pacific Coast for the first time, accompanied the Scottish Rite Masons to Vancouver. He is a member of the Supreme Council, the head governing body of the Scottish Rite in Canada.

Speaking about general conditions in the prairie provinces, Mr. Miller said that while the current year's wheat crop was not so large as that harvested in other years, its quality was universally high and prices were good. In Manitoba, an excellent crop had been harvested and business men of Winnipeg were predicting that the West was on the eve of a new era of prosperity. Mr. Miller referred to the growth which had been made

in the big wheat pool, which embraces a great quantity of the grain production of the three prairie provinces. Grain growers were believing in it and the result was that the outpouring of Canadian grain into the world markets was being controlled. In the old days, he said, farmers were forced by individual economic conditions to sell their grain as soon as it was harvested. The result was an annual flood of wheat on the market, with consequent low prices. Under the pool system, growers were advanced one dollar a bushel for their grain when it was harvested, and it was held by the pool and placed on the market in quantities which the market could rapidly absorb. The result was that prices were stabilized and held at a good level. In Alberta, last year, Mr. Miller said, growers who sold through the pool secured several cents more per bushel for grain than was obtained by growers outside the organization.

Mr. Miller was high in his praise for British Columbia in general and Victoria in particular. He had heard much of the British Columbia capital, he said, and therefore he had expected a lot. He had not been disappointed.

OLD COUNTRY FOOTBALL

LONDON, Oct. 4.—Results of the league soccer games played in the Old Country today follow:

English League
First Division
Arsenal 1, Blackburn R. 0.
Aston Villa 1, Huddersfield 1.
Burnley 0, West Bromwich A. 1.
Bury 1, Sheffield 0.
Cardiff 1, Bolton W. 2.
Everton 0, Liverpool 1.
Leeds United 0, Huddersfield 1.
Manchester City 2, West Ham 1.
Nottingham F. 1, Newcastle 1.
Preston N.E. 0, Tottenham 1.
Sunderland 0, Notts County 1.

Second Division
Barnsley 2, Blackpool 4.
Clapton 0, Manchester United 1.
Coventry 0, Bradford 0.
Crystal Palace 2, Stockport 0.
Fulham 0, Portsmouth 0.
Middlesbrough 1, Derby County 2.
Oldham 2, Stoke 0.
Portsmouth 0, South Shields 0.
Sheff. Wed. 1, Leicester 4.
Southampton 0, Chelsea 0.
Wolverhampton 2, Hull City 4.

Third Division
Southern Section
Aberdeen 1, Millwall 1.
Brighton 0, Hove 4, Newport 1.
Bristol City 2, Gillingham 1.
Charlton 1, Reading 2.
Northampton 1, Swansea 2.
Norwich 2, Brentford 0.
Plymouth 2, Bournemouth 0.
Queen's Park 1, Merthyr 1.
South End United 2, Bristol 1.
Swindon 4, Luton 0.
Watford 2, Exeter City 0.

Northern Section
Accrington 0, Grimsby 2.
Bradford 2, Durham 1.
Chesterfield 4, Huddersfield 0.
Crewe 1, Doncaster 1.
Halifax 1, Brighton 2.
Lincoln City 1, Barrow 1.
Rotherham 1, Rochdale 2.

SWEEP OLD IDEAS AWAY!
Ideas about cod-liver oil should be revised. Children are often denied its health-building benefits because of prejudice. As a rule children relish

Scott's Emulsion

It is not a fad or fancy but its merit has been proved in a million homes during the past half century. Give it to your child—take it yourself!

All children take it as easily as milk, in fact most children have a fondness for Scott's Emulsion.

Raith Rovers 2, Ayr United 1.
St. Johnstone 1, Dundee 2.
St. Mirren 2, Hibernians 2.

Second Division

Alloa 1, Forfar 0.
Aldon Rovers 2, East Fife 2.
Armadale 2, Arbroath 1.
Dumbarton 4, Johnstone 1.
Clyde 2, Bathgate 0.
Broxburn 1, Kings Park 0.
Stenhouse Mulr 3, Clydebank 0.
East Stirling 3, Arthurrie 0.
Dundee United 1, St. Bernard 0.
Dumfries 1, Honeas 0.

GLASGOW, Oct. 4.—Rangers won the Glasgow soccer championship this afternoon, when they defeated Celtic in the final of the series for this trophy, 4 to 1.

LONDON, Oct. 4.—Wales defeated the touring South African soccer team in an international match at Colwyn Bay 1-0.

LEICESTER, Eng., Oct. 4.—The New Zealand All Blacks defeated the Leicester rugby team here today 27-0.

Social & Personal

Books at Dance
Mr. and Mrs. F. G. Aldous were hosts at a very delightful dance last evening at the Cadboro Beach Hotel.

For the occasion the hotel had been charmingly decorated with masses of autumn flowers. The hall was prettily decorated with ferns and chrysanthemums, while the lounge was lovely with a profusion of fragrant blooms. Dancing to the strains of Heaton's orchestra took place in the dining-room, which was most effectively arranged with Oriental draperies, the lights being shaded with Chinese lanterns added much to the pleasing effect of the room, while handsome Chinese objects, vases and dragons were included in the artistic scheme. Supper was served in the tea-room of the hotel at individual tables, each centred with dahlias and greenery.

Mrs. Aldous received her guests wearing a lovely gown of peach colored brocade, simply fashioned and caught at the left side of the waist by a brilliant shower of jet. The guests included Mr. and Mrs. Gillan, Major and Mrs. Powers, Mr. and Mrs. McCannan, Mr. and Mrs. McCarter, Mr. and Mrs. Branson, Dr. and Mrs. MacCallum, Mr. and Mrs. Price, Mr. and Mrs. C. Grant, Mr. and Mrs. H. P. Hodges, Dr. and Mrs. Harper, Mrs. Ponton, Madame Valda, Mrs. Clarence Hoard, Mrs. Waller, Miss Alma Russell, Miss Russell, Miss McAnally, Miss Iris Burton, Miss B. Gilmer, Madame Sanderson-Mongin, the Misses Campbell, Miss Sybil Mason, Miss Neva Stuart, Professor Howard Russell, Mr. Lock, Mr. McAnally, Messrs. H. and R. Wootton, Mr. F. Sterry, Mr. Eric Burton, Mr. Burroughs, M. Paul Carter, M. Maurice Cassin, Dr. Mercer, Mr. Alex. McPhillips, Mr. Ryan, Mr. Collins, Mr. Walker. About 11:30 o'clock, just before supper was served, announcement was made that two gypsies had arrived at the hotel and in return for refreshments would entertain the guests with song and dance. The gypsies fulfilled their contract in a most delightful manner. Wearing magnificent costumes, they danced to the music of their tambourines and sang haunting gypsy melodies. The parts of the gypsies were admirably taken by Mrs. Aldous and Madame Valda, the former's beautiful voice being heard to great advantage in the songs, and the graceful dancing, full of verve and animation, was much applauded by the spectators.

Bridge and Mah Jong House
Mrs. W. Todd entertained at her home, "Wilmar," 81 Charles Street, at bridge and mah jong, when her guests were Mr. and Mrs. Oothout, Mrs. Macan, Mrs. Payne, Mrs. Prior, Mrs. Hermann Robertson and Mrs. Brentzen.

CAMPBELL RIVER
Returns to Valdez
Mr. F. T. Breeze, of Gorge Harbor, Cortes Island, who has been a visitor to Campbell River for the past week, whilst repairs have been made to his launch Curlew, at the "Bibi" boatyard, returned to his very beautiful home on Cortes Island on board the Curlew last week.

From Vancouver
Mr. Allen, Government fisheries inspector, was a visitor from Vancouver last week.

PRESS CLUB DANCE TICKETS AVAILABLE

Great Interest Shown in Halloween Fancy Dress Affair to Be Held at Empress Hotel

"Halloween comes but once a year," but this year it will be marked by most auspicious festivities, for the Press Club will hold a fancy dress ball on October 31, at the Empress Hotel, and the interest already taken in the affair is most gratifying to the members of the club.

To accommodate the large number of guests who have intimated their intention of attending this function, two orchestras have been engaged, and Prof. O'Neil and Prof. Chas. Hunt will dispense the latest in syncopation from 9 o'clock onwards.

The party will be a great success, that, of course, is understood. It will be a fancy dress affair, though this is not compulsory, and during the evening there will be a few "surprises," which will be real surprises. This is not mere advertising, it is a statement of facts, and let those who doubt attend the affair personally and be fully convinced.

Tickets for the dance are now available, and may be obtained from the Colonist office, or from members of the Press Club.

TILLAMU FOOTBALL CLUB

The Tillamou Athletic Club will hold a soccer practice at the Royal Athletic Park this morning at 10:30. All players are requested to attend this workout. An indoor practice will be held on Tuesday night at 8 o'clock at the Exhibition grounds.

YOUR SPRING GARDEN Brand's Bulbs

Each bulb carefully selected of the right size and maturity to give the best results

Hyacinths
For the Garden
Best Named Varieties
\$1.25 per dozen; \$10.00 per 100.
Mixed: \$1.25 per dozen; \$9.50 per 100.

Miniature Hyacinths
For forcing or planting outside. Each pink, white and blue named variety: 80 doz. \$1.50 per 100.

Exhibition Hyacinths
The largest obtainable for pots or planters in all the West, and recent introductions: 250 each, \$2.50 per doz.

Beautifully illustrated catalogue and price list on request.

PROFESSIONAL FOOT SERVICE

Foot Hospital

Blisters and Other Foot Troubles Drain Vitality

Everybody knows that sore, swollen, archy feet lower efficiency. Science has discovered that painful, archy, foot-dragging blisters and arch-troubles make thousands upon thousands of strong, healthy men and women weak, nervous, irritable, and of temper, dependent and discouraged.

The impaired or debilitated nerve force weakens the will power; in fact foot trouble is ruining the career and healing the hopes and ambitions of thousands of suffering, discouraged mortals. Sometimes it affects the entire nervous system.

Many have tried crude worthless remedies without relief; some have tried built-in arch shoes, and ready-made shoe arch-supports. The only system of making arch supports that absolutely cures you of your foot trouble is by taking an individual impression of the foot, then build a support that will meet your requirements.

Our supports contain no metal, weigh an ounce, and will not destroy your shoes.

We have two offices. Expert foot correction specialists will be at our Yates street office from 9 a.m. to 5 p.m. and all day Wednesday, and at David Spencer's, Limited, from 1 to 5:30 p.m. daily.

Free examination; lady attendant. Price of supports from \$1.00 up.

As Young as he Feels

This is said to be the aim of the Young Man. In a sense that is true. But the real explanation is that nowadays there are so many men who, according to the calendar, are "getting on," but who in spirit, and "fitness" are just as young as they were twenty or thirty years ago. Are you one of these? If not, it's your health that's at fault. Probably from one cause or another your internal system is not functioning as it should. Impurities collect in your body, poisonous waste matter that should be expelled violates your blood, producing the feeling of tiredness and depression that makes you old before your time.

Kruschen Salts will alter all this. A tiny, tasteless dose taken every morning in your cup of coffee or tea, will restore your liver and kidneys to their proper activity, rid your system of all impurities and send new, refreshed blood coursing through your veins. Kruschen costs from three to sixteen times less per dose than "fizzy" drinks, and is far more efficient. Begin now to take the little daily dose that will give you back your energy. You will feel many years younger before you are many days older.

giving salts, then you suffer from depression, headaches, or disordered liver! Kruschen Salts should be your safeguard. Besides cleansing the body of impurities, gently, surely, and painlessly, they possess a wonderful power of giving life and vitality to the countless millions of cells of which every body is composed. Fresh, blood, bone, brain, and nerves are all made up of cells, and every cell requires one or more of the numerous constituents of Kruschen Salts for its healthy life. Each bottle contains 160 doses.

Trying to Eliminate Carrier-Wave "Beating"

The Bureau of Standards is attempting to eliminate the constant pitch whistle produced by the "beating" of the carrier waves of two transmitting stations. When assignment of frequencies is made to these stations it is with a view that such interference will not occur. In spite of this, the pitch whistle is caused occasionally by the failure of broad-

casting stations to maintain the frequencies assigned them. Radio supervisors, assisted by the Bureau of Standards, are doing their best to set and keep transmitting stations on their assigned frequencies, and so eliminate this type of interference. If radio listeners will identify any two stations producing beat interference and report them to the nearest supervisor of radio it will greatly help in this work.

Genuine BAYER ASPIRIN

Insist on BAYER TABLETS OF ASPIRIN

While it is well known that Aspirin means Bayer manufacturers, in the United States, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

Intelligence Tests Show Nordic Immigrants First

English and Scotch Nationals Pass Exhaustive Tests of American Army Ahead of Native Born Citizens of United States—Analysis of Results Seems to Indicate Superiority of Northern Races and Offers Valuable Guide to Immigration Policies

(By RONALD MACFIE, in London Morning Post)

In the following article Dr. Ronald Macfie discusses a recent study of racial intelligence made by Professor Carl C. Brigham, of Princeton University.

Professor Brigham has made an analysis of the results of mental tests which were carried out on a large scale in America during the war for recruiting purposes. His analysis of these statistics provides interesting information of the comparative intelligence of different races, of which the foremost are the English and Scotch.

Dr. Macfie refers to the effect of immigration on racial intelligence, and advocates an increasing national exclusiveness for this country. Only within the last few decades has science made serious attempts to define, measure, and grade mental capacity. The attempts have been made mainly by American psychologists, and the researches were at first undertaken chiefly with the object of grading children to facilitate education; but soon the cognate question of comparative racial intelligence arose, and in this direction some very important work has recently been accomplished.

During the Great War mental tests on a very extensive scale were carried out in the American army, and in 1921 the National Academy of Sciences published a report on the results of an examination of 81,000 native-born Americans, 12,000 foreign-born individuals, and 22,000 negroes. This report has been carefully analysed by Carl C. Brigham, Assistant Professor of Psychology in Princeton University, with a view to casting light on the question of comparative racial intelligence, and he has just published a work entitled, "A Study of American Intelligence," which gives an account of his investigations in this field. No scientist before has ever had such massive and serviceable material at his disposal, and his results are both interesting and valuable, even though not quite conclusive. His statistical analysis indicates that the various nationalities represented in the American army might be graded in order of intelligence as follows: English, Scotch, Dutch, German, American (white men), Danish, Canadian, Swedish, Norwegian, Belgian, Irish, Austrian, Turkish, Greek, Russian, Italian, Polish, American (colored).

The army tests on which this comparative order of mental merit is based were varied, searching, and thorough, and were designed to measure native intelligence as distinguished from educational acquirements, and many of them were adapted or the completely illiterate, and those unable to speak English, so that we may assume that the recruits of the various nationalities stood on the comparative intellectual level tabulated, and that, in the main, the results of Professor Brigham's analysis prove that the nations named therefore stand in the same relative intellectual level as the recruits they supplied to the American army.

It is very possible that the emigrants from various nations are not in equal degree comparable representatives of the average intellect of the nation to which they belong. It is possible, for instance, that the Polish and Russian emigrants belong to different social strata, and that varying economic conditions in various countries may raise or lower the average intellectual level of their emigrants. In one case, only the uneducated classes may emigrate; in another, mainly the intellectual; in another both. In times of prosperity only the lowest class may be compelled to leave their native land. In times of adversity—as in Central Europe today—emigration may be forced chiefly on the intellectual. While in some countries, such as Scotland and Ireland, enterprising, energetic, and courageous men have always sought their fortune across the seas.

Problem of Immigration. We must, therefore, interpret Professor Brigham's results with a good deal of caution; but it is at least safe to conclude from them that the average American today is of lower intelligence than the average English, Scotch, Dutch, and German immigrant—that the most intelligent races in America today come from Northern Europe, and that the negro is the least intelligent race of all. It may be even justifiable to conclude that, on the average, the Nordic races have more intelligence than the Alpine and Mediterranean races, and all the purer Nordic races come at the top of the list. This last conclusion, indeed, Professor Brigham does not hesitate to draw, and it is a conclusion of vital importance to the American nation: for immigration of late years has been preponderantly from the South of Europe, and this preponderant immigration of less intelligent races must tend to lower the average level of American intelligence. In fact, it would appear that average American intelligence is already deteriorating, and Professor Brigham urges that immigration from the Northwest of Europe should be specially encouraged. Even if such immigration be encouraged and increased, however, intermarriage with unintelligent negroes is likely to depress the average of American intelligence, and it is certain that no environment or educational advantages will compensate for innate intellectual inferiority.

"We must face," writes Professor Brigham, "a possibility of racial admixture here that is infinitely worse than that faced by any European country (say, for we are incorporating the negro into our racial stock, while all Europe is comparatively free from this taint)." According to all evidence available then, American intelligence is declining, and will proceed to decline at an accelerating rate as the racial admixture becomes more and more extensive. The decline of American intelligence will be more rapid than the decline of the intelligence of European national groups owing to the presence here of the negro. These are the plain, if somewhat ugly, facts that our study shows, and he goes on to state that even "if immigration were stopped now the decline of American intelligence would still be inevitable."

Warning for England

The plain and ugly facts that Professor Brigham's statistical study shows are of interest and importance to Nordic nations such as England almost as much as to the United States. It is true that we have no negro blood whose admixture would cause deterioration of our intelligence; but if it be true—as an scientific statistician seems to prove—that the Nordic races are more intelligent than the Mediterranean races, and that the Nordic races have evolved by the process of segregation, and only by a continuous process of the process can their high moral and intellectual qualities be maintained. It will be well, therefore, for the Nordic nations to take to heart the lessons taught by Professor Brigham's research, and to qualify international goodwill will a certain amount of national segregation and exclusiveness. It is our duty to conserve the intellectual superiority which is ours by heredity and evolution from the risk of miscegenation.

ART EXHIBITS SHOW ACTIVITY OF CLUB

Group of Canadian Artists' Work Now On View—Annual Display October 20.

The Island Arts and Crafts Society is fulfilling one of its intended objects: placing art before the people. In holding the present exhibition of Bank Johnston paintings in the Club rooms, Union Bank Building. During the last ten days numerous visitors have called to see these interesting examples of Canadian art and artist's work. Everyone has been greatly impressed by their character, originality, vigor, and definiteness. Johnstone's paintings have marked native ability as a young student in Toronto, his birthplace, and afterwards when he went to study in Philadelphia, he immediately proved himself one of the most gifted of his masters' pupils. Today he is head of the Winnipeg School of Art, which is the biggest of Western Canada art schools, with about four hundred students. In the eighty-two paintings which are now being shown at the Arts and Crafts rooms abundant evidence of his powers can be seen.

The Society is shortly giving further evidence of its vitality by holding its annual exhibition of original work by members and non-members. The exhibition is to be held in the Belmont Building for the week beginning Monday, October 20. Visitors will be admitted from 12 noon until 6 p.m. daily. The committee of selection will begin its work

Desserts for Children

Cup Custard

1/2 cup St. Charles Milk.
1/2 cup water.
2 eggs, beaten.
2 tablespoons sugar.
1/4 teaspoon salt.
Nutmeg and vanilla.

Dilute the St. Charles milk with the water and bring to a scalding point. Add sugar and salt to the beaten eggs. Pour over them gradually the scalded milk, flavor to taste, pour in custard cups. Place in a deep pan and pour boiling water around until it reaches top of cups. Bake in moderate oven about twenty minutes.

Cream Tapioca

1/2 cup St. Charles Milk.
1/2 cup water.
2 tabs. minute tapioca.
2 tabs. sugar.
1/4 teaspoon salt.
1 egg, beaten separately.

Flavoring.
Dilute milk with water and bring to scalding point in a double boiler. Mix tapioca, sugar and salt. Add gradually to the milk and cook twenty minutes. Add the egg, cook three minutes longer. Remove from the fire and fold lightly the white of egg. Flavor to taste. Serve plain or with fresh fruit.

Cornstarch Pudding

1/2 cup St. Charles Milk.
1/2 cup water.
1/4 tabs. corn starch.
2 tabs. sugar.
1 egg white, beaten stiff.
Pinch of salt.
Vanilla.

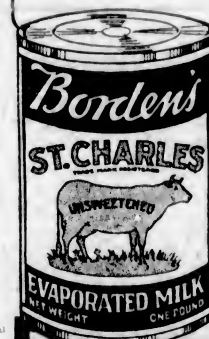

Dilute milk with the water and scald in a double boiler. Mix corn starch, sugar and salt thoroughly; add slowly to the scalded milk, stirring constantly until mixture thickens. Cook fifteen minutes, stirring occasionally. Remove from the fire and while hot add in lightly and thoroughly the egg white. Add flavoring. Turn into cups or molds. Chill, serve with a soft custard, mashed fresh fruit or whipped cream.

Desserts like these appeal to children—and grown-ups, too. They are good for both, being simple and wholesome. And they are easily prepared. Any recipe that calls for milk is improved by the use of Borden's St. Charles Milk.

This crown labeled "Cascade" quality beer is on every bottle of Cascade beer.

"Cascade"—THE BETTER BEER

Forty Years On One Job!

AFTER doing the same thing for forty years, a man begins to know something about it—whether it's selling hats or brewing beer. The "Cascade" brewmaster has been brewing beer for forty years steady. He knows it all—threatens to write a book about it. But seriously, he is one of the two chief reasons why "Cascade" is today THE BETTER BEER. The other reason is our wonderful plant—the last syllable in scientific, hygienic brewing mechanism—gets the best out of the beautiful malt and hops we put into it—keeps everything clean and wholesome and pure. That's why more and more people prefer "Cascade"—it's as near perfection as human intelligence can make it. So we say—

Drink "Cascade" THE BETTER BEER

Scientific and Industrial Development

Marine Engineering

The changes that have taken place in marine engineering practice the past fifteen or twenty years may be said to have found their fullest expression in the engine room of a modern battleship or passenger liner. There has been witness in that short time the advance from reciprocating steam engines to direct driving turbines, and from these again to the geared turbine drive which in its double reduction form has so disturbed the peace of mind of many engineers in recent times; and now the advent of the internal-combustion engine with its return to reciprocating motion bespeaks another change. And as the prime movers have changed, so also have the auxiliaries in sympathy with them. When to these are added the changes due to the increasing use of superheated steam and the substitution of oil for coal as the primary source of power in the boilers, it is

easy to realize that there is a greater variety of machinery installations to be met with on the high sea today than ever before, and that the machinery compartments of modern vessels are necessarily becoming more and more complex in character.—Engineering.

Metal Moulds For Castings

In a lecture at the Institute of Metals reported in Engineering, Mr. W. M. Corse said that metal moulds were being successfully used also for other metals besides the aluminum-bronze, and in particular for cast-iron. The moulds were themselves of cast-iron, and in the earlier experiments had been made with thick walls, which resulted in cracks and rapid wear. They were now made lighter, and steps taken to ensure that their temperature never rose above 350 deg. F., so as to avoid "growth." The Holley Corporation Company use cast-iron moulds

1/4-inch thick to produce intricate iron castings, ranging from 1/4 inch to 1/2 inch in thickness, and these castings were free from pores and quite soft throughout. The average foundry loss in this particular product was 7 per cent to 8 per cent, as against twenty per cent when made with sand. The work was done in machines tended with unskilled labor, and each machine produced 2,000 castings in five hours, which was eight times as much as with sand moulding, and the product was of better quality; in fact, castings were then produced which could not be made at all in sand moulds.

The moulds had radiating fins, and the rate of cooling was controlled by an air current. They were heated to a definite temperature before use, and maintained at this in service. The moulds lasted generally for 8,000 to 10,000 casts, and a life of 25,000 casts had been recorded. They were coated with a wash of water, fireclay and water glass, to a depth of one sixteenth of an inch, and this clay lining lasted a month. The clay was coated with lamp black, and this lamp black facing was renewed after every cast. The shrinkage of the metal was only half as much as with sand moulding, and the dimensions of the castings "held" within five one thousandths of an inch.

More development work was needed, but for certain classes the process was now an assured commercial success.—Engineering.

The Troublesome Aphid

In experiments conducted in apple orchards in Western New York by the entomologists of the New York State Experiment Station at Geneva, N. Y., it was found that when the spraying to control aphids was done from the top of the spray tank the results were quite uncertain, due to the fact that insects congregated on the lower branches of the trees where the spray mixture failed to reach them. But when the spraying was done from the ground and under the trees practically complete control of the pests was accomplished. A pressure at the spray tank of 200 pounds per square inch is used, and the spray is directed finely and insure that it shall cover completely the surfaces it hits with a thin but effective film.

Aphids are commonly called plant lice. There are several varieties of them. One variety seems to enjoy cabbage leaves literally to the full, and in dry weather they have been known to ruin a crop of cabbage. They do not like water or rain and so they generally congregate on the lower

side of leaves in order to escape it. Here, if undisturbed, they propagate in immense numbers. Within a short time the whole under surface of the leaf is covered, the aphids being packed so tightly that not one per cent of the surface of the leaf may be seen. They give to the underside of leaf a grayish, waxy appearance that on closer examination is seen to be due to their own natural color. They cannot be shaken off nor are they more than temporarily discouraged by rough treatment. But they go on multiplying, so that several layers may actually congregate. Sixteen broods of these insects may be hatched in a single season, the method of multiplication being known as parthenogenesis, in which an imperfect female, hatched from an egg laid by a perfect female, reproduces its kind for a number of generations without renewed impregnation. The aphids come so fast that were it not for the checks imposed by the balance of nature the whole world would soon be filled with plant lice. They cause the cabbage leaves to curl and upward, but downward the foliage in many cases these curl into a sort of roll so that the aphids are protected not only from the rain, but from the soft wind which is intended to kill them. During a prolonged drought their increase is so great that the cabbage plant is either prevented from growing or it comes to be a runt. The only method of getting at them completely is to hire a boy to run along the rows of this crop and pick the curled leaves by hand, a method that smacks more of the Orient than of busy America.

Poisons of the sort used to kill worms and insects that eat the foliage of plants do not even cause aphids a stomachache. If the poisons could be got inside the insects they would easily be killed, but these creatures are equipped with an implement something like that of the mosquito, which they thrust down under the surface of the leaf where there is no poison and suck the juices. They take their nourishment through a lemonade straw. This at once explains why ordinary poisons do not kill them. Many farmers have tried all sorts of poisons spray in order to kill aphids, but without success; while a non-poisonous dose of whale oil soap will very effectively do the work. But it must actually hit the aphid and cover its body. This fills the pores of the little pest and smothering it for it gains its necessary oxygen supply through its pores. That accounts fully for the necessity for throwing the spray upward from below the foliage, as observed by the Geneva Experiment Station in tests with apple tree aphids.

Automatic Substations

The great drawback to the use of direct current for tramway or railway purposes lies in the necessity for a large number of isolated substations for converting the alternating current supply to direct current at the voltage required for use. Such substations must contain running machinery, and until recently the control of this machinery has required the personal attendance of skilled operators during the whole of the time that the supply is maintained. For the greater part of the time the operators, of course, have absolutely nothing to do except to stand by, and the employment of two or three shifts of men per day on such duty in each substation involves an expenditure in wages quite disproportionate to the services rendered. Under these circumstances, it is not surprising that attempts have been made to render the operation of these substations automatic, so that the equipment will start up, perform its functions and shut down without the presence of any human operator. Apparatus working under such conditions must not only be self-protective, isolating itself from the system should any dangerous internal disturbance arise, but it must also protect the system as far as possible from the effect of external faults. The requirements are both onerous and complex, but they can now be satisfactorily met, and the fully automatic substation has become a recognized factor in electrical distribution.—Engineering.

Scottish Shipbuilding

The state of the shipbuilding industry in Scotland is not very healthy at present, and although the number of vessels launched in recent months has been very good, there are not enough orders on hand for new tonnage to fill up the stocks again. During the past month, 14 contracts were reported, eight on the Clyde, and three each for Aberdeen and Montrose, but few of these are of large tonnage—the largest being an Anchor liner of 8,000 tons. Unless a decided improvement takes place in the number of new contracts at no distant date, the outlook will become very serious, and from the employment point of view in particular. The output for the past month was as follows:

Vessels	Tons
The Clyde.....	15 48,682
The Forth.....	1 2,775
The Tay.....	—
The Dee and Moray	—
Firth.....	3 124

Total..... 18 51,582
The Clyde output was over the average monthly total for the year to date, and brings the year's figures up to 148 vessels of 2,658,815 tons, which are the highest for the corresponding period since 1920. The above total compares favorably with the first eight months of last year, when seventy-two vessels of 1,483,776 tons were launched, but it is the future, as already stated, which gives us the greatest concern. Shipowners are not inclined to enter the market yet, and until they can see the prospect of remunerative freights they are not likely to give out any contracts for tonnage at the high costs prevailing.—Engineering.

Devastated Areas in France
For all practical purposes of mere industrial output the reconstruction of the devastated areas may be considered as completed. The damaged mines, which only yielded 1,500 tons of coal in January, 1919, were able to produce 1,250,000 tons last May, and the surpassing the pre-war figures may shortly be anticipated. Provision has been made for the recovery of the by-products of coal, and the underproduction of coke has been so far repaired that five million tons a year are now produced, which is over 60 per cent more than in 1913. Large increases have been made in the exportation of potash by markets formerly held by Germany. Agriculture alone shows little progress, owing, it may be mentioned, to the acute shortage of labor, but the main crops, wheat and sugar-beet, are regaining their former position.—Engineering.

TOKIO, Japan, Oct. 4.—Increased efficiency in the broadcasting of weather data to vessels in the seas around Japan is promised by a new meteorological broadcasting station installed by the Tokio Central Observatory. The radius of the new station will be 1,000 miles.

Lower Night Rates For Long-Distance Conversations

NEW night rates for long-distance service have been instituted for long-distance calls between the hours of 8:30 p.m. and 7 a.m., on the basis of approximately twice, and in some cases three times, the day period, at two-thirds the day rate. For example:

From VICTORIA	DAY	NIGHT
To Vancouver.....	80¢ for 1 min.	50¢ for 3 min.
To Duncan.....	35¢ for 3 min.	25¢ for 6 min.
To Nanaimo.....	55¢ for 3 min.	35¢ for 6 min.
To Courtenay.....	65¢ for 1 min.	45¢ for 3 min.
To Port Alberni.....	55¢ for 1 min.	40¢ for 3 min.

Rates to other points are proportionate and will be furnished by the rate clerk on request.

The Bad Little Boy in Every Man

The Incurable Desire to Achieve Which, in Great and Successful Men, Has Overridden the Restraints of Drab Conformity

"All Men's Dreams Spring From the Desire for Power; In Their Heart of Hearts, All Men Are Jack-the-Giant-Killer"

By LUCIAN CARY

Editor's Note—The theme of successful men has been one of the most recurrent in human interest since—If not long before—Plutarch so ably developed it in his Parallel Lives in the First Century A.D. How certain men succeed where the majority fail seems never to lose in fascination; yet why these succeed and others fail, except in the measure of their dealing with the elements constituting them, is much more vaguely comprehended. Mr. Cary here undertakes to go to the root of the matter and disclose something of those inner phenomena which eventually manifest themselves in success or failure.

WHEN you want to know what a man is really like, there is only one thing that really matters, and that is his dream. There is no possibility of living with him happily, if you are his wife, or of estimating his capacity, if you are his employer, unless you know: first, what his dream is, and second, what he is doing about it. Any other information, however interesting, is as nothing beside that information in importance. A woman is a fool to marry a man unless she knows what his dream is and sympathizes with it.

It is a profound mistake to judge a man by his intelligence, to say of a man, "He has a good mind; he will go far," or "He thinks slowly; he will never amount to much." There is a whole modern cult of judging men in this fashion. Professors armed with questionnaires solemnly measure the intelligence of children to determine whether they should grow up to dig ditches or be physicians. There is grave doubt as to whether their methods are capable of distinguishing intelligence.

But the question itself is almost beside the point. Leaving out the extremes, that is to say, leaving out the idiots and the geniuses, intelligence may have very little to do with what a man achieves in life. It is the drive behind the intelligence that matters.

The Will to Win

The same thing may be said of physique. A man who weighs a hundred and eighty pounds is not going to win the heavyweight boxing championship. But neither are any of the ten thousand other men who weigh two hundred pounds and stand six feet high.

Those shrewd men who make a living by scouting for and discovering boys who have promise as prize fighters understand this very well. They know that the world is full of boys who have the physique for fighting. What they are looking for is boys who have the heart for it. Which is only another way of saying the desire for it, or the dream of it.

Occasionally a man of transcendent physical power and a willingness to earn the money, rather than the dream of being a champion, has a temporary success as a prize fighter. Joe Willard was such a one. He was bigger and stronger than any other contender. But, as he said himself, he did not like fighting. He could not reconcile himself to hurting the other man. He went into the ring only for the money. Jack Dempsey, who is much smaller, but who does like fighting, beat Willard unmercifully.

Making or Breaking a Husband

It is so in every other activity of men. Great potential ability always bows to a great desire in some man of less potential ability.

We all know this. But one man in a hundred simply and intuitively follows his dream in life; or con-

Henry Ford Tinkered With Watches and Clocks

"Consider the case of Henry Ford. I asked him how he got interested in making an automobile for the multitude. 'I wasn't at first,' he said. 'I was interested in making a watch that everybody could buy—a dollar watch. When I was a boy on the farm I spent all my money on watches and clocks and all my spare time in repairing other people's watches and clocks so I could find out how they worked.' 'Here was a farm boy with a dream—and one his father didn't approve of. What farmer would approve of a boy who was always skipping out to tinker with other people's clocks? A boy on the farm is meant to do chores.'"

Women and the Dreams of Men

"A woman is a fool to marry a man unless she knows what his dream is and sympathizes with it. I should divide the world of women into two classes with reference to men. The first class consists of those who are encouraging some man to live out his dream. . . . The second class consists of those women who endeavor—wittingly or unwittingly—to destroy the man's dream. When they succeed the man necessarily accepts failure in life. . . . That dream is the source of his power as a man. If she ruthlessly makes war on it he may acquiesce; he may even succeed moderately; but he will be no satisfaction to live with."

the desire for power. The dream may take a very individual form. It may be the dream of Alexander the Great, or Leonardo da Vinci, or Martin Luther, or Captain Kidd, or Charles Darwin, or Henry Ford, or the Wright Brothers.

But in their heart of hearts all men are Jack-the-Giant-Killer.

The small boy begins as soon as he can walk and talk to want to control, to possess, to conquer, and to destroy. He wants power. He wants to run every machine he sees, from the family egg-beater to the Empire State Express. As he grows older the difference between his desire and the desire of a little girl becomes more and more marked.

Checking and Curbing to Excess

For a good many years, sometimes all his life, he is too lacking in a knowledge of the consequences to himself and others to be left alone with

let go of it and it flew across the room.

The two little boys were ecstatic. They flew that toy, driven by a twisted rubber band, until it was worn out. Then they made one on the same model. And for the rest of their lives they continued to follow the dream the toy has suggested—the dream of flying.

A Farm Boy Who Skipped Chores. Is it necessary to point out that if the Wright boys had been conventionally good boys and tended strictly to business and denied their dearest dream and refused to play hockey off in the sand hills of the Carolinas, they would not have solved the problem of flight, would not have made their boyish dreams come true, would never have become famous?

Consider the case of Henry Ford. I asked him how he got interested in making an automobile for the multitude.

"I wasn't at first," he said. "I was interested in making a watch that everybody could buy—a dollar watch. When I was a boy on the farm I spent all my money on watches and clocks and all my spare time in repairing other people's watches and clocks so I could find out how they worked. I figured out a way to make a watch that could be sold at a profit for a dollar. Then—" he grinned at the memory of his own ignorance—"I figured that the only people who really cared about watches were the kind who could buy more expensive ones. I decided there wasn't any big demand for a dollar watch, so I gave it up."

Here was a farm boy with a dream. . . . and one his father didn't approve of. What farmer would approve of a boy who was always skipping out to tinker with other people's clocks? A boy on the farm is meant to do chores.

A Vision in Books

Later in life this boy found again his dream of making watches for everybody in the dream of building a car for everybody. He could have got capital easily enough, if he had been willing to give up the "everybody" part of it. Men were ready and willing to help him build a high-priced car. But nobody except Henry Ford believed in a low-priced car. Nobody thought it would pay. Henry Ford didn't know whether it would pay or not. It was his dream of power to make a car for everybody.

He had a hard time getting started. And when he did get started, his whole scheme was threatened by the hidden patents. All manufacturers of gas cars at that time paid royalties to Helden as the inventor of the gasoline motor they used. It did not so much matter to the builders of five thousand dollar cars. But it was a life and death matter to Henry Ford's dream of building a five hundred dollar car. He risked everything on a patent suit rather than give up his dream. You know the result. He won. He built cars by the million. He is making his dream come true.

Consider the case of Peter Collier. He was born in a cottage with a dirt floor in Ireland. He had no chance to go to school. He worked hard, lived on potatoes, and made his money hunting squirrels in the pink coats on beautiful horses.

Yet something incorrigible in Peter Collier—something which refused to conform to and use the best of the conditions in which he found himself—caused him to come to America with nothing but a dream about books, which meant education, which meant power. Single-handed he established the greatest subscription book business in America. He printed, bound, and sold more books than any other firm in the world while he was at it. He sold them to poor people at ten cents a week. He lived to make a great fortune, to wear a pink coat in the hunting field. He made his dream come true.

The Boy Who Skipped Off to Hunt

Consider the case of a boy who skipped off to college. His name was Roy Andrews. His instructors were impatient of him because he was always slipping off to go hunting. He wanted to be a hunter, a naturalist, an explorer. He did barely enough work in the class-room to pass his examinations.

Nobody says any future in his dream of being a hunter and explorer. It seemed a childish thing, a boy's dream such as a man has no business to indulge in in this day and age, unless as a recreation. But Andrews refused to give it up.

Today Roy Chapman Andrews is leading the third Asiatic Expedition of the American Museum of Natural History. Expeditions under his leadership have already made exciting finds in the Gobi desert. You have read perhaps that on his last trip he found in the sands of that remote place the eggs of a dinosaur, preserved for thousands and thousands of years. He is one of the world's leading explorers.

What Wives Need to Regard

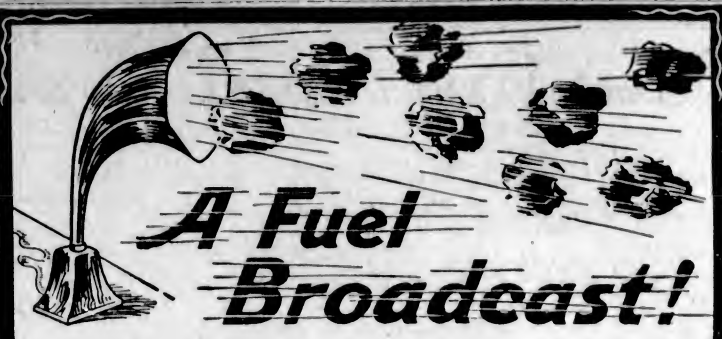

If Roy Chapman Andrews also had been the drably conventional good little boy, a boy who denied his dream and did just what he was told, he might by now be simply an instructor in paleontology in some university at twelve hundred dollars a year—rather tired, rather earnest, and rather unhappy.

Wives need to regard the bad little boy that exists somewhere in every man, however deeply hidden. Every wife should know that if she tries to destroy the bad little boy's dream in her husband she will either alienate him or destroy him. That dream is the source of his power as a man. If she ruthlessly makes war on it he may acquiesce; he may even succeed moderately; but he will be no satisfaction to live with.

Does this mean that women have no rights that men are bound to respect—no dreams of their own? Not at all. Women have a dream, deep in their heart of hearts, which men must respect if they are to live happily with them. But that dream and the consequences of it are another story.

(Copyright, 1924, by Metropolitan Newspaper Service, New York.)

ASK FOR Horlick's ORIGINAL Malted Milk Safe Milk For Infants, Invalids, Children, The Aged Rich Milk, Malted Grain Ext. in powder. Digestible—No Cooking. A Light Lunch

I "listened in" to an interesting broadcast the other night.

The man talked of the family budget.

He said the biggest expense was food.

Then came rent.

Then came fuel. That's certainly true in Canada. We keep furnaces going 6 months of the year. And we use electricity, gas, coal or wood every day for cooking.

He pointed out that fuel was one of the few things that had come down very little since the war, and that every effort should be made by householders to reduce the consumption of this expensive article.

We make things that use fuel to cook with and to heat with.

One of the outstanding features of our business is our ceaseless endeavor to make our equipment more and more economical on fuel.

Modern Gurney Stoves and modern Gurney Furnaces are like modern

autos. They burn less fuel than the old kind.

Suppose one of the new Gurney Hot Water Systems cut your fuel bill 20%? It would not be long before it paid for itself. It would be a profitable investment for you.

The Gurney Hot Water System is noted for its economy of operation. It is very easy on fuel. Our fire-pot, grates and water sections make the best use of all the heat produced from the coal—conserve heat, do not waste it. The Patented Gurney Economizer, that works like the throttle on a steam engine, enables you to control the fire perfectly in all kinds of weather and prevents waste of fuel.

Gurney Coal and Wood Ranges, Gurney Gas Ranges and Gurney Electric Ranges are, also, designed to be easy on fuel and to cook and bake perfectly.

We have interesting booklets describing "Gurney" products that I would be glad to send to anyone who desires to heat the home, or cook, with economy. Just clip out, fill in and mail the coupon below, checking off the booklets you want.

Yours for economy,

Holt Gurney

Prepare for the Indoor Days

SUMMER is on the wing. The days are shortening—there's a chill bite in the wind that's hustling the fallen leaves up and down the side walks. Soon you will have to forsake the great outdoors for the warmth of the fireside—leave the activities of the links or tennis court for the comfort of the living room. The indoor days will be here.

Will you be as happy "within four walls" as you were outside? Will your surroundings be as congenial? Let wallpaper make your home as beautiful and enjoyable as the outdoors. Wallpaper will bring all the warmth and color and life of nature right into your own home.

Re-decorate now, so that the indoor days will be welcomed when they arrive. Re-paper your home with Staunton Semi-Trimmed Wallpaper. You will find in this famous line an exceptionally wide range of patterns and color-treatments to choose from. It affords a wonderful scope for the expression of your personality—your taste—your ideas, on your walls. More than that, Staunton Semi-Trimmed Wallpaper means a far quicker and more economical job than you could have done with any other paper.

Your dealer will show you this famous line.

Togo Assaults Information Bureau And Is Repelled With Heavy Losses

LETTERS OF A JAPANESE SCHOOLBOY
By Wallace Irwin

To Editor Hon. Colonist, who undoubtedly know less about several things than his Printer.

Dear Sir:—

What do you know now, if anything?

Yesterday morning a Mrs. C. W. Quackmire, my sweetheart's keeper, arrived to Hon. Kitchen with following remark:

"Togo," she said so hurriedly, "my cousin Petunia Jones are going to be married and should know better at her age."

"At what age do you commence to learn?" I ask to know with statistics in my throat.

"That are neither hither nor thither," she begrudge. "What I require of you are silence of the most righting kind, and please do this chore with immediate quickness. Elope speedily to Grand Union Station where they are a Information Bureau. Walk forward to Mr. Information (or Miss Information as the case may be) and require in intellectual voice, 'Dear Sir & Madam, when do next train start for Hallaluya Junction, where is it, if anywhere, and how much money can I save if I get off at Boyie's Cross Section & look a trolley from there? If so, what in the world will I do with my baggage?' Run suddenly, Togo, for I have scarcely time to scratch my name off a 2nd handed wedding present & press my ceremonial hat."

A Simple Job For Togo

Mr. Editor, because I am a great traveler, acquainted with all RR stations from Rock of Gibraltar to Billsum, India, you can imagine what very young child-play this work would be for me! Think of me who, with nothing but a taxicab to help, have discovered six (6) very rare temples on the Island of Java—unagine what a snap of ease it must be to find one (1) slightly small town in America! Too-poo I say that narrowly through my ears.

Therefore I set my most public derby slightly on my head & settle forth to Grand Union Station. While on way there I meet my Cousin Nogi, who are not working this week, as usual.

"Where going so fastly?" he require without employment.

"To Information Bureau," I narrate, "where I shall pick out a cheap train for Mrs. C. W. Quackmire, employer."

"How boyish!" he laughter. "You remember that date in Tahiti when we were obliged to talk French to a Chinaman while driving a Ford?"

"I have no time for memories," I did.

But what shall Nogi do but go along because Satan has mischief still for Idiot Hands to do.

Pretty soon we arrive to Grand Union Station where all America seem to be moving somewhere with suitcase. Great size of that room like outdoors has been fenced in with benches all over it. At far away distance I could observe a enlarged quotation in gold which say distinctively

INFORMATION. 201 ladies, most of them very wide across, stood clustered around that making question marks with their hands. But because Duty make us brave (Shakespeare) I plunge right into that with diving elbows peculiar to Anit Kellerman.

Mr. Information Asks Questions

"While stuck in that mob with a stumbluck crushed between several angry corsets I hear female sounds which look to my ears like this: '7:65 Oshkosh Flyer . . . why do the Show Girl Express start without my Mary Jane? . . . can I send my grandmother, age 90, on the 2:32 on a milk diet? . . . do the Barber's

ter at her age?"

"If there was a agelimit to foolishness," gubble Hon. Info, "there wouldn't be no Information Bureau. In what State are this Hallaluya Junction you mention so candidly?"

"There you go again, asking questions!" I gub.

"Yet if I select a town for you I must know what State," he acknowledge.

Pick Out Cheap Hallaluya Junction

"What States have you this morning?" I ask it, thinking suddenly.

"Speaking from the alphabet," he commence while telling 6 fatty ladies they mustn't cry until the lecture is

over, "we have Arizona, Alabama, Boston, Bridgeport, California, Colorado, Canada, Dakota, Delaware—"

"That will be sufficiently, thank you," I bludge. "Which one of those States contain this town Hallaluya Junction?"

"There are 9 Hallaluya Junctions in all of them except Alabama & Dakota which have 13."

"Which one of these has got a municipality labelled Boyie's Cross Section?" I derive like Sherlock Holmes.

"All of them has 4 except others which has 42," he spurge. "Supposing while others wait you elope home to Mrs. C. W. Quackmire and make her buy a geography."

"By time I could do that," I scorn. "Cousin Petunia Jones might get a divorce. No Sir & Madam! I shall stay here and find out. I tell you what I shall do. Kindly inform me what Hallaluya Junction are cheapest ride from here?"

"We got a nice one right across the River," he divulge while reading wisdom from a book full of arithmatick

"You Are Information, Are Not?" I Ask Hottily.

Special arrive on daylight shaving time? . . . & etc., & etc., &."

Pretty soon I was injured twice while striking that Information Desk while steamed gentlemen resembling Hon. Bert Hoover in RR soldier clothes poke his face at me and require following:

"What you wish, if anything?"

"You are information, are not?" I ask it hottily. "Then why you commence by shooting me with a question?"

"How could I read your mind standing here?" he manipulate from weariness.

"That are Question No 2 already," I narrate. "Now for revenge I shall

ter at her age."

"If there was a agelimit to foolishness," gubble Hon. Info, "there wouldn't be no Information Bureau. In what State are this Hallaluya Junction you mention so candidly?"

"There you go again, asking questions!" I gub.

"Yet if I select a town for you I must know what State," he acknowledge.

Pick Out Cheap Hallaluya Junction

"What States have you this morning?" I ask it, thinking suddenly.

"Speaking from the alphabet," he commence while telling 6 fatty ladies they mustn't cry until the lecture is

& names. "I am sure she would admire this town. It have the largest emotion picture house in the state. Price to get there are 38&4 c. exclusive of upper berth which are all sold out. Train leave at 11:48 p.m. & she change cars at Billhurst, Frog's Landing & all points East. This train have no diner, Pullman car or anything except a engine & conductor. Therefore Mrs. Quackmire will not be worried on her journey. Anything else you wish to know?"

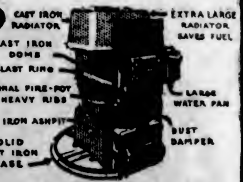

Attacked by 110 Brutal Ladies

While I stood their strangling 3 enlarged ladies make football on my kneecap and want to know how they can

"ROYAL HOUSEHOLD"

SCOTCH WHISKY

BY APPOINTMENT

BY APPOINTMENT

SAME AS REGULARLY SUPPLIED TO THE ROYAL CELLARS

The superior high-grade quality of "Royal Household" is guaranteed by the fact that JAMES BUCHANAN & Co., Ltd., hold the largest stocks of old matured and choice Scotch Whiskies.

To maintain a world-wide trade and to guarantee unvarying quality large stocks are absolutely essential: the position of JAMES BUCHANAN & Co., Ltd., is unrivalled.

JAMES BUCHANAN & CO. LIMITED, 26, Holborn, London

This advertisement is not published or displayed by the Liquor Control Board or by the Government of British Columbia.

lose their train amidst so much of my talk. Yet I clung to counter with eager knuckles and could not let go for such persons.

"Mr. Knowledge," I apply deeply. "Supposing Mrs. C. W. Quackmire do not disapprove Boyie's Cross Section while going there & how could she check her trunk so it would take a trolley ride with her? If so, how much money would she save?"

"I are helpless to tell you," he says so like cats.

"How so you reply like that?" I reing. "Are you not a Information Bureau?"

"I are," he vampire. "But I are not a Puzzle Editor."

"But I ask to know—"

Before I could start this new intelligence one big lady of Irish Republican Party stroked me on the kneecap while omitting these rage words:

"I have been standing here nineteen (19) minutes listening to those foolly words when all I want to know are How can I catch the 10:47 train for Chicago when it has been gone 1/2 a hour?"

I struggle some more, but could do nothing then. 110 brutal ladies had poured their elbows all over me so it could be no use.

So I go back where Cousin Nogi stand there doing nothing as usually.

A Night I. D. from Nogi

"What you find out?" he report cheerly.

"If I should tell you," I gubble. "You would swallow your own brain attempting to understand it. In future when I wish to get confused I shall come to this Information Bureau & do so."

"I think I shall start a Information Bureau until I can obtain another job of servant girl," narrate Nogi.

"Shall you tell persons about railroads so that they will know even less than now?" I did like a cannibal.

"Not exactly," he peruse. "I shall start a Bureau for Gen. Intelligence so to ask questions what everybody require to know."

"Such as?" This from me.

"I shall answer queries like these: What Will Germany do with Dawes Reparation if they don't understand it no better than America? Now that Hon. Priests of Wales have visited America will he ask America back to visit him? If Hon. Davis & Hon. Coolidge have got all the Presidential tickets must Hon. La Follette purchase his from a scalper? If it take 6 aviators six (6) months to get around

the World how long would it take one (1) automobile to get around the 18th Amendment?"

"Since you are dishing up such much information," I al & crone, "kindly told me one very small question."

"1900," he say for sweetly smiling.

"What should I say to Mrs. C. W. Quackmire when I get home and she ask to know what happen to Hallaluya Junction train?"

"Tell her it are 3 hours late," he report. "When saying this you are sure to be right."

Nogi have some bright I De al-

though usually quite brainless. Hoping you are the same . . . Yours truly

New Arctic Lore Gleaned in Trip To Icy Greenland

Ancient Eskimo Culture Wins Respect of MacMillan Scientists—Tribal Customs Same as in Bygone Times—Men Have Several Wives—Three Spouses Are Mark of Superiority

HELL OF ARCTIC NATIVES IS LOCATED IN HEAVENS

(Copyright, 1924, in U.S., Canada and Great Britain, by North American Newspaper Alliance. All rights reserved.)

WISCASSETT, Maine, Oct. 4.—When the little schooner Bowdoin landed here a week ago, after being locked in the ice 333 days North of Greenland, she brought home not only a thrilling story of Arctic adventure, but an invaluable contribution to the scientific knowledge of the Far North.

Dr. Donald B. MacMillan, of Freeport, Maine, seasoned explorer who was with Peary on the discovery of the North Pole, covered anthropology, botany, geology, ethnology and ornithology in researches which covered more than a year, exclusive of the time taken to go and return to Refuge Harbor, North Greenland. He made intensive studies and brought back a vast accumulation of notes and pictures. Observations and research in terrestrial magnetism

becomes proficient in breaking evil spells and driving away malignant spirits. Eskimo priestcraft is concerned almost entirely with propitiating, or circumventing, evil spirits.

"When I have questioned the Eskimos regarding prayer to their good spirits, they have been astonished. They have asked me naively why it should be necessary to ask a good spirit to render any special favor. It was to be assumed

usually determined by the man's skill as a hunter. To have three wives is a mark of superiority. A youth asks the consent of the parents of his prospective bride, usually accompanying it with a gift. Consent

the two continents, seem to me to go a long way to substantiation of the land bridge theory.

"My head measurements of the Eskimos show that they are neither dolichocephalic or brachiocephalic. They are mesocephalic, or half way between the round-headed and long-headed types.

Tribe Increases
"For some reason, I found several cases of tuberculosis completed on this trip, although they are unusually free from other diseases. I took a census of the Smith Sound tribe and found they had increased from 215 to 275 since my last trip. As they eat raw or frozen meat, there is no scurvy among them. This diet was our own protection and we learned to like it.

"We shot walrus, seals, musk oxen, elder ducks, narwhal and various kinds of edible birds, including puffins. The puffin closely resembles a duck, with the exception of its gaudy parrot beak. This beak is to me one of the most interesting instances of Far Northern adaptation. Years ago I was puzzled in seeking the survival value of a parrot beak on a duck, but I found the answer when I discovered that puffins dig holes and live in them. As there is no material on the barren rocky islands for nest building, the puffin developed the formidable beak as a digging tool. They are extremely gregarious birds, often appropriating an island, where they sit in solemn conclave much like penguins.

Russia Slowly Winning In Fight on Malaria

MOSCOW, Oct. 4.—The International Malaria Commission of the League of Nations, which has been visiting Russia to investigate the malaria epidemic, has completed its work and approved generally the effects of the Russians to combat the disease.

One of the commissioners said recently that the epidemic seems to have passed in most of the affected areas, but there are a number of localities where it prevails, due to the shortage of quinine.

One of Donald B. MacMillan's Eskimos With a Newly Captured White Wolf

The Bowdoin's Steel Motorboat Crushed in the Ice

and atmospheric electricity were made by Richard Goddard, of the Carnegie Institution. A knockdown frame house was taken North and reassembled on the ice, to house Goddard's instruments. He made eight months' continuous records, with the most complete apparatus ever taken into the North. It is hoped that these records, when checked with other observations, and formulated by scientists at Washington, will throw light on puzzling phenomena of compass declination, "internal and external" terrestrial magnetism, the effect of atmospheric electricity on radio and other subjects. Careful and minute meteorological studies also were made.

Thinks Eskimos Progress

"The more I see of the Eskimos, the more I become convinced that their ancient culture merits the closest scientific study we can give it," said Dr. MacMillan. "I have observed them closely with a view to detecting factors of recessive heredity, and I am convinced that they are on the upgrade. Their chief contact with the outside world is through the Danes, who are showing high intelligence in allowing them to maintain their own technique of living and protecting them against debasing influences. They have such astonishing skill in wrestling their living from the wilderness that if they get supplies of wood and ammunition they are sure to win. These supplies the Danes are giving them, to the best of their ability, and I noted general prosperity and happiness among them.

"The Danes are pursuing what I believe to be a wise policy in interfering to the least possible degree with the old Eskimo culture. Their tribal customs, domestic regime, religion and general ethnic culture remain as they must have been thousands of years ago.

Eskimo Theology

"The Eskimo tribe is a loose organization, based not upon force, but upon general consent and belief. While they have no authoritative head, the Angkok, or priest, assumes a position of great prestige. Just as the clergymen in our evangelistic churches, he attains leadership through answering what we are accustomed to term the call. In response to a vision, or a voice, he gradually assumes the position of spokesman for the benign spirits and

that the good spirits were doing all in their power anyway. They conceived evil as a reality to be combated, and, in facing the dilemma compelling a choice between a benevolent or malignant ruling agency, they had chosen the former, but had been compelled to assume that he was not omnipotent. It was to me an interesting parallel of some of our own more sophisticated, but per-

of the girl is the only marriage ceremony. There is little or no secret promiscuity among them. The young folks generally start housekeeping with the bride's parents. The wife's sister is often taken in as a servant, or as a second wife. Children are tenderly loved and doted for. Sometimes, when there is competition for a girl, it is settled by a wrestling match. The best man wins.

Members of the MacMillan North Greenland Expedition, which has returned to Wiscasset, Maine, with a freshly killed walrus. Fresh walrus meat was one of the most highly prized articles of diet, when the Bowdoin's crew was locked for 333 days in the Arctic.

haps not more conclusive theological speculations.

"From the time of the discovery of Labrador, probably early in the sixteenth century, missionaries from various countries made determined assaults on the ancient Eskimo domestic customs and superstitions, but without success. The Eskimos kept placidly on their way with their old arrangements. It is so today.

Best Men Win

"Girls of twelve to fourteen years are married to men of twenty-five or even fifty. They may have one, two, or three wives, occasionally trading wives. They get along pleasantly in this way. The number of wives is

"The Eskimos have a very clear, definite and unquestioning belief in an immortal soul. They reverse our ideas of the prospective dwelling places of the righteous and the wicked. Their hell is in the heavens—it seems quite natural when you see an Arctic blizzard bearing down upon you—and their heaven is in the warm, sheltering earth. An Eskimo must always die in the open—never in the tupik or igloo. It is regarded as a disaster when this happens. At the point of death, he is taken out and left in a snow house, with the roof open for the soul to pass through. After death, he is warmly dressed and placed in the open, according to the slant and direction of the hillside, with food about him. Then a rock tomb is built about him, care being taken that it does not touch the body.

After Life Happier

"They conceive the after life to be much more pleasant than this one, with much to be learned and much achieved, but with plentiful food. At the feet of a woman, they place her drying rack, needle and soap stone utensils.

"The Angkok has quite an elaborate ritual in breaking the spell of Torngak, the most formidable evil spirit. He is proficient in the use of amulets, and the foot of the sea pigskin, which is believed to be especially efficacious. He makes use of the drum, using it to accompany his frightful yells and exclamations. I have brought one of the Angkok's drums with me.

"I believe there is no question of the Eskimos being of Mongolian derivation. Their long tremes, short legs, slant eyes and other revealing physical characteristics seem to me to prove it beyond a doubt. Incidentally, this fact, combined with similarities of flora and fauna between

Japanese Inspired To Explore Mongolia's Unknown Lands

TOKIO, Oct. 4.—Tanemichi Kiyoura, son of Viscount Kido Kiyoura, former Premier, will lead a party of Japanese explorers and scientists into Mongolia next Spring, according to plans recently announced. The purpose of the enterprise is to increase Japanese knowledge of Mongolia and to link that large and undeveloped territory more closely culturally and economically with Japan.

The scientific researches in Mongolia by the Third Asiatic Expedition of the American Museum of Natural History, under Roy Chapman Andrews, has been an incentive to Japanese exploration in that region.

Island May Be Deserted By All Its Inhabitants

MANILLA, Oct. 4.—The entire population of Rubuyan Island, one of the Philippine group which is about 100 miles north of Luzon, may be transferred to another island nearer the coast of Luzon. An active volcano has driven the 250 inhabitants from their homes down to the water's edge, and frequently they are compelled to take to their canoes to escape the showers of rocks and the lava which stream down the mountain side.

An American Red Cross investigator who is on his way to the island with relief supplies will ascertain if the inhabitants want to move to another island where agricultural conditions are better. If the people are willing to move the Red Cross will assist them in establishing homes on another island.

Bowdoin's Crew in Desperation When Floes Clutch Ship

Food and Fuel Almost Exhausted and Failure of MacMillan Party Seemed Certain at One Juncture—Sawed Way Through Ice and Survived Fearful Storm After Regaining Freedom

UNIQUE CONSTRUCTION OF SCHOONER PREVENTED LOSS

WISCASSETT, Maine, Oct. 4.—(Copyright)—The eighty-nine-foot Bowdoin was subjected to battering by ice floes and gales which probably no other ship of her size could have withstood. She went on the rocks in Refuge Harbor, August 31, when MacMillan made his first unsuccessful attempt to start home. It was found that the anchor was locked under the ice, far to the starboard side, and it was necessary to saw through the ice and clear a space so the ship could be brought to a position above the anchor. The ship was then warped, to the shore where the radiation from the rocks had left a narrow strip of open water. But when she was brought to this position she was thrown on the rocks by the gale.

With food and fuel supplies almost exhausted, the members of the Expedition thought they were doomed to another year in the North, with the chances of survival more than doubtful. However, with the rising tide and the use of mast-head tackles they were later able to float her. When they reached the outlet of the bottle-necked harbor, they found their way blocked by a bar of ice suddenly awning in ahead of them, which they estimated to weigh 10,000,000 pounds. Hours of sawing

and plunging by the Bowdoin brought them through. Her decks were littered with howling dogs and crying Eskimo babies and women whom they were taking to Etah. As soon as they were clear they were pounced by a heavy gale, but fought their way through.

The vessel is of unique construction, all curves and overhang, to prevent the ice from clutching her. Stout Maine oak timber, and a ten-ton cement overlay on her bottom, saved the Bowdoin, MacMillan and his crew.

Wool Plentiful in Australia

SYDNEY, Australia, Oct. 4.—With a clip estimated at 3,150,000 bales of wool, a record figure due to an excellent season, the Australian Woolgrowers' Council and the National Council of Woolselling Brokers of Australia have devised means for disposition of the product. With sales held in Brisbane, Sydney, Melbourne, Adelaide and Perth, to be attended by purchasers from all over the world, it is expected that 2,000,000 bales will be offered by Christmas time.

LONDON BUYING AUSTRALIAN GEMS

QUEENSLAND SAPPHIRES FIND PROFITABLE MARKET

Miners Unable to Sell Except to Official Government Purchasers—First Discovered in '76

LONDON, Oct. 4.—Large quantities of Queensland sapphires from the newly discovered mines of Queensland are offered on London market. The stones, which are extraordinarily large and clear, are the first to be mined in the new district, under Government operation, and are being sold by the Government representatives in London, also an innovation.

The sapphire marketing by the Government is the first attempt of the Australian Provincial Governments to carry out the scheme for wider government operation of resources and marketing of products. Before the war the sapphire industry in Australia was largely in the hands of Germans, whose representatives bought on the fields and sent their purchases direct

to factories in Germany. As a result of post-war legislation which keeps foreigners, especially Germans, out of Australia, the Queensland Government took control of the industry.

Legislation has been enacted which prevents independent miners from selling their product to any except the official Government buyers, who assess the parcels and pay the miners fixed prices according to the established methods of grading. The experiment is said to have proved successful for the miners as well as the Government. The miners have an immediate market and are given a far higher price than formerly.

The production of Australian sapphires diminishes yearly in spite of the opening of new mines. The annual production is now less than one-eighth of the world's output, while before the war it was about one-fifth.

Sapphires were first discovered in Queensland in 1876 and for a number of years there were only a few men engaged in the industry. Now there are about 450 miners. The mining is done mostly along the creeks and rivers and consists only of surface work, the men digging holes 50 to 60 feet deep and boring in various directions from the main shaft.

WORLD YIELD OF WHEAT IS LOWER

NORTHERN COUNTRIES TO PRODUCE 2,700,000,000 BUSHELS

Canadian Crop Improves During September—German and Russian Production Less Than Last Year

WASHINGTON, Oct. 4.—The probable production of wheat in the Northern Hemisphere, outside of Russia, will be about 2,700,000,000 bushels compared with 3,000,000,000 bushels produced last year, says the United States Department of Agriculture, basing its statement on official estimates and forecasts from twenty-five countries, and unofficial advice from three countries. Wheat harvests in the Northern Hemisphere are reported to be practically completed.

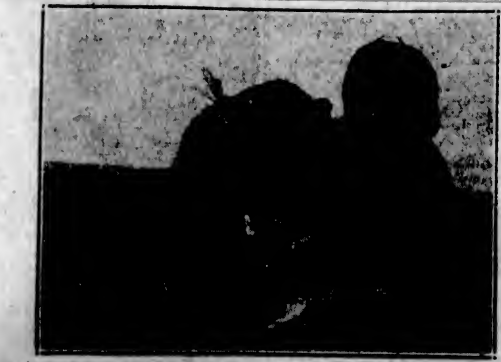

Figures for the twenty-five countries, which include France, Germany, Rumania and Russia, show an aggregate of 2,342,000,000 bushels compared with 2,500,000,000 bushels last year. No reliable estimate of the Russian crop is available, but various reports indicate that the exportable surplus will be less than last year. Private forecasts of the French crop range from 265,000,000 bushels to 312,000,000 bushels, as compared with 274,000,000 bushels last year.

The German crop, estimated on the basis of forecasts from Prussia and Bavaria, is about 92,000,000 bushels compared with 106,000,000 bushels last year, and the Rumanian crop according to private reports will be about 70 per cent of last year, when the harvest was 101,000,000 bushels.

The Canadian crop has improved during the past month under favorable weather conditions, the department reports. The September 1 forecast in 191,000,000 bushels, which is an increase of 9,000,000 bushels over the August forecast, but 182,000,000 bushels less than the final estimate of last year. Harvesting in the Prairie Provinces is about two weeks late and there is still some chance of gain or loss in the crop. Rains during August improved conditions generally, but in Alberta rain was too late to save the crop where drought injury was severe. Some damage has been caused by frost but its extent has not yet been determined. Grain yields in Manitoba are reported as considerably above the average, but due to the late season the area to be harvested is less than last year. Yields in Saskatchewan and Alberta are considerably below average.

Production of flaxseed in Canada is reported to be 10,846,000 bushels compared with 11,950,000 bushels last year; rye, 12,795,000 bushels compared with 23,232,000 bushels; barley, 90,769,000 bushels, compared with 74,994,000 bushels, and oats, 463,650,000 bushels, compared with 543,998,000 bushels last year.

Moist estimates have lower death and sickness rates than dry ones.

Here is an Eskimo with his pet baby seal pup. The picture was taken by the MacMillan North Greenland Expedition, which has returned to Wiscasset, Maine, after a fifteen months' voyage in the Arctic.

Woman Will Brave Perils of Africa in Quest of Adventure

Delia Akeley Braves Savages and Beasts for Third Time to Gather Museum Specimens and Satisfy Her Curiosity on Child Life of Native Races of Dark Continent

TELLS OF BRINGING DOWN CHARGING BULL ELEPHANT

(Copyright, 1924, in U.S., Canada and Great Britain by North American Newspaper Alliance. All rights reserved.)

(By Harold W. Belcher)

MRS. DELIA J. AKELEY, venturing alone across the heart of Africa, will act as special correspondent of The Colonist, through a special arrangement made by this paper and the North American Newspaper Alliance. It will take her approximately a year to traverse the route she has laid out and to pursue her studies of native and animal life. She will arrive on the East Coast of Africa next month and will immediately organize her train of natives for the long journey.

For the first time in history a woman will venture across Africa accompanied by a white man. She is Mrs. Delia J. Akeley, explorer and big game hunter, who is making her third visit to the Dark Continent. She left New York in September, due at Mombasa, on the coast of British East Africa, in November. There she will outfit a safari or caravan of fifty natives, and proceed up the Tana River to the great body of water called Victoria Nyanza, finally reaching the Congo and emerging on the Atlantic Coast, she hopes, a year later.

Mrs. Akeley holds a commission from the Brooklyn Museum of Art and Science to procure specimens of game for mounting. Her real purpose is to study native baby life, and she proposes to live in native villages with native women.

She will also act as correspondent of The Colonist and of the North American Newspaper Alliance.

White haired, very feminine, with all the characteristics of the gently reared average woman of American life, she tells in modulated tones of nerve-racking trek and adventures in the African jungles where she has braved death in a thousand forms. It was Mrs. Akeley and Carl Akeley who visited the White House some years ago and so thrilled Theodore Roosevelt that he left for the land of big game a few months later. It was Mrs. Akeley, with only three birds to her credit as a marksman, who shot a charging bull elephant and dropped him six feet from where she stood. It was she who wounded a lion from the shelter of a thorn bush and lay there all night while the beast's mates made every hour more hideous with their howls. It was Mrs. Akeley who led a tribe of rebellious negroes through swamps and forests and cut short an attempt to end her life by changing the mood of natives in mid-air at the chariot of her enemies.

Hider Haggard's Alan Helps

I talked to her in London, where she was met by C. J. Cunningham, upon whose personality and experience Hider Haggard, the novelist, built his character Alan Quartermain. Mr. Cunningham, who once escorted her to the 17,000-foot peak of Mt. Kenya, advised her on her present route and equipment.

At Mombasa she will send into the bush for negroes. As she reaches the territory of new tribes she will have to change leaders. New the East coast she expects trouble, but as she proceeds into the comparatively barbaric hinterland she believes her career will minimize.

Her first danger, she believes, will

A barber shop in the middle of Africa. The natives set great store on the formalities of hair dressing.

come from the natives themselves, including the powerful medicine men. An uncorrupted woman never before has ventured beyond African civilization. The half-civilized negroes of the coast have yet to learn to obey white women in the absence of white men.

Mrs. Akeley will carry an army revolver and will sleep with a rifle handy. For immediate protection she hopes to pick up in Mombasa two black boys whom she trained some years ago. They would give up their lives, she believes, before letting harm come her way.

Chiefly, however, Mrs. Akeley will depend on her woman's wit and resourcefulness. She says natives can be turned from harmlessness by ridicule and mimicry.

As she penetrates into Uganda, some 350 miles from the East coast, Mrs. Akeley will encounter natives unused to white men and more harmless in character. The desire to kill will be more strong, she says, but the wish to attack a woman because she is a woman will be more rare. Here she hopes to study them in their own villages, something no white woman has ever done before.

They Spare the Rod

The world has much to learn from the natives of wild Africa, Mrs. Akeley declares. The problem of childbirth, for instance—no problem at all next to nature. Native children are seldom ill. Natives seldom punish their children; childing seems enough. Native women never kiss their babies. Monkey mothers do. Mrs. Akeley proposes, incidentally, to study monkey mothers as carefully as she does native women. The primitive, she believes, has much to teach civilized members of her sex. Living with native women in native villages, Mrs. Akeley admits, will be a trial. The African is dirty.

Novel objects delight him and with this in mind, Mrs. Akeley is taking with her a variety of simple implements—knives, and so forth. A safety razor blade, for use at the end of a stick, is worth a week's board.

"I shall take cameras, including a small motion picture outfit," said Mrs. Akeley. "I plan to get as far away from civilization as possible. On a former trip I was the first white woman to go among the Wakikuyu, near the shores of Victoria Nyanza, and now I am eager to ascertain what changes have taken place among them since 1905."

"That year I was obtaining native implements, or so-called curios, for

fell facing me, and as the moon persisted in staying behind a cloud it was impossible for me to see well enough to make a vital hit.

"So there I was, sitting behind some thorn branches, with my two black boys beside me asleep and snoring. And only twelve paces away (we measured the distance in the morning) the lion roared and whined. Every time he roared his breath came to my face, and as the hours passed two of his mates joined him. They amplified the chorus and kept me on a wreck when it got light enough to shoot the lion, and he was the largest I had ever seen."

"Another time—this was in Uganda—I spent four hours up a tree watching a herd of 300 elephants. They would move about, stand under trees in little groups and prod each other with their tusks, while the mother elephants fondled their children in an loving way as a human mother might."

"Incidentally, there is a scientific theory that elephants never lie down. I know of four that did in the three

years I spent in Africa. Three of them I watched for a time. Two were lying under a tree, one keeping perfectly still while the other piled earth on his side with his trunk, sloping its way into the cloud of dust off. This he did for four hours and still was at it when I left."

"The third elephant of this party I shot. He now stands in the Field Museum. He must have been lying down for hours when we came up, as there was a perfect imprint of the whole body, trunk and legs, in the flattened vegetation."

"After I shot him we performed a post mortem and found a bent and blackened blade four inches long lying in its way into the body. In his stomach we found five or six stones of around two pounds weight each."

"I made a table as a trophy of my biggest elephant—a single ear, six feet seven inches from tip to bottom. Eight persons can sit around it. This elephant had what one would call big feet, for the sole had a circumference of 6 1/2 inches."

Elephant Gets Her Wind

"There is quite a story attached to the killing of this animal. It was in Uganda and we were on our way down to East Africa for a lion hunt when we noticed a spoor. One can't see an elephant's spoor without turning from one's course and following it. We came up with a herd in two hours, and got within thirty yards of their midday rest under some big trees."

"I chose a big, hairy elephant with large, wide-spaced tusks and put two bullets just below one of his eyes. He went down and we waited to see if one of his fellows would help him up, but they made off."

"Then to our amazement, the wounded elephant sprang to his feet and ran on. Following, we were making ready for a shot when he got our wind. Then, with wild screams of rage (the most horrible in the world, sounding like forty factory sirens blowing at once) he charged us. Our shots stopped him and we went after him again."

"A clip jammed in my rifle as I was reloading. I fell behind my companion and, to make matters worse, the latter's boy was slow in appearing with the second gun. Just as I gave up for lost my companion fired, down the elephant for the third and last time. My tent boy was in the beast's path and escaped by a miracle. It was a narrow escape for all."

"I was so exhausted that I sat down where I stood. My legs went back on me and when my companion called me to come and see the biggest elephant ever I could only cry, 'Bother your big elephant. I want to go home and keep house!'"

But Mrs. Akeley does not feel that way now. She says: "I would rather meet death in Africa than live in civilization. Life here is so humdrum. Africa gets one after a time. I cannot explain it. You will have to go there to find out for yourself. Mr. Roosevelt loved Africa. He would have gone back many times had he lived."

Route Goes Through Pym's Land

By starting through Africa in No-

vel objects delight him and with this in mind, Mrs. Akeley is taking with her a variety of simple implements—knives, and so forth. A safety razor blade, for use at the end of a stick, is worth a week's board.

"I shall take cameras, including a small motion picture outfit," said Mrs. Akeley. "I plan to get as far away from civilization as possible. Ridicule Her Weapon in Africa, But She Totes Gun

Delia Akeley, who is going into Africa alone—the first white woman ever to undertake such a journey—carries an army revolver and sleeps with a rifle near her pillow when she is among the natives, but her woman's wit has discovered even a stronger weapon. It is mimicry. No native can stand being ridiculed, she says, and more than once she has turned this to her own good when trouble was brewing.

There was a journey on one of her former visits to Africa—a journey on which she was accompanied by other whites. She had to make a quick dash, alone, carrying medical relief.

Part of the way was through a bit of swampy jungle which the natives regarded as taboo. They refused at first to go, saying evil spirits would kill them all. Mrs. Akeley was alone and at her wit's end. Then she tried an experiment. She made fun of the ring leader. She mimicked them, showed them how they jumped at the rustle of a leaf, or at the call of a bird. Gradually they were afraid of their own shadows, made faces in pretence of their fear and imitated their every move and gesture. In a few moments the majority of her followers were laughing heartily. Then they, too, began to make fun of a group still sullen. The rebellion faded out.

MANY BRITISH FLYERS KILLED

High Death Rate Among Royal Air Force Members Is Causing Great Alarm in England

HIGHER TECHNICAL KNOWLEDGE IS NEEDED

Machines That Will Not Stall or Else Glide to Safety When Out of Order Are Also Wanted

LONDON, Oct. 4.—Since the beginning of the present year there have been fifty-eight deaths among officers and men of the Royal Air Force directly due to accidents to machines. Considerable anxiety is occasioned by the large number of fatalities to the personnel of the youngest arm of national defence, and the Aeronautical Research Committee is urging that steps be taken immediately to lessen the losses due to lack of technical knowledge among members of the force. All of the experts declare the skill of British pilots cannot be questioned.

The Aeronautical Research Committee last year emphasized the need of a higher standard of technical knowledge in all ranks of the Royal Air Force, and particularly among squadron officers. In this year's report they note with satisfaction that the Air Council agrees with them.

"But a general raising of the standard of technical knowledge," the committee's report declares, "must take time. Meanwhile accidents which, in the view of the committee, are primarily due to the absence of this knowledge, continue to occur. Many machines are destroyed, while in some cases lives are lost. The committee has felt it to be within their province to urge any steps that might reduce such losses."

Aeronautical experts are prompt to suggest, as the real remedy for present defects, that the Royal Air Force be equipped with machines that will not stall, machines which, when they get to the stalling point, will simply glide forward and sink flat.

"To provide the remedy may mean the expenditure of money," said one observer, "but you have either to supply an elementary training machine that is foolproof, or go on with the present method with its loss of life."

Flappers Grow Keen To Join London Police

LONDON, Oct. 4.—English women, aroused by a desire to enlarge the restricted horizon of their activities are rushing pell-mell to Scotland Yard these days in an endeavor to enlist in the Metropolitan Police Force at ninety-four pounds a year of police administration in England.

Their endeavors are a little premature. Nevertheless, they are greatly encouraged by a committee report recommending increase in the number of women "bobbies" at present very small. But Parliament must enact the necessary legislation to provide for a series of old powers, all of which are now in the hands of the Home Office.

All this to the contrary ambitious women, not content with merely writing to Scotland Yard, beside the entrance of the big round-towered building of Whitehall in an attempt to press in person their claims to preferment as members of the police force. All sorts of women are among the bachelors, old, young, middle-aged. Girls with bobbed hair and other gay young fringers are strangely mixed up with grave old pious, all anxious to serve as guardians of John Bull's peace.

Hague Court Favors Albania in Dispute

THE HAGUE, Oct. 4.—The Permanent Court of International Justice today rendered a decision in the dispute between Albania and Yugoslavia over the ownership of the monastery of Saint-Nicolas has been settled in favor of Albania. The dispute was originally placed before the Conference of Ambassadors on December, 1922, which allotted the monastery to Albania, but allowed Yugoslavia to dissent. The ambassadors, being unable to effect a settlement, passed the dispute on to the League of Nations. The question being a legal one, the Court of Justice rendered the verdict for the League.

This constitutes the ninth advisory opinion given by the Court since its first session in July, 1922.

Old Caravans Disappear Before Modern Motors

LONDON, Oct. 4.—A plan to substitute a motor car service over the deserts between Baghdad and Persia and Constantinople and Persia, to take the place of the old caravans, is being undertaken by an English firm. The firm at present is operating a service between Ilfracombe, Devon, and Baghdad.

The trip between Baghdad and Teheran, the capital of Persia, will take three days and the ticket for the trip, including the cost of accommodations and meals, will cost about \$110.

JAPAN'S FIRST AVIATRIX

TOKIO, Oct. 4.—Japan's first aviatrix, Miss Rihgemo Kibe, twenty-two years old, will complete her course of training at the Municipal Aviation School, near Tokio, within a few weeks. She expects to take part this autumn in the aerial competition to be held by the Imperial Aviation Association, and then, according to an agreement recently entered into, she will go to Mukden to join the Japanese team of Manchuria. Miss Kibe's father is a contractor, furnishing supplies to the Manchurian warlord.

Borax was one of the first chemicals that entered into commerce.

In Father's Footsteps

MILLION OUT OF WORK IN BRITAIN

Vast Number of Men and Women Face Fifth Jobless Winter—Permanent Solution Is Remote

SOME INDUSTRIES ARE STILL AFFECTED BY WAR

Settlement of German Reparations Question Regarded as Vital—Unemployment Dole Held Necessary Evil

LONDON, Oct. 4.—Great Britain's army of more than a million jobless people is facing the fifth winter of unemployment. The permanent solution of this post-war problem is as far away as ever in the opinion of economists.

Inasmuch as three different Governments—Coalition, Conservative and Labor—have dealt with the question, still awaits solution. It would appear to the detached observer that the problem is one of after war economics rather than partisan politics.

For five years the unemployment question has been a sort of urghin's joy to whatever political party happened to be in Opposition. In fact it seems to be a problem that is more readily grasped by an Opposition than by a Government.

The Labor Government, not without pride, points to the latest unemployment figures available—1,141,109—as about 120,000 less than for the corresponding figures a year ago. This, however, leaves the minimum at well over a million, where it has been for the past five winters and where, in the view of not a few economists, it is to remain permanently.

Motors & Motoring

Engine Can Help Brake Automobile On a Steep Grade

Automobile Expert Gives Advice on Driving When in Hilly Country—On Gradual Declines the Resistance Offered by Engine When Transmission Is in High Is Sufficient to Brake Car

DO NOT SWITCH OFF THE IGNITION WHEN COASTING

INEXPERIENCED drivers arriving for the first time in hilly regions are prone to think that "putting the car over the road" at a high speed covers all the rules for demonstrating driving ability. Good driving with due regard for engine and brakes, and conducting to long life of the car, means much more, according to Ernest C. Garland, technical manager of a well-known automobile manufacturing concern.

"When a car is pulling steadily uphill, it is natural for the driver to think chiefly of the engine," he explained. "As it tops the summit and begins the steep descent, it is equally natural for him to change his mental picture and think only of the brakes, and he usually transfers his foot from the accelerator to the brake pedal. But, as most drivers know, this is not always good driving. Stopping a car on a ten per cent down grade at a given speed is a greater load upon brakes than stopping on a level at the same speed. Yet, in cars with adequate braking systems, properly adjusted, it is not merely a question of being able to stop. We are talking about good driving, about using our transportation unit with regard to long life and economical maintenance.

What Is Wrong?

"What, then, is wrong in the practice of controlling speed on a steep town grade with brakes only?" "If one had on his farm or at his

Summer home a fifty-foot waterfall over which 4,000 pounds of water passed every minute, the amount of waterpower would certainly justify an attempt to use it. Now, an automobile, descending a ten per cent grade at twenty miles per hour, drops 175 feet every minute. In doing so, one of the weight of a large car, for example, develops over three times as much power as our imaginary waterfall.

"What becomes of this power? A small fraction only is necessary to overcome the friction of the tires on the road and of the axle and wheel bearings. Something must absorb the remainder.

"It is natural to think of the brakes for this purpose; but let us see. One would not expect on a level road to open the throttle, at the same time apply brakes to hold the car speed down to twenty miles per hour, and drive in this manner for a mile or more. Such practice, which anyone would certainly call abuse, would demand no more of the brakes than using them alone to control the car while descending a long, steep grade. "What, then, is the correct method for negotiating such a grade?

Engine as Aid

"Simply to supplement the brakes with the resistance offered by the engine while it is driven by the car, placing the transmission in gear. The engine is thus transformed from a producer of power to an absorber of power.

"Using the motor in this way for braking purposes has become recognized by engineers as a technically correct procedure.

"In using the automobile engine for braking, it should be clear that the faster the engine is driven in relation to the speed of the car, the greater will be the resistance offered. On gradual declines, the resistance offered by the engine when the transmission is in high gear, or direct drive, may be sufficient. On steeper grades it is best to shift into intermediate gear before beginning the descent. On very steep mountain grades, on which one should proceed slowly, it is advisable to shift even into low gear.

"In using the engine to assist the brakes, it is natural to think that it will help still further to switch off the ignition. Inconsistent as the statement may seem, this should not be done. Even when the throttle is 'closed,' enough fuel is admitted to the cylinders to drive the engine at a speed of about 300 revolutions per minute. If this fuel is not burned, it condenses on the cylinder wall and washes off the oil by which the pistons are lubricated. At the same time, the power developed by the burning of this small amount of fuel is insignificant compared with the power absorbed. Switching off the ignition when coasting with the car driving the engine, does not appreciably increase the resistance, and is almost sure to have injurious results, even though the throttle may be closed.

Traveling in High

"In climbing hills, good driving, so far as the car is concerned, is wholly a matter of engine control. There is always a thrill of achievement in taking a difficult hill in high. Sometimes this is a mark of good driving; sometimes otherwise. There is a tendency among Canadian and American drivers to avoid shifting gears. European drivers, who shift gears on what we would call the slightest pretext, find it hard to understand this attitude.

"Some of the highest grade multiple-cylinder engines have a great reserve power and can exert an enormous amount of it without detriment. Even in some of the lighter cars, in which there is a favorable power to weight ratio, good results are also obtained. However, in places where deep sand, mud or steep up grades make excessive demands upon any engine driven in high gear, waiting too long, and allowing the car to lose its momentum before shifting gears may make it necessary to resort to low instead of second gear.

"If drivers will learn these two lessons about driving in hilly regions, to use the engine for braking purposes but not to turn off the switch, and to sense the moment at which to shift into lower gears when climbing, they will be rewarded by better braking service with fewer brake adjustments, and longer life with better performance from the engine."

The prefect of police of Paris is considering a new regulation of traffic that will regulate all automobiles driven into Paris for mere pleasure to leave the congested parts of the town. At present all regulations are disregarded.

WARNING ISSUED TO CARELESS MOTORISTS

Many Show Lack of Care When Near Gasoline, Which Frequently Leads to Disaster

Warning motorists that gasoline is now a greater hazard because it is less feared, the American Automobile Association has issued a bulletin from its national headquarters in Washington, that marks the beginning of a drive on what is termed "contemptuous carelessness."

Because "nothing happens," the bulletin says, the average motorist reaches the hazardous conclusion that "nothing will happen," and as a consequence he lets down on precaution and actually encourages trouble. "Gasoline is much more dangerous to the motorist than it ever was," the A.A.A. paper explains, "for the simple reason that the majority of motorists take undue liberties with it. The story got out that gasoline, is less volatile and from this the motorist seems to be reassured. In conclusion that he can be reckless with gasoline and still be safe."

This explanation is said to dovetail with the experience of the leading insurance companies writing automobile fire coverage. While the companies enjoyed a more profitable year than formerly, it is stated, the losses by fire are still excessive and still far beyond the conception of the average motorist.

"We are out to forestall the sort of carelessness that develops from contempt," said Thomas P. Henry, president of the American Automobile Association. "When a motorist reaches the point where a danger no longer looks like one to him, he has reached the danger line. Knowledge of the facts is the only thing that will keep him on the safe side."

"Investigation of accident causes has developed the fact that many drivers are deliberately careless in the belief that so long as the other fellow has good brakes, it's no business to worry about. This same reasoning—or lack of reasoning—applies particularly to the matter of the gasoline hazard.

"It has come to the attention of the A.A.A. that one motorist actually went so far as to light a match when seated in a sedan in order to read the number of gallons of gas in the tank, as indicated on a measuring rod. Nothing happened, but that is just the trouble. This motorist will be liable for further litigation. And that will be the end."

"A large percentage of automobile mechanics now smoke while working on cars, even when tinkering with carburetors and vacuum tanks. Motorists see this and conclude that gasoline has ceased being dangerous. Because nothing happens they acquire a certain contempt for its known hazards. It isn't long before they apply the straw that breaks the camel's back."

According to the bulletin, the vapor from a gallon of gasoline, when mixed with the right proportion of air, produces a hazard equal to eighty-five pounds of dynamite. Because this vapor does not always develop when gasoline is exposed, it is pointed out, a lot of tricks can be done with the gas tank without any immediate results. What happens, however, is that the full hazard invariably asserts itself when the motorist treats gasoline with the greatest contempt.

GENUINE FORD PARTS MADE OF BEST METALS

All Steels and Metals Are Selected at the Source By Metallurgists—Undergo Severe Tests.

All genuine Ford parts are made of quality steels and metals. These steels and metals are first selected at the source by metallurgists. Next, checked in the rolling. Then inspected at Ford plants.

After these tests, all stress-bearing parts are heat treated to knit closer together the metal's properties. They undergo the most scientific method of heat treatment known to metallurgical science.

The most skilled smiths that ever tempered Sheffield knives were the wildest guessers of accuracy when compared with pyrometer men on electric furnaces at Ford plants.

The difference that this careful heat treatment makes is well proved by recent tests between genuine Ford parts and spurious parts for Ford.

Genuine Ford springs are alloy steel; spurious springs for Ford are carbon steel. Genuine springs sagged only one-eighth of an inch after being pressed down six inches under one and a half ton load. Spurious springs sagged three-quarter inches under the same test.

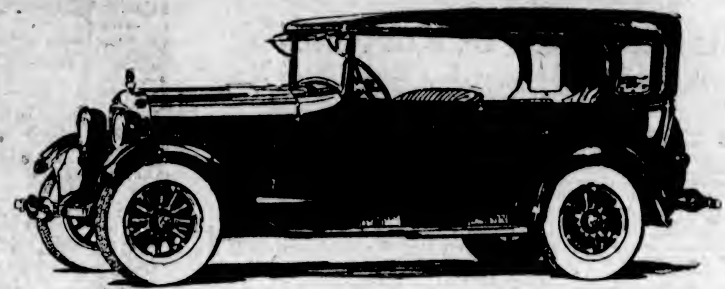

Genuine Ford crank shaft stood twice the torsional pressure of spurious crank shaft for Ford. Genuine crank shaft broke at 42,000 pounds pressure; spurious crank shaft broke at 26,000 pounds pressure.

HIGH POWERED CARS NOW IN BIG DEMAND

Many Automobile Manufacturers Find That Average Motorist Prefers Car With Powerful Motor.

Several automobile manufacturers, producers of motor cars of more than average power, have profited in Central New York State because of winnicks at hill-climbing contests held in that part of the country. These contests have been profitable in that they came through largely increased business, according to reports received by the Paige-Detroit Motor Car Company from dealers through that section.

Jewett automobiles have been constant winners in the various hill-climbing contests since their inception in 1922. This was the same year during which the Jewett was announced to the public. The automobile was advertised and sold as a motor car of great power. The Cen-

Duplex—exclusively Studebaker —a new kind of car!

A closed and open car combined—the advantages of both at an open car price!

Value Points New Big Six

The New Duplex-Phaeton Body—It solves the closed-open car problem.

Genuine Balloon Tires.

New Satin-Lacquer Finish.

Spanish chrome tanned leather upholstery.

New ideas in ease of operation and control.

Vibrationless Engine; forced-feed oiling system with new idea in oil supply. Full 75 h.p. block test.

Four-wheel Hydraulic Brakes optional—totally unlike any other system on American cars.

THE new Studebaker Duplex models give the comfort and protection of a closed car—with all the advantages of an open car, plus the good looks, riding comfort, interior finish and fittings that no open car could ever give!

Yet the price is no higher than that of an open car.

The appeal of its simplicity, convenience and durability is instant and decisive—with a touch of the hand you draw down the four roller enclosures and in thirty seconds your airy open car is a snug, comfortable enclosed car. With equal ease the enclosing sides can be rolled up into the roof and you have an open car again.

The Duplex body is especially built for the roller side enclosures, the roof is framed and shaped in steel—permanently beautiful and steel-strong to support the rollers, and the upper part of the Duplex is integral with the lower part. It is a unit body which harmonizes perfectly in beauty and function.

There is no other body like it on any other car at any price—because it is exclusively a Studebaker creation, made only by Studebaker. You can buy the Duplex from no other maker.

The new Duplex is available for each of the three new Studebaker chassis—the new STANDARD SIX, the SPECIAL SIX and the BIG SIX.

And these three new chassis are the evolution of the famous chassis of the five preceding years. Each year they have been improved and refined.

But this year the new models are climaxed with every tested and proved betterment that experience and science have thus far developed.

They are paramount exemplars of modern automobile design. Simply stated, this means that money cannot buy more modernly perfect automobiles than the new Studebakers—we have the Duplex models ready for your inspection. Come in today!

Front-Wheel Shimmy Puzzles Motor World

Automobile Manufacturers Are Unable to Explain Why Front Wheels Sometimes Vibrate Violently After Hitting Bump—Loose Spring Clips, King Pins and Bushings, Tie Rod Pins and Bushings, and Looseness Elsewhere in Steering Mechanism Common Causes.

A FULL answer to this question is easily worth a million dollars. What causes front wheel shimmy? No one, of course, has made such an offer, but it is conceivable that the automobile manufacturers of the world would be quite willing to chip in for such a prize, if someone came along with a full and satisfying explanation that would meet all conditions.

What is a shimmy? It is a violent vibration of the front wheels from side to side. In its worst form it starts automatically when a bump of a certain size is encountered and quickly builds up to a maximum intensity so that control of the car is disagreeable and difficult.

The tendency of front wheels to shimmy has been greatly aggravated by the use of balloon tires. A full discussion of the known causes is so

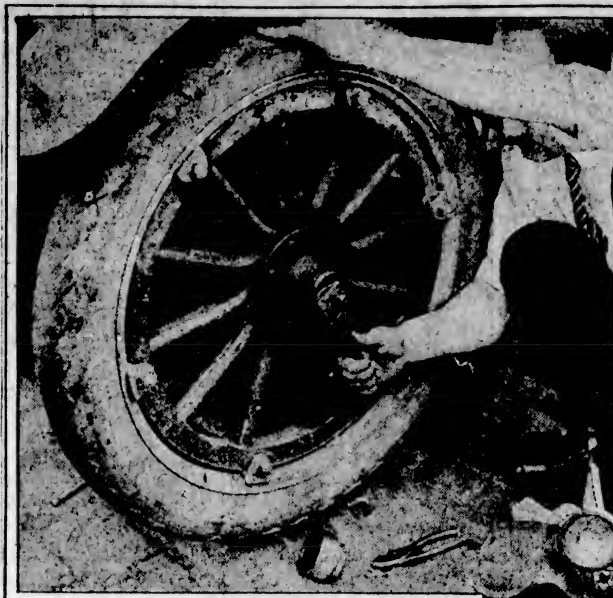

technical that it would be out of place here, but it should be added that while an immense amount of study has been made of this problem, the complete solution has not been obtained.

The most common cause of shimmy is probably loose spring clips, although obviously this is not an engineering problem. However, the point is that if a car that has been running perfectly ever since delivered from the factory suddenly develops a shimmy, the first step is to tighten the spring clip nuts as securely as possible—and then some. Loose king pins and bushings, tie rod pins and bushings and looseness elsewhere in the steering mechanism may also cause shimmying, and so may shifting of the front axle due to loose spring clip nuts. Three badly out of balance due to irregularities in their structure may produce this phenomenon, and a few cases have been reported where over-size tires have given this classic trouble.

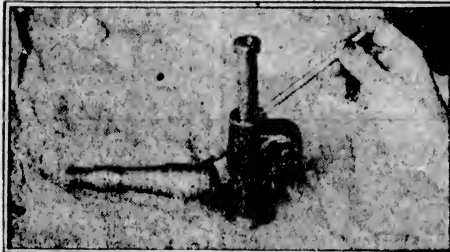

If the axle is bent or incorrectly attached to the springs so that the wheels are out of correct alignment a shimmy may result. This means that the wheels must have the correct amount of toe-in, and that the inclination of the wheels to a vertical plane must be approximately as the designer intended it to be. Finally, if the designer intended the king pins or pivots about which the wheels swing, to be inclined fore and aft, the correct inclination is necessary if shimmy is to be avoided.

However, with all these details in perfect order, some cars still shimmy, and to complicate the matter, two of the same make and model, driven over the same road at the same speed, with the same passengers, may vary greatly in their jazz-dancing ability. And again, a car may run with utter

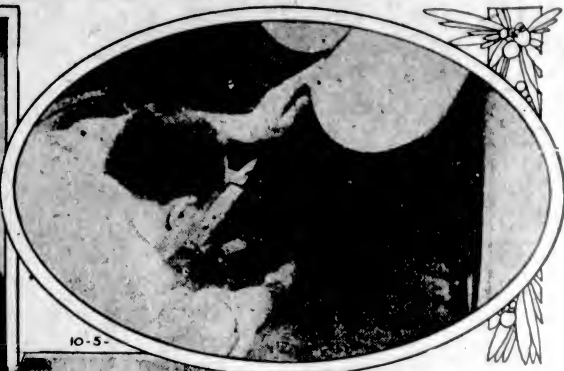

Automobile Engineers Unable to Define Cause for Front-Wheel Shimmy

LOOSE FRONT WHEEL BEARINGS MAY CONTRIBUTE TO SHIMMY.

WORN KING PIN BOLTS AND THEIR BUSHINGS CONTRIBUTE A COMMON CAUSE OF SHIMMY.

SHIMMY IS FREQUENTLY CAUSED BY LOOSE SPRING CLIP NUTS.

NASH MOTORS COMPANY WORKING AT CAPACITY

More Orders on Hand Than Ever Before at This Time of Year, Says General Sales Manager

Indications pointing to a record-breaking volume of sales are seen by E. H. McCarty, general sales manager of the Nash Motors Company, in making public the fact that Nash now has on hand more orders than ever before at this time of year. "Not only does the volume of orders for the new Advanced Six and Special Six series exceed any previous September in the company's history," said Mr. McCarty, "but it also surpasses any single month of the last six months' period of all previous years."

"The reception accorded the new Nash series by the public has been highly gratifying, even exceeding the factory's expectations."

"We have every reason to be optimistic at this time and look forward to excellent business the rest of the year. As far as Nash is concerned, the big season is in full swing and our problem is to supply the demand. The Kenilworth factory is rapidly reaching the point of peak production and it will not be long before that stage has been attained. Our records show that the demand has been increasing constantly since the introduction of the new line and there is no reason to believe that it will not continue for an indefinite period. Consequently we are preparing to respond to the full limit by taking whatever steps may be necessary to increase our production."

"Orders for the Nash Special Six series made at Milwaukee also are exceptionally heavy, but because of the tremendous task of changing the plants over for a six-cylinder product from a four base, the Milwaukee production naturally will be slower to reach its full capacity; operations there, however, are being stepped up to meet heavy demand."

Helen Willis, the national and Olympic tennis champion, was presented an automobile by her friends and admirers. The gift was a testimonial of appreciation for the honors she has brought to California. The car was purchased with voluntary subscriptions.

sedateness with two passengers in the front seat and may St. Vitus all over the road when three passengers are added to the rear seat, and vice versa. Similarly, a car may be a wallflower with three soft and the bells of the ballroom with tires hard, and ditto vice versa.

The engineers of the country naturally are hard after this baffling will-o'-the-wisp—now you see it and now you don't. Just what the final answer will be no one knows, although some engineers are seriously considering reversing the front spring connections as a possible cure. Today front springs are fastened to the frame with a spring bolt in front and a spring shackle in the rear, and they suggest that the shimmy might be eliminated by putting the spring bolt at the rear and the shackle at the front. They claim that shimmy is largely due to the fact that when present front springs are compressed the axle moves to the rear slightly, due to the flattening of the springs, and when the springs are expanded the axle moves toward the front. As

far as the drag link on the steering gear is concerned, this is the same as swaying the steering wheel from side to side. This tendency to jerk the wheels from side to side occurs every time the springs are compressed. The tendency, of course, is slight, but under favorable conditions the effect of successive jerks may be added up and the result is wheel shimmy. By using spring bolts at the rear and the shackles at the front this action can be practically eliminated since the rear end of the drag link may be pivoted on a line with the axle of the spring bolt. (Copyright, 1924, by International Features Service, Inc.)

PAYS MOTORIST TO USE BEST LUBRICANT

Few Car Owners Realize the Loss of Engine Power Which Is Due to Friction

How many motorists realize the loss of engine power which is directly due to friction? And how many appreciate the fact that a motor wastes a lot of its power driving itself?

The automotive engineer recognizes what is known as "friction horsepower"; or, in other words, the amount of engine horsepower which is wasted in its own operation. This friction is consumed in the connecting rod and main bearings, in the timing gears, the cam shaft, the valves, the crank shaft, and the fan. The last item alone consumes about two horsepower, and while most of this is "air friction," the importance of oiling the fan bearing regularly also helps to cut down on the engine's friction, and use of the proper grade of engine oil is, of course, obvious.

One point where engine friction is unusually high and constant is on those surfaces where pistons press against the cylinder walls when traveling downward on the power stroke. Oil that is heavy enough in summer to stand the heat at this point, and oil that is light enough in winter to reach this point when the motor is cold, is the only way the motorist can minimize this variety of friction, except that it would be better for him to drop into "second" when climbing a steep hill rather than force the engine in "high."

An excellent way of measuring roughly the amount of power which the engine consumes in overcoming its own friction is to run it at a speed equivalent to a car speed of about twenty-five miles an hour and then disconnect the spark plug wires from as many cylinders as possible. In the case of a four-cylinder engine it will be found that the power of one cylinder is hardly sufficient to overcome the motor's friction and compression.

Though the third brush of a generator is used to regulate the current output, failure to generate at more than a few amperes is not always due to improper setting of the third brush. In a case in mind, the generator output never exceeded two amperes, regardless of the speed of the engine. Different settings of the third brush failed to remedy the trouble. Investigation showed that the driving clutch permitted the armature to be turned easily in either direction. As the clutch is intended to drive in one direction only, it showed that slippage was taking place. Admittedly, if the clutch is not tight, the winding of the generator portion of the armature should be tested. If there is an open winding, the generator will not deliver its full capacity, regardless of the brush setting or of the engine speed.

The first National Motor Transportation Show in the history of the industry will be held in Chicago, October 21 to 27, at the American Exposition Palace on Lake Shore Drive, a building completed recently by an association which represents the leading truck manufacturers of the country.

RAINY WEATHER HARD ON STORAGE BATTERY

V. McN. Rolfe, Local Willard Distributor, Says It Pays to Keep Top of Battery Clean

Rainy weather is kind of tough on storage batteries, and this is true in the Autumn when there is a great deal of rain and occasionally a frosty night or two.

The battery, tucked away under the floor boards, is in a fine position to get a shower bath of dirty water from road puddles every time the wheels hit one. Eventually the water deposits a film of dirt over the top of the cells which work up between the terminal connections unless they are tight.

"While no serious damage will result from an accumulation of dirt on top of the battery," says Mr. V. McN. Rolfe, Willard dealer here, "the dirt is not doing the battery any good, either. Eventually a blue-green and yellow deposit will form around the terminals and cause starting and lighting trouble, and may even necessitate replacement of the parts effected unless proper care is taken to keep the connections tight, free from corrosion and properly greased."

"Failure to care for these minor details will not prove expensive as far as repair bills are concerned," explains Mr. Rolfe, "but it is well to avoid the annoyance of being caught with an inoperative battery, regardless of how simple and inexpensive it is to fix it again."

Mr. and Mrs. T. P. West and their daughter, Miss Kenora, formerly of Port Huron, Mich., have closed up their residence and will be "at home" for the next five years on the highways of the United States and Canada in their housekeeping automobile. The house on wheels is complete to the smallest detail. The body, which is amply lighted with large windows, is 7 feet 6 inches wide, 14 feet long and 6 feet high. It is equipped with window screens, radio, phonograph, ice box, folding bed, electric lights, rocking chairs, clothes press, kitchen cabinet, stove and stationary washstand. A 16-gallon tank carries water, and an oil heater provides hot water whenever needed.

Something You Can't Enjoy in Other Cars

If you want to drive without being distressed by the clashing, rasping, and uncertainty of the ordinary gear shift, a Chandler is the car for you. For Chandler is the only maker who offers the

Traffic Transmission

(Campbell Patent)

Due to the use of a new and simple principle, this now-famous unit does away with all the shortcomings that stamp the sliding gear transmission as the most backward part of the otherwise up-to-date automobile of today.

Gears Cannot Clash

All its amazing advantages can be told in a single sentence: You cannot clash the gears.

You can change from high to second to low, or from low to second to high under all conditions—without noise or failure.

Down Hills Safely

You can descend mountain-steep grades without riding the brake; for a split-second snap puts you into second gear or low and the motor breaks the car.

The same certain, silent action eliminates fully 75% of the nervous tension in traffic driving.

How You Do It

With all these new results, there is nothing new to learn. You use the clutch and move the gear lever exactly as before. This is one of the reasons why the Traffic Transmission ranks as one of the really great advances in automotive engineering.

Pikes Peak Motor Superb New Bodies

Besides the Traffic Transmission, the 1925 Chandler has many other notable features: The Pikes Peak Motor, full balloon tires as standard equipment, an indestructible rear axle, 4-wheel brakes optional at a slight extra cost, and Fisher bodies of rich and striking beauty.

The New Metropolitan Sedan De Luxe and the new Chummy Sedan in Luxor blue and black are the handsomest bodies that ever graced a famous chassis.

Premier
GASOLINE

When you fill your tank at a Red Ball Pump you get gasoline with *all* the qualities a motor fuel should have—

The most miles per gallon.
Power for the get-away and hills.
Quick-starting in cold weather.

The number of dealers who sell Imperial Premier Gasoline and the number of motorists who buy it, constitute the market for a gallonage greater than that of all other brands combined.

It is this huge output that makes possible a standard of quality which cannot be equalled by any other gasoline on the market.

CHRYSLER EQUIPPED WITH BALLOON TIRES

Thomas Plimley, Ltd., Announces
That Special Six-Ply Balloon Tires
Have Been Adopted

The Chrysler Motor Corporation announces, through Thomas Plimley, Limited, local Maxwell-Chrysler dealer, that it has adopted special six-ply balloon tires as standard equipment on all Chrysler Six models. The size is 30 x 5.77.

"The Chrysler Six is designed for balloon tires from the ground up," Mr. Plimley said yesterday. "But not until tire makers, working in conjunction with its engineers, had designed and perfected a special six-ply cord tire, stronger and more durable than other balloons, would it adopt them."

"The six-ply, high-speed tires now used on the Chrysler are specially designed and constructed to meet the car's higher speed capacity and also to provide the greater resiliency of ordinary balloon types."

"This gives the ideal combination. The Chrysler, with its pivotal steering, its new type of spring construction that eliminates side sway, and its extra wide fenders, is actually built for the adoption of balloons. And the tires, in turn, are built to measure for the Chrysler."

"No other automobile can offer this combination of a chassis designed to take a certain type of tire, and tires designed specifically for a certain car."

"The result is that the Chrysler, with tires 5.77-in. width, drives as easily as though its pavement contact was no more than a narrow line. The design of the steering mechanism accounts for this. The steering pins are inclined to a line that passes through the centre of the tire's contact with the road."

"In addition, the steering spindles turn on ball-thrust bearings. That doesn't mean much until you get in the driver's seat. There you'll find you can turn the wheel with your little finger."

HUPMOBILE ROADSTER A DASHING BEAUTY OF THE ROAD

Never Before Such Fine Riding, Say Owners

The Brougham

It is one thing for a car to deliver great performance; quite another to accomplish it with unexampled economy—as does the Chrysler Six. In addition to a new type of combustion chamber that burns all the gas and a new way of distributing the gas equally to all cylinders—which helps to explain why you get better than 24 miles to the gallon of gasoline—there are numerous engineering advances bearing on economy. Dr. constructive vibration has been eliminated and the engine is protected also by the oil-filter and the air-cleaner—all of which means longer life and lower maintenance costs. Special design six-ply, high-speed balloon tires are standard.

The Chrysler Six

Proven
or through
qualified Chrysler

Driving and riding in the Chrysler Six is an absolutely new experience. Owners will tell you. It is not alone amazing power, speed and dash from an engine only 3-inch bore by 4 3/4-inch stroke that arouse their wonder, or the economy by which these results are obtained.

They are tremendously impressed with the riding and driving qualities for they find the Chrysler Six, by reason of unusually low center of gravity, perfect weight distribution, a new practice of spring suspension and other engineering advances, holds the road as securely as a two-ton car.

They find that it takes a turn at 50 miles an hour with perfect safety and without side-sway; and, thanks to its remarkable driving and riding qualities, they can ride all day without fatigue.

Try the Chrysler Six. Drive it at all speeds over all kinds of roads and experience these things for yourself.

Chrysler and Maxwell dealers are in a position to extend the convenience of time-payments, on a plan that is attractive to the buyer.

THOMAS PLIMLEY, LTD.
Broughton Street at Broad

Closed Car at Open Car Price

The first enclosed car in history ever to sell for an open car price is the newly announced Hudson coach. Mounted on the standard Super-Six chassis, it sells at an identical mark with the Hudson phaeton, a seven-passenger open car.

For two or three years the gap between the cost of an open and an enclosed car has been narrowing. There have been forecasts from time to time that this gap would finally close. Now that day is here.

Since the Fall of 1921, the Hudson Motor Car Co. has specialized on its coaches, a type of body which it created. These coaches have now become seventy-five per cent of Hudson's business, so that all the well-known economies of quantity production may be applied to them. There is more material and more labor in an enclosed car than in an open one, but the larger volume on the coaches makes up this difference.

In the Essex, which it manufactures in the same plant with the Super-Six, Hudson has a coach which

"Chrysler special balloons in combination with Chrysler special chassis design for balloons has served to develop every advantage claimed for the low-pressure tire and at the same time has eliminated every disadvantage."

Half the world's electric light is used in the United States.

QUICK GEAR CHANGE OFTEN A LIFE-SAVER

With Chandler Traffic Transmission
Driver Can Change to Any Gear
Under Any Condition

Further proof of the unusual safety and reliability afforded by the traffic transmission is shown in reports of many Chandler drivers which prove that the ability to change to a lower gear under any conditions is a genuine safeguard against accident.

Among actual experiences of major importance recently reported is that of W. V. Mackay, of Seattle, Wash., who had two narrow escapes from serious accidents on the Portland-Seattle highway.

A day-long rain storm had demoralized the heavy traffic and resulted in about a dozen major accidents in the one afternoon.

Mackay was driving a five-passenger Chandler touring car, loaded to capacity. He reported that upon leaving La Center, and going down a steep, tortuous grade, unprotected and sloping into a deep gully on the right, he caught up to a small car ahead. The driver of this car became confused and, with no apparent reason, suddenly applied his brakes, slowed up, and skidded, coming to a stop across the path of the Chandler, traveling twenty-five miles per hour down the grade.

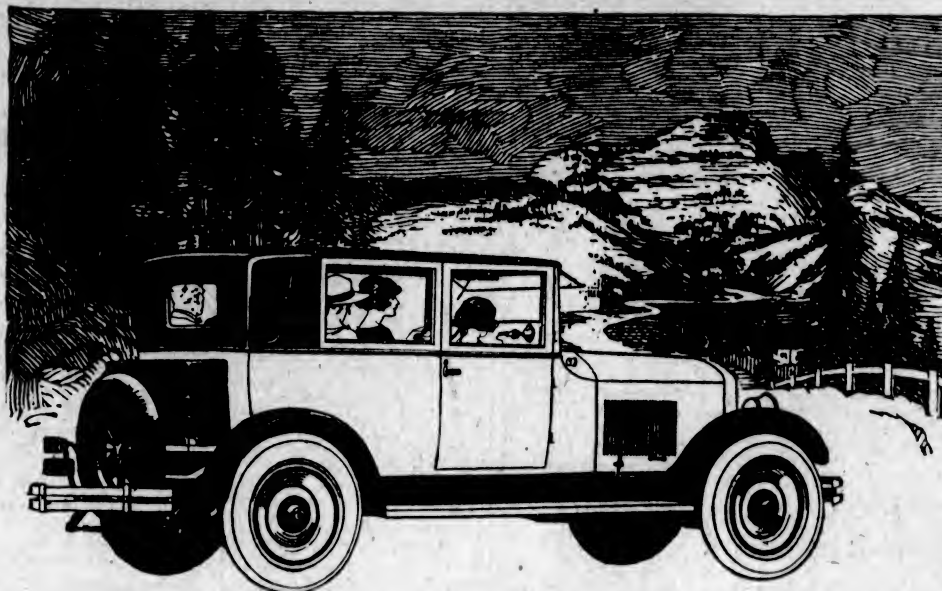

"Cars coming in the opposite direction, the gully on the side of the road, and the uselessness of the brakes under such road conditions, meant certain disaster to a skidding car," Mackay said, "but the Chandler was immediately shifted from high gear to low, effecting a sudden stop that barely avoided serious injury to the occupants of the car."

"To picture what would have been the case had we not had the Traffic Transmission needs no stretch of the imagination," said Mackay.

"Balloon tires are called 'comfort tires' in England. They are not widely used. Only a few of the larger cars have adopted them, and then only as optional equipment."

Proved JEWETT

PAIGE BUILT SIX
"ONE BILLION MILES BEYOND EXPERIMENT"

Announcing—New Jewett De Luxe Brougham New Autumn Colors—Balloon Tires

This Equipment
Included at Jewett's
Low Price:

Five Balloon Cord Tires
Green Duco Finish
Trunk and Trunk Rack
Nickel Radiator
Motometer and Bar
Monogram Radiator Cap
Nickel Head Lamp
Nickel Cool Lamps
Rear View Mirror
Sun Visor, Stop Light
Spot Light, Heater
Double Bar Bumpers
Automatic Windshield
Wiper
Transmission Lock

THE De Luxe Brougham body is new! Smart new body lines—quite the last word in style. New finish—a soft, cool Autumn Green, brightly striped in orange. Fine-grain leather finish back, with landau arms. Balloon tires for even greater riding comfort. Completely equipped—everything you'd want for a car!

Proved stamina—long-lived performance! For there's nothing freakish, untried, about the sturdy Jewett chassis! From the big, Paige-built, 50 h. p. Jewett motor to the all-steel universal joints—it has been tried and tested in over a billion miles of service.

The big Jewett motor gives you all the power you want. Power to beat others up hills in high. Power to pull

away first in traffic. Power to go through bad going slowly in high. And because it's big—because its power comes from size and not from wearing, killing motor speed—Jewett does its job easily, unstrained. So its life is long!

Jewett's motor was first used in a Paige selling for \$3600! Then—improved, perfected—it was put in the Jewett. Five years' service—1,000,000 miles of travel—prove its staunchness!

Extra deep frame; heavy duty axles; all-steel universal joints; 2805 lbs. of huskiness—all strength for Jewett's big power!

Come in and see this new Jewett Brougham. We'll "stand treat" to a ride for you and your family.

SMALL CARS SIMPLIFY BIG PARKING PROBLEM

London Traffic Is Not as Serious a
Question as It Is in New York—
Light Cars Easily Handled

Visitors to London, England, notice one outstanding feature of the dense traffic, and that is the ease with which the smaller motor cars so favored by English people are handled. Easy to manipulate, occupying little street surface, it is a simple matter for them to worm their way among dense traffic or, as occasion demands, slide up to the curb in parking space their big brothers would find absolutely impossible.

London traffic is not as serious a question as it is in New York, for instance, one reason being because the smaller, more economical car enjoys greater popularity over there and manufacturers who find street and highway congestion a sales resistance to big cars, may find a lesson in this fact.

Suggestions have been made in some quarters that automobiles be taxed according to the road space occupied. There is undoubtedly a trend away from large, cumbersome, space-eating cars.

Cost is only one of the factors involved, for many persons of wealth are today using the smaller, more economical car on account of greater flexibility, traffic and parking difficulties.

Some students of the automobile industry are convinced that universal use of the smaller, lighter car will be a very decided factor in relieving traffic congestion.

Preparedness should be the watchword of the motorist who contemplates a long trip, as tire trouble will greatly lessen the amount of pleasure derived. Most cars are equipped with a spare tire carrier, but frequently more than one spare is desired. Not only is it difficult to strap one spare to the other, but it permits them to rub together, sometimes causing injury to both. With a couple of pieces of iron, bent to fit one spare tire, the second spare tire is supported firmly and the two cannot rub.

It is considered better practice not to release the clutch on down grades. Not only do you get better and safer braking power with clutch engaged, but you prevent injury to the clutch mechanism. It is better not to drive with clutch depressed unless absolutely necessary.

In Austria, a radio is used to catch automobile speeders. Police cars furnished with transmitting and receiving sets patrol the roads ready to give chase to any reckless driver or pass on word to the next police car so that a trap may be set.

The gasoline consumption of twenty States for the six months ended June 30 last was 944,116,715 gallons, as compared with 719,449,647 gallons for the same period in 1923. This gain of 21.4 per cent.

LIST PRICES OF DODGE BROTHERS SPECIAL TYPE CARS REDUCED

Economies effected in the purchase of special equipment on Dodge Brothers special type cars, due to substantially increased volume, make it possible for Dodge Brothers to reduce the list prices on these types, effective Sept. 15.

DODGE BROTHERS

(Canada) Limited

A. E. Humphries
Motors, Ltd.

Corner View and Vancouver Streets
Phone 479

CUT IN DODGE PRICES HAS BEEN ANNOUNCED

Owing to Increased Volume of Purchases, Prices of Special Types Reduced

While prices of all standard type Dodge Brothers cars remain unchanged, a reduction in prices of special types has been announced by officials, according to Mr. A. E. Humphries, of Humphries Motors, Limited, local distributors of Dodge Brothers messenger cars and Graham Brothers trucks.

The reductions were made possible, officials announce, on account of increased volume of their purchases of special equipment for the cars affected by the price change.

Dodge Brothers special types consist of the standard cars equipped with accessories which include steel disc wheels, five balloon type tires, nickel-trimmed radiator, nickel-plated bumpers, automatic windshield wiper, rear view mirror, scuff plates, cowl lights and motorometer with lock. A special body stripe of Dodge Brothers is also included.

Manufacturing and buying these accessories in quantity, Dodge Brothers, it is pointed out, were able to install them at prices below what the owner would otherwise have had to pay. The public was quick to sense this and the demand for the special types grew steadily from the moment they were made available, officials announce.

Four Dodge Brothers cars are affected by the reduction—the special touring car, special roadster, special "A" sedan, special "B" sedan, special business coupe and special four-passenger coupe. The "B" sedan and the business coupe have also been added to the line of special types.

WEIGHT OF A TIRE DOESN'T INDICATE THE STAYING POWER

A few years ago tire buyers often purchased the tire which weighed the most. It was common practice for a tire purchaser to demand that a tire be put on the scales, and he would go around to half a dozen tire dealers demanding the same test. His decision to buy would be reached by picking the heaviest tire.

Today it is pretty generally acknowledged that the most satisfactory cord tire is that with the fewest plies of cord, providing, of course, that the fewer plies are still strong enough to carry the rated load capacity. The balloon tire with its fewer plies is taking the place of the eight-ply tire of yesterday.

"The Consolidated Rubber Co. has been in the forefront in developing the less-ply tire," says Mr. A. D. Mac-

JACK H. TRACE

One of Victoria's well-known young business men, who last week joined the sales staff of Havercomb Motors, Limited, local Ford distributors. Mr. Trace will be remembered as the end man in the Kiwanis contest, and it was really due to his untiring efforts that helped to make the show one of the most successful of its kind staged in the history of the club. For the past seven years Mr. Trace has been connected with Digona.

Leod, 755 View Street, local Dominion Tire representative. "The theory behind this method of construction might be shown by a piece of paper compared with a piece of cardboard. A piece of ordinary paper may be bent numerous times without breaking it. If it were built up to eight plies, however, giving all of the plies together, a few bends would serve to break it, or at least crack it."

"Tires are called upon to bend, or flex, constantly. Some of the bends are very severe and lead eventually to ply separation which results in tire destruction. Consequently, with fewer plies, there is less likelihood of this destructive bending. Experience has proved that, under like conditions, the tire with fewer plies serves equally as long, or longer, than the tire of yesterday."

"Easy gear shifting is a matter of 'feel.' A skilled motorist has an uncanny sense of touch enabling him to change quickly and silently. A good play in the gears, clutch, shift from low to neutral to second, and release. This double manoeuvre almost invariably assures a silent shift."

Brakes that aren't adjusted and equalized, rattle, chatter and squeak. The tread of one or more of your tires is soon worn down; the frame of the car is distorted with strain; the wheels lose their perfect alignment. Brakes should be adjusted every thirty days.

THOUSANDS VIEW NEW STUDEBAKER MODELS

Throughout Canada and the U.S. 1925 Models Capable to Motor Circles—Beautiful Lines

Correspondence received from the Studebaker factory at South Bend in the last week showed that approximately 2,000,000 people throughout Canada and the United States flocked to see the new Series 35 automobiles the first thirty-six hours they were on exhibit. The unexpected beauty of these automobiles created a furore and a flood of telegrams and letters poured into the main office of the Studebaker Corporation at South Bend. "The experience of ourselves here in Victoria evidently was duplicated all over the country—between 27,000 and 38,000 viewed the cars in Chicago, 58,400 in Detroit, 19,200 in New Orleans, 15,400 in Buffalo, and so on," stated Mr. R. J. Jameson, of Jameson Motors, Ltd., local Studebaker distributors, yesterday.

During the rush of the first thirty-six hours, Studebaker dealers, especially in the larger cities, were completely unable to keep pace with the orders for new cars, especially in those cases where used cars were offered for trade. Used cars were appreciated at the rate of from twenty to thirty an hour, and it was utterly impossible to serve all the people and make the explanations that they should have had, and the dealers would like to have made them.

The entire line of the new Series 35 Studebaker has not yet been shown—the only cars shown so far being the duplex phaeton models. This duplex body proved a sensation, with its upper frame shaped in steel and forming a part of the lower body—a fundamentally new principle.

Jameson Motors, Ltd., received a carload of Studebakers last Friday. The shipment consisted of one Big Six touring, two specials and one standard. This is the second carload that the local distributor has been able to obtain since the introduction of the new cars. The Big Six Duplex Phaeton will go on display tomorrow.

MOTOR NOTES

The 1925 Oakland arrived last week. The new model is now on display at the showrooms of Tait & McRae, local distributors.

Nellie Hily: "I thought you said you were a good motorist! Why, only yesterday you ran into a cow."

Sweet Adeline: "Well, my dear, the cow was on the wrong side of the road."

"Have a nice trip South?"

"Yes, but it's nice to be back to

work again where a fellow can catch up with his sleep."

Salesmanager Patterson, of Thomas Plimley, Limited, reports that Packard sales have been increasing steadily since the introduction of the eight-line model. Chrysler, Maxwell, Everland, White Knight and Crossley cars are also proving very popular this season, says Mr. Patterson.

A well-known Victoria motorist, who has just returned from a trip to Southern California, says the scenery is beautiful almost anywhere this time of the year—when you can get a glimpse of it between billboards.

Mr. George Weiler has been spending the past week in Seattle on business.

Mr. Andy McGavin, local Goodrich distributor, reports the sale of tires increasing. Motorists are busy getting their tires into shape ready for the long winter grind.

An Eastern motor magazine presents a feeling point. "The Old-Fashioned Wagon Road." The of wagon road is all right for old-fashioned people.

Mr. A. W. Carter returned to the city last week after a three-week trip to the Hudson-Exeter factory at Detroit. "The factory is now turning out between 700 and 800 cars a day, and even with this big production it is impossible to keep up with the demand," says Mr. Carter. "Both Hudson and Essex models are meeting with wide popularity throughout Canada and the United States, and the factory, though it is doing its very best to meet the demand, has to cancel orders every day." Mr. Carter is very enthusiastic over prospects for the future, and looks forward to a busy winter.

Mr. Lawrence Wooster is now selling cars for Havercomb Motors, Ltd., local Ford dealers.

After a careful investigation by the Automobile Club of British Columbia of the situation relative to the road-signing throughout the Province, and in particular the boundary country, the Okanagan Circuit and Vancouver Island, it has been decided by the club that work in this connection shall be carried on as soon as weather permits early next spring, and it is anticipated that generous support in carrying out this activity will be provided by the Government.

Here is a little advice from one of our leading garages: If your brake bands are loose, put on some more life insurance.

The 1925 Oldsmobile is now on display at H. A. Davie, Limited. The Olds has a very striking appearance, and is sure to be one of the season's most popular lines.

The delegates from the Victoria Branch of the Automobile Club of British Columbia have requested the Provincial Board to give careful consideration to the matter of licensing drivers and the prohibition of stickers being used on windshields, and also that the Dominion Government be requested to take over Strathcona Park as part of its system of Canadian National parks.

When you fill a grease cup, grab the oil can or wield the grease gun, do you know what you're greasing, or is it a blind process of forcing a certain amount of lubricant into some place that is specified on the lubrication chart? It is a good idea now and again to step into a repair shop and note all the parts that are being replaced just because owners didn't know what they are greasing. Sometimes you are inclined to stop if, in turning down a grease cup, lubricant starts oozing out of some section of the mysterious thing you're greasing. Perhaps the grease does no good at this point. Perhaps you should keep on forcing in more grease until it starts working out of other parts of the particular unit. Perhaps you are just overlubricating the part. If you could see such parts unassembled you would, with results, then know your goal in greasing, with touching 100 per cent as a consequence.

Korean Bandits Active Despite Japanese Police

SEOUL, Oct. 4.—Eighty-one persons, policemen and civilians, were killed by Korean bandits operating along the Korean-Manchurian border during the first six months of 1924, according to a statement issued by the authorities of Korea.

Bandit gangs, composed mostly of Koreans who have fled from Korea since the Japanese annexation, have their bases in Manchurian territory, across the Yalu River, and make frequent raids. During the first half of 1924, according to the Government's statement, they made 336 such raids, killing eighty-one persons, setting fire to twenty-nine houses, frequently cutting telegraph wires and exchanging shots with the Japanese police on forty-nine occasions. The police killed fourteen and captured six of the bandits in these skirmishes.

London-Paris Half-Hourly Airplane Service Planned

LONDON, Oct. 4.—An airplane to fly from Paris to London, for passengers and freight, is included in the programme of development which the British air line have drawn up for the future. Traffic by air the past Summer was greater by far than ever before, both on the Continent and between the Continent and England. Those who are operating the air service expect continued development. The British lines have several sixteen-seater planes under construction at present.

Americans, though they have few commercial air routes of their own, continue to be the best patrons of the European services.

Reasons Found Why Japan Failed in Olympic Games

TOKIO, Oct. 4.—Japanese newspapers express disappointment at the showing of the Empire's athletes at the Paris Olympiad. "It was not much to boast of," says The Osaka Mainichi. The fault is found in part, this newspaper continues, in Japanese houses, customs and food, which all together tend to produce men of slighter physique than is the rule in western countries. "Our people should live, eat, work and rest according to principles which promote health and strength."

Quickly and Easily Installed

The ease of installation of Delco Ignition for Fords is one of the big reasons why motorists like it. And once installed, the Delco system becomes a permanent part of the motor equipment. It is never necessary to remove or to loosen the distributor to set the timing. This is one of the many outstanding features of superiority of the Delco Ignition system for Fords.

The same quality that has made Delco famous as the world's finest ignition system is put into Delco-Ford Ignition. In addition to accurate timing and a dependable hot spark, it also provides an automatic spark advance that makes it hardly ever necessary to use the hand advance lever except for emergency driving.

Only one tire in the world

has an outstanding claim on the consideration of British Columbia car owners. That tire is the GREGORY—for this reason: It has been proved by local users time and time again to be every bit as good as any tire made. That fact gives it an equal claim with any other. And here's the trump card—

It's Made in B.C.

GREGORY TIRES and TUBES

Are made at Port Coquitlam, B.C.—in a plant as efficient, equipped as any in America—only the very finest of rubber, cord fabric, etc., are used. Every tire and tube is subjected to the most rigorous test and examination before being released from the factory. Every Gregory tire bears the name "GREGORY" most be up to the world's best tires being offered for sale.

Now think—just THINK—what that means to you. You pay no more for a Gregory Tire than you would for any other—your money stays right here in B. C.—it goes in wages to skilled British Columbia workers—they spend it—and by an immutable law of economics a proportion of it ultimately returns to you.

So the next time you're buying a tire remember, for your own sake, there are two good reasons why you should get a Gregory, and only one possible reason why you should consider any other.

GREGORY TIRES	OTHER TIRES
1—Good Tires.	1—Good Tires.
2—Made in B. C.	

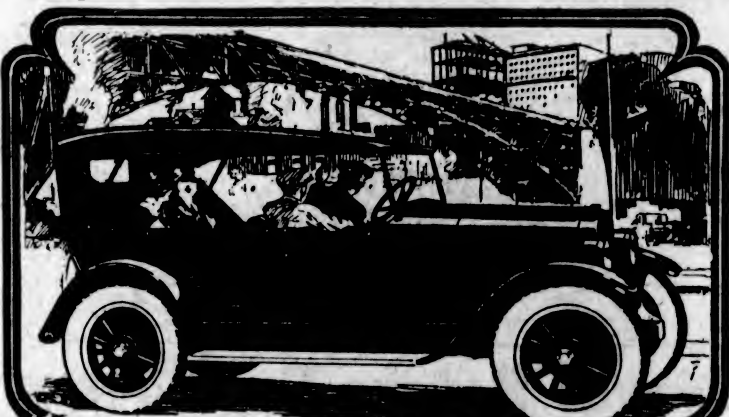

Buy Gregory Tires because they give you more than any other tire in the world can give—and they cost no more!

At All Dealers

GUARANTEED
An assurance of long mileage and satisfactory service, comparable as you would get with any tire made.

The Gregory Tire & Rubber Co., Ltd.

THE BEST AND COST NO MORE

All Steel Adopted for Greater Safety and Lasting Beauty—

IN an age of steel—with bridges of steel—ships of steel and trains of steel—with steel the foundation of modern transportation, Overland adopts for greater safety and lasting beauty an all-steel body.

While most motor car bodies are skeletons of wood with sheets of steel nailed outside, Overland's body is solid steel—a frame of steel covered with steel—welded into one piece solidity.

Only an all-steel body takes an everlasting baked enamel finish, and you can scrub an Overland's baked enamel finish with strong chemicals used to remove road tar, or you can turn the scorching flame of a blow-torch on it without marring its gleaming beauty. It keeps its looks with age.

And with all this strength and permanent beauty are linked big power—great economy—dependability and 23 big-car quality advantages, unmatched at anywhere near the price. See this all-steel Overland. Drive it in traffic or over the hills.

IN AN AGE OF STEEL—FOR GREATER SAFETY AND LASTING BEAUTY—DRIVE AN ALL-STEEL OVERLAND

Amazingly easy buying terms.

OLD-TIMERS DIE ON GULF ISLANDS

BOTH HAD LIVED FORTY-SIX YEARS IN ARCHIPELAGO

Mrs. J. J. Akerman Passes on Salt Spring, and Mr. Thomas Bennett on Mayne

GANGES HARBOR, Oct. 4.—At 10 o'clock on Wednesday night, in her home at North Salt Spring, the death occurred from heart failure, following a long, complicated illness, of Mrs. Georgina M. Akerman, wife of Mr. Joseph J. Akerman.

The late Mrs. Akerman was the daughter of the late Mr. and Mrs. Charles Horel, who years ago came from Michigan, U.S.A., and settled in Victoria. There, 45 years ago, their daughter Georgina was born. When only two years old she was brought to Salt Spring, and had been a resident of the island for 46 years. During her recent illness she was nursed at her home by an old friend of the family, Miss Eswenine.

The late Mrs. Akerman leaves to mourn her loss her husband, Mr. J. J. Akerman, two daughters, Mrs. Geo. Horel and Miss Violet Akerman, and one son, Master C. Akerman, of Salt Spring Island; four brothers, Mr. Jas. Horel, of Salt Spring Island; Mr. G. A. Horel, of Calgary; Mr. Samuel Horel, of California; Mr. Howard Horel, of New Westminster; and four sisters, Mrs. H. Rogers, of Vancouver; Mrs. Roach, of Mission; Mrs. Welch, of California; and Mrs. Murray, of California. The funeral took place from St. Mark's Church on Saturday at 1 o'clock.

Mayne Island Loss

MAYNE ISLAND, Oct. 4.—Thomas Bennett, prominent rancher of Mayne Island, died here last night at the age of eighty years. He had been a settler on this island for the past forty-six years and had been a leader in community affairs most of that time. He was a native of County Down, Ireland. Surviving him are his widow, two daughters and nineteen grandchildren, on Mayne Island, and two sisters and one brother. The funeral will be held from the residence on Monday at 2 p.m., and interment will be made in the Island Cemetery. The arrangements are in the hands of the Sands Funeral Company.

NEW HALL OPENED

PARKSVILLE, Oct. 4.—Dean Laycock, of Victoria, officially opened the St. Ann's Parish Hall, Parksville, on Tuesday. After the Dean had declared it open and had spoken a few words on the work of the members, Rev. C. H. Fogham, the vicar, gave a suitable address. Hymns were sung by the audience, followed by prayers. The remainder of the evening was spent in music, singing and dancing. Mr. Johnson delighted everyone with a pianoforte solo, and songs were sung by Mrs. H. K. Harrison and Mr. Pattinson, which everyone thoroughly enjoyed. Refreshments were served by the committee, after which Mrs.

Davis and Mrs. Pattinson provided music for the dance. Everyone pronounced it a most enjoyable evening. The "showers," which had also been arranged for the same evening for the benefit of the hall furnishings, was a great success and many were the articles endowed by the parishioners for the use of the hall. The hall represents much hard work on the part of the Women's Auxiliary, and every credit is due to the members of the association who have worked so hard to attain their ends.

PLAN GLEE CLUB

STRAWBERRY VALE, Oct. 4.—Strawberry Vale W. I. will hold its regular monthly meeting on Tuesday afternoon in the Institute room, 1105 Avenue, Colquits, at 2:30 o'clock. Final arrangements will be made for the formation of a glee club for the winter months, and intending participants are requested to notify the president, Mrs. A. Laycock, either by letter or phone before the meeting.

WOULD USE PARISH ROOM

PARKSVILLE, Oct. 4.—The Parksville Institute had an enjoyable afternoon on Wednesday last. Mrs. H. K. Harrison had arranged that the monthly meeting should be held at her house, thirty-four members being present. It was necessary to decide where the meetings should be held in future, and it was decided to apply for leave to meet in the new parish room, and also for permission to erect a cupboard there in which to place the library books. The business meeting was followed by music and recitations and an excellent tea was then served.

ANNUAL BALL SUCCESS

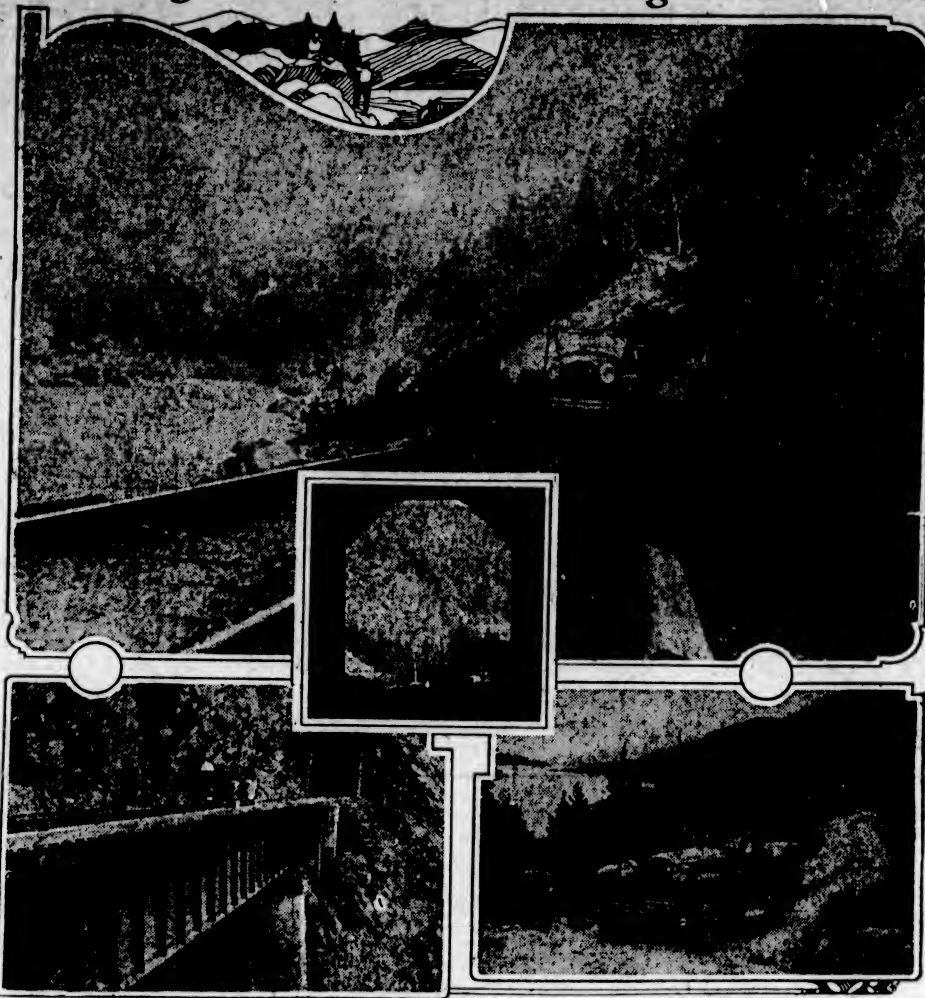

SAANICHTON, Oct. 4.—The annual ball of the North and South Saanich Agricultural Association was held last night in the Agricultural Hall and was a great success. There were fully 200 guests present, and the floor was well filled with dancers. Oscar's orchestra supplied splendid music, every dance being encored again and again.

The hall was beautifully decorated with flags and bunting, and the stage with autumn leaves and flowers. The supper room was in charge of the lady directors, who received many complimentary remarks on the excellence of the fare provided. The tables were prettily decorated with Michaelmas daisies and autumn leaves. The ladies present were: Mesdames E. Harrison, R. Nimmo, B. Deacon, F. Verdier, H. Pope and F. Turgooose. The floor committee was C. Chisholm, E. Blackburn, F. Tomlinson and S. Spencer.

WHIST SERIES BEGINS

PORT ALBERNI, Oct. 4.—A series of whist drives was commenced in the Anglican Church Hall on Tuesday evening by the Ladies' Auxiliary of St. Alban's Church, Port Alberni. In spite of the wet weather a good crowd turned out and spent an enjoyable evening, the prizes being won by Mrs. C. H. Maunsell, ladies first, and Mr. E. J. Cronk, gentlemen first, while Miss E. Garrard and Mr. Rooney won the consolation prizes. Special prizes will be given the persons having the highest aggregate

Scenes Along the Route of Pathfinding Tour to Victoria

Messrs. A. S. Bement and R. F. Evans, of the Lincoln Highway, are now back in Detroit after having pioneered the way from Winnipeg to Victoria by the all-Canadian route. Most of the pictures were taken near the Fraser River Canyon, the most dangerous part of the trip.

scores at the end of a five weeks' series.

WILL GIVE DANCE

METCHOSIN, Oct. 4.—The Metchosin Women's Institute held its regular monthly meeting at the hall on Wednesday afternoon. Mrs. M. M. Brown taking the chair in the absence of Mrs. Howard, the vice-president. After the usual business had

been dealt with, it was decided to hold a dance on October 10 at the hall in aid of the Victoria War Memorial Fund. Hunt's Orchestra will supply the music. Mesdames Higgs and Georgeson were in charge of the tea tables. Mrs. Vickers, who was to have addressed the Institute, was unable to come.

CARD SERIES BEGINS

ROYAL OAK, Oct. 4.—The first of the winter series of card parties under the auspices of the Royal Oak Women's Institute will be held on Monday evening at Mrs. N. Musgrave's residence on the Wilkinson Road. Play will commence at 8 o'clock. Mrs. Munro, Mrs. Nicholson and Mrs. Young are in charge of the parties, which will be held every fortnight.

Owing to the conference of the Islands District Institute being held in Victoria on October 8, 9 and 10, Royal Oak W. I. will hold its regular monthly meeting on October 15, when Mrs. Strutt, of Royal Oak, will give a demonstration of rug-making.

ISLAND WOMAN DIES

NANAIMO, Oct. 4.—The death occurred early yesterday morning at her home on the Island Highway, near Wellington, of Mrs. Annie Grose, wife of Mr. Joseph Grose, following a very short illness. The deceased was a native of Kent, England, aged sixty-six years, and had only been a resident of the district for a month. She had, however, been in British Columbia for the past fifteen years, and in Canada for twenty-five years. Besides her husband, she is survived by one daughter, Mrs. August Andre, of Wellington, and one son, J. E. Grose, residing at home.

ARTISTIC ROOFS NOW ARE MADE POSSIBLE AT MINIMUM FIGURE

This ever-changing world! In 1900 the comfort of smooth, swift travel in an automobile was an unknown thing. Some miles after the turn of the century a jolting buggy barked a jolting horse. And who will deny the advantages of the phonograph over the music-box? At all events the new order of things is an improvement.

In the building industry, too, radical changes, especially in the roofing line, are found.

A high official of the Barrett Company, Limited, is authority for the statement that the popularity of asphalt, mineral-surfaced roll roofing is growing by leaps and bounds. He says the public has been quick to realize the sound economy of this beautiful and fire-resistant roofing, which can be easily applied on both new and old houses or buildings. The advantages of mineral-surfaced roll roofing are many but the economy that goes hand in hand with this product is of prime importance. Besides being weather-tight and durable, a mineral-surfaced asphalt roofing is artistic and beautiful. It improves the appearance of the building it covers, as well as increasing its value and salability.

KOREAN CAVE DWELLERS

SEOUL, Oct. 4.—Remains of prehistoric inhabitants of Korea, believed by Japanese scientists to be 4,000 years old, have been found in several dolmens, or burial chambers, in South Hailan Province, near Pyengyang. These dolmens are believed to be the burial places of a race of cave dwellers who inhabited the Korean peninsula about four millennia ago, long before Korean recorded history began. The discovery is hailed by anthropologists as the most important in the history of antiquarian research in Korea.

Motion Picture Man Sees Berlin Poverty

BERLIN, Oct. 4.—"After what I have seen now at Berlin, I am convinced that the overwhelming majority of the Berlin population lives in misery and poverty," said D. W. Griffith, American film producer, supervising two film productions produced here, to a German newspaper man.

"I guess that my good friends who freely supplied me with misleading information about German prodigality divided their worthy endeavors only between the Hotel Bristol and the Palais de Danse while visiting here," the film man added.

Motor Thieves Arrested
MONTREAL, Oct. 4.—Picking the men out of fifteen prisoners yesterday, Mrs. F. X. Beauvais said she believed Jack Currie, 20, and William Davies, 24, who are under arrest with two other men charged with stealing an automobile, were members of the gang of four men who shot and killed her husband, a postman-restaurant keeper, in his premises on LaSalle Road, Verdun, on September 8 last.

An Opportunity to convince yourself

The next time you fill your gas tank add an ounce of Miracle Oil to every two gallons of gasoline. In a few days' time, when the Mile Oil has had a chance to reach the upper cylinder walls and valve stems, you will be driving an entirely different car. You will have a sweeter, smoother running engine with far more power and a livelier pick-up. You will soon notice that you are getting greater gas mileage and by continuing to use Miracle Oil you will save on costly repairs because carbon only accumulates on a dry surface.

Miracle Oil reaches dry surfaces AND KEEPS THEM LUBRICATED.

All good garages and auto supply stores sell Miracle Oil. Necessary to use only two ounces of gasoline. \$1.25.

MIRACLE OIL

MILK FUND RECEIVES SUPPORT OF PUBLIC

Tag Day Held by Dr. O. M. Jones Chapter, I.O.D.E., Yesterday, Realizes \$1,103

The tag day held yesterday by the Dr. O. M. Jones Chapter, I.O.D.E., resulted in a collection of \$1,103, which is regarded as wholly gratifying. The Lieutenant-Governor headed the list of subscribers with \$200, and generous donations were also received from Mr. Gillespie and Mr. Todd. The taggers had a busy time and stuck to their posts faithfully. The cause of

providing milk for under-nourished school children obviously met with public favor, and during the course of the day there were but few people on the streets who went untagged.

The thanks of the Dr. O. M. Jones Chapter is extended to the following: Mr. MacLaurin, principal of the Normal School, and Miss Williams, principal of the Girls' Central School, for sending students to tag, and also to Madame Sander-Mongin and the Victoria College students. Thanks are also extended to the Meirose Palm Company for the use of its store and assistance, to The Colonist for generous advertising, and to the public generally, who contributed so widely.

Nearly ten million people visited the 148 national forests last year.

THE GREAT SECRET

The Seer (to Intelligent Elector): "It is written here that the election will come perhaps this year, perhaps next, but certainly before the century is over. Beware!" —News of the World

USED CAR SALE

Tuesday, Oct. 7 to Saturday, Oct. 11

After a particularly busy season we find our stock of used cars excessive. We have a number of good buys in the following makes:

Fords, Chevrolets, Overlands, Dodges Oldsmobiles, Hupmobiles, McLaughlins Studebakers and Packards

These cars are priced to sell.

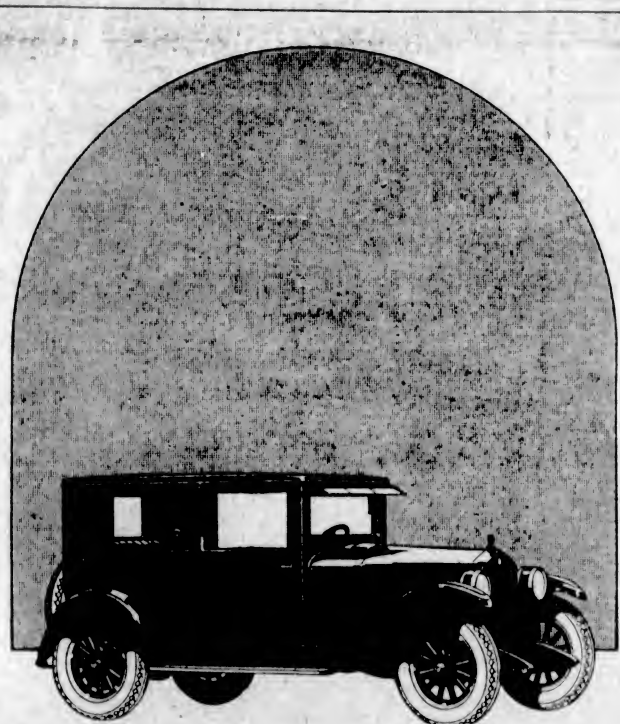

Remember a used car is only as good as the people you do business with.

Fire Prevention Week October 5th to 11th

FIRE IS FRIEND BUT FICKLE ONE

Mankind's Good Servant Does
Damage of \$100 per Minute
in Canada During Year of
1923

TWELVEMONTH SEES
29,000 OUTBREAKS

Nearly 400 People, Mostly
Children, Die in Year in
Flames, Generally Started
by Careless Hands

THERE is an old saying that "fire is a good servant, but a bad master." Fire cooks food, heats homes in winter, makes steam to drive engines and serves in a thousand ways. But it is also fire that burns houses, stores and factories, destroys forests, and every year costs many people their lives. Fire cannot be trusted. There is no flame so small but what it may become a disastrous conflagration if careless people forget its danger.

In Canada, during the past ten years, fire has destroyed property worth more than \$200,000,000. Even more serious than that, however, is the fact that over 3,000 persons were burned to death and thousands of others severely injured by fire. In the year 1923, Canada's fire loss was \$140,000,000, or over \$100 per minute. While in European countries the average annual loss by fire is less than 33 cents per head of the population, in Canada the annual loss exceeds \$6 per head.

Everyone Pays
Canada is made up of much the poorer by fire. Burned buildings and goods do not replace themselves. Fire losses are not paid by the insurance companies. The companies merely collect premiums from everybody in Canada and pay a portion of the amount collected to the person who suffers by fire. Fire taxes every one and none can escape. The cost of insurance, which represents the cost of fire waste, is added by manufacturers and merchants to the price of their goods. Fire increases the cost of everything—food, clothes, furniture, rents, and all the necessities of life.

Saddest of all, fires in Canada destroy many lives. In 1916 there were 343 persons burned to death. In 1917, 261 in 1918, 284 in 1920, 336 in 1921, 410 in 1922 and 397 in 1923. About sixty per cent of these fatalities occurred in dwellings and a large majority of the victims were children under twelve years of age.

In 1923 there were over 29,000 fires in Canada. Seventy-five per cent of the causes were due to carelessness and could, therefore, have been prevented. A careless person can never be a worthy citizen because he is a danger to himself and to all those about him. Every time you hear the fire alarm you are pretty safe in saying, "There is a bad citizen! Some one has been careless, that fire could have been prevented."

Here are some safety rules that everyone should know and act upon:

Rules for Matches
Use "Safety" matches which strike only on the box.
Do not buy matches which break, lose their heads or glow after being put out.
Never throw away a match until every spark is out.
If matches are spilled, pick up every one.
Do not carry matches loose; children do not need to carry them at all. Matches should be kept out of the reach of little children.
Keep them in covered boxes away from the heat of stoves or stove pipes.
Strike matches away from you. If striking on a box, first close the box. Strike downward on the box.

Lights
Candles should never be taken into closets where they may ignite inflammable materials.
Use metal oil lamps, not glass ones.
Use only the best quality of oil.
Have lamps with solid, heavy bases.
Be sure that the wick fits snugly.
Keep the burner clean. Boil it occasionally with soda, lye or a strong soap solution.
Keep the wick trimmed evenly.
Fill the lamp by daylight only.
Be sure that the burner is tightly screwed into place.
Wipe the reservoir clean.
Do not set the lamp near the edge of a table or in any place where it may overturn.
Do not set it too close to curtains or anything that will take fire easily.
Do not leave a burning lamp too long unwatched.
Do not leave the house without extinguishing lamp.
Have no gas flames without glass, be sure that pieces of the mantle cannot fall out.
Never use paper lighters.

Stoves and Furnaces
Place stoves, furnaces and pipes far enough from walls and woodwork to avoid overheating.
Cover the nearest wooden surfaces with sheet asbestos, sheet iron or tin; if iron or tin is used, leave an air space behind it.
Where stove pipes or heating pipes pass through walls, enclose the pipes in galvanized iron, double-walled, ventilated thimbles at least twelve inches wider than the diameter of the pipes.
Protect the floor beneath the stove with sheet metal, and have it extend forward at least twelve inches directly beneath the door of the stovetop.
Surround the base of the furnace with brick, stone or concrete.
Make sure that all pipes are free from rust, and that all joints and connections are sound and tight.
Fix a guard about the pipe in the attic so that nothing may be stored against it.

DON'T'S

DON'T overvalue your property when placing insurance.
DON'T start fires in stoves, furnaces or fireplaces unless you are sure the flues and chimneys are clean.
DON'T allow a stovepipe to come in contact with wood. Use cement, tin or galvanized iron where the pipe goes through.
DON'T leave your home with a lamp burning or turned low.
DON'T wash clothing, or other articles in gasoline, benzine, or naphtha, or allow it to be kept in your house.
DON'T throw water on flames caused by burning gasoline, benzine, naphtha, or coal oil, as it spreads the flames. Smother the fire with a rug or covering of some kind.
DON'T use any but safety matches; others are dangerous.
DON'T permit children to play with matches or start bonfires.

Never pour coal oil into a coal or wood stove, even when the fire is out.
Never put ashes into wooden boxes or barrels; have a strong metal can.
Study the drafts and dampers.
Do not let the stoves or pipes become red hot.
Keep stoves, furnaces, flues and chimneys clean.
Inspect the chimneys and flues to be sure that they are sound.
Do not dry wood in an oven.
Do not hang wet clothing too near to a stove.
Keep curtains away from stoves and pipes.

For Open Fires

Don't build bonfires for fun.
If you must build outdoor fires, be sure that they are cold before you leave them.
Don't set dead trees afire. Sometimes they will burn for days.
Before lighting an open fire be sure that it is completely enclosed in a stout wire screen.

Keep children from playing too near the fire, screen or no screen.
Don't throw large pieces of loose paper upon an open fire.
Make absolutely certain that the fire is out before going to bed at night.
Don't say, "I guess it's all right."
Thaw frozen pipes with hot water, not with flames.
Cooking and Cleaning
Don't leave the stove while broiling is being done.
Don't use water on burning fat; use earth, sand, flour, salt or a metal cover.
Never let a stove get red hot.
Be careful not to use stove polish on a hot stove; wait until it is cold.
Don't use any kind of stove polish unless you know what is in it; buy the safe kinds.
Don't leave sweepings in a piece of paper; put them in the stove.
In cleaning furniture with oil or wax, use only small quantities at a time and burn the polishing rags.

Rules for Rubbish
Keep things tidy; don't allow rubbish to accumulate anywhere in the house or near it.
If you have oily cloths, put them into a metal box or can with a cover. Don't pile dead leaves against anything that will burn. They sometimes ignite by themselves.
Bury leaves; don't burn them.
Don't have old pieces of lumber cluttering up your basement. Have them cut up into kindling and then piled in a proper place.

For Coal Oil

Study the "Rules for Lights."
Be sure that oil heaters and cookers do not leak and that they will not overturn.
Keep the burners clean and do not turn the flames too high.
Keep the oil can outside of the house, if possible.
Do not let the floor beneath the can become oil-soaked.
Make sure that the can does not leak or drip.
Fill by daylight only any receptacle in which oil is to be burned.
Never start a coal or wood fire with oil.

Rules for Electricity
Remember that the human body is a conductor; do not touch wires, or anything else which may be charged with electricity.
Do not have wiring done by anyone but an expert and careful electrician.
Never leave an electric device, even for a moment, without making sure that the current is turned off.
For Gasoline
Remember that you must take no chances with gasoline; it is one of the most dangerous explosives in common use.
It must always be kept in tightly fastened cans; never in glass bottles. It should never be uncovered within the house nor at any point where its fumes can travel to an open flame, a live coal or a spark.
Do not use it for cleaning. If you can get a safe cleaning material or liquid.
Gasoline in quantity should be kept in underground tanks.
No one should be allowed to smoke in a garage.
No one should be allowed to smoke in an automobile while its gasoline tank is being filled.
Do not use water upon a gasoline or coal-oil fire; use a chemical extinguisher, or else throw earth or sand upon it.

For Gas

Study the "Rules for Light."
Make sure that lamps, stoves, heaters and their connections are well made, tight and free from leaks.
When you smell escaping gas, first open doors and windows, and then find the leak at once.
Never look for a leak with a lighted match, lamp, candle, or flame of any kind; use an electric flashlight, if you have one, otherwise find the leak by the sense of smell.
Mend the leak at once, or else shut off the gas at the meter and send for a gasfitter. Do not light up in the house until this has been done.
Never buy cheap rubber gas tubing. If you cannot connect with solid iron pipes get a good quality of flexible metal tubing and make sure that it is tightly joined at both ends.

FIRE LOSS HITS EVERY CITIZEN

Entire Population Pays for
Waste Through Effect of
Heavy Insurance on Cost of
Living

CARELESSNESS HELD
KEENEST "FIRE BUG"

Reasonable Prudence Would
Keep Canadian Conflagra-
tions Down to Low Level of
Other Countries

BY Royal Proclamation, His Excellency the Governor-General of Canada has designated October 5 to 11 as "Fire Prevention Week." During this week lessons on fire prevention subjects will be given in the schools, public meetings will be held in many of the larger cities, towns and villages, and the owners and occupants of property everywhere throughout Canada will be counselled to give special attention to the removal of fire hazards from their premises.

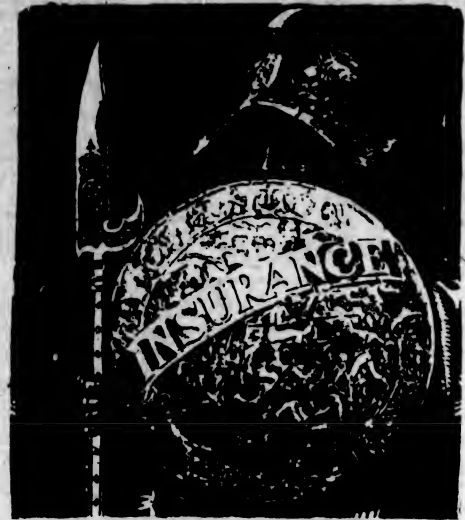

Fire waste is one of the most serious economic problems confronting Canada at the present time. The public in general is vitally affected by the tremendous losses annually incurred by fire and the enormous expenditures rendered necessary to adequately protect life and property from its ravages. Seeing that at least seventy-five per cent of all fires are caused by carelessness and can therefore be prevented, it is the obvious duty of everyone to assist in the educative programme of this week. It is shown by authoritative statistics that the amount of the average annual loss of insurable property by fire in Canada exceeds forty-eight million dollars and that more than three hundred and fifty persons annually lose their lives as a result of fire.

It is shown by authoritative statistics that the amount of the average annual loss of insurable property by fire in Canada exceeds forty-eight million dollars and that more than three hundred and fifty persons annually lose their lives as a result of fire.

The Public Pays
The waste thus occasioned, represented in terms of human life, money, labor, time and natural resources, cannot be recreated, but is an absolute and irreparable loss largely distributed over the entire population through the agency of fire insurance which imposes an inescapable and burdensome tax upon industry and thrift and substantially adds to the cost of living.

At least eighty per cent of the fires which occur originate either directly or indirectly through inexcusable ignorance and neglect, and are therefore preventable. The exercise of reasonable prudence and proper carelessness on the part of responsible

Plays and Players

Latest Tom Mix Film At Capitol This Week

Western Actor, Whose Work in "The Lone Star Ranger" Created Sensation, Is Presented in Zane Grey's "Last of the Duanes," Which Is Another Outdoor Photoplay—Picture Is Filled With Thrills From Beginning to End.

THOSE who saw Tom Mix in "The Lone Star Ranger," the last Zane Grey novel that William Fox put on the screen with the hard-riding Thomas in the title role, will welcome the news that Mix is to be seen in "The Last of the Duanes," at the Capitol Theatre for six days, starting tomorrow. This story, also by Grey, is a typical thrilling, two-rated sort of yarn that made Mix famous, and is numbered among the long list of important productions included in the William Fox programme for 1924-25.

The film was made from a scenario by Edward J. Montagne, Marlan Nixon, who has been seen opposite Charles Jones in several of his recent William Fox starring vehicles, makes her first appearance as leading lady for Tom Mix in this production. Others in the cast are Brindley Shaw, Frank Nelson, Lucy Beaumont and Harry Lonsdale.

"The Last of the Duanes" deals with one Buck Duane, last of a long line of Duanes, who have been known for their daring and defiance with the use of a sixgun. John Duane, father of Buck, was said to be the fastest man on the draw in the southwest, and Mrs. Duane holds grave fears that her son will follow the footsteps of his father. Eight notches on the handle of his .45 were mute testimony of how the elder Duane had lived and died.

Hiding over the ranch, Buck meets Jenny, a sweet lass of eighteen. Her father is ill, and Buck earns the girl's gratitude by helping her mend a broken wagon. That evening he visits a dance hall, where he dances with a pretty Mexican girl, Cal Bain, the town bully, who claims the girl as his sweetheart, threatens him. The next day Buck is told that Bain, still drunk, is looking for him to kill him. The men meet, and Bain reaches for his gun. Fearing arrest, Buck Duane's first gun play. He has "got his man." Fearing arrest, Buck mounds his horse and leaves for the foothills.

Sheriff Porgins is a rough individual. Secretly he is the chief of a band of outlaws and cattle rustlers. In his fight Buck comes in contact with these outlaws and becomes en-

"THE ISLE OF SPICE" BIG ATTRACTION AT ROYAL SHORTLY

A huge amount of new and beautiful scenery is being built for Reginald Hincks' big production, "The Isle of Spice," which will hold the boards at the Royal Theatre for the week commencing Monday, the 13th of this month. That the popular company is out to make this a giant success is evidenced by the amount of work that is being put into all departments of the production, and it is the firm intention of the management to make this one of the most colorful and attractive shows yet seen at the big house.

Athabasca Liberals Nominate EDMONTON, Oct. 3.—Hon. Charles W. Cross, at one time Attorney-General of Alberta, was nominated as Liberal candidate in the new Federal riding of Athabasca by a convention of two hundred delegates. The meeting was a most enthusiastic one, and harmonious throughout, despite advance reports of a split in the party ranks.

AMUSEMENTS

The Screen
Capitol—Tom Mix in "The Last of the Duanes."
Coliseum—"Drums of Jeopardy," starring Elaine Hammerstein.
Columbia—Mary Pickford in "Dorothy Vernon of Haddon Hall."
Dominion—Virginia Valli in "The Signal Tower."

ROMANCE APPEALS AS TOP-GRADE FILM

Doris Keane Takes Leading Role in Dramatic Photoplay at the Playhouse

No screen production that has yet been produced possesses such delightful qualities as does "Romance," the alluring and fascinating love story from the pen of Edward Sheldon, America's foremost dramatist, in which Miss Doris Keane, who played the leading role on the stage for six continuous years in New York, Chicago, Boston and London, will play the chief part, when it is shown at the Playhouse Theatre during its engagement in this city, beginning tomorrow.

This fascinating drama of New York reveals Mr. Sheldon as a playwright of rare sentiment and poetic gift as well as a brilliant technician, and is a most gratifying fulfilment of the promise of all of his former wonderful works.

As Mme. Cavallini, the fascinating prima donna heroine, Miss Keane has won for herself many triumphs on the international stage and is ranked today as America's greatest emotional actress of the present day. Her impersonation of the difficult role is one of the most brilliant acting achievements the screen has known.

The production is remarkable in its every detail, and is beyond compare in artistry of detail with any motion picture production of the last decade. The most minute care has been taken to faithfully represent the environments of New York in which the production is laid, and the picture will go down in motion picture history as one of the epoch-making productions of the age.

DUBLIN, Oct. 4.—As a direct result of the imposition of a fifteen per cent ad valorem customs duty on imports into the Free State, sixty additional workers have been employed by a Cork firm of boot manufacturers.

DRUMS OF JEOPARDY IS AT COLISEUM

Elaine Hammerstein Appears in Brilliant New Release This Week.—Intriguing Plot

Elaine Hammerstein, the delightful and dainty star who has recently scored such a big success in her first independent production, "Broadway Gold," will be seen at the Coliseum Theatre, commencing Monday, for an engagement of six days in the second picture from her own studios, an adaptation of Harold MacGrath's famous Saturday Evening Post story and novel, "Drums of Jeopardy." This is being released under the banner of Truist Pictures, which also brought forth her first independent effort.

"Drums of Jeopardy," which is in reality the two finest emeralds in the world—get their name from the fact that they are set as drum-heads in two drums which are held between the knees of two squatting Hindu figures.

There is a legend that these two emeralds, when held to the ears will echo the rumpty-tump-tump of a beaten drum, and that then always something tragic will happen. The story opens in the atmosphere of a Russian castle where the Jewels are recovered by their rightful owner—the young prince of a Russian house. He is tracked to the new world, to New York, where his adventures are entwined with a beautiful American girl, the daughter of the great banker, in whose care he has placed the Jewels. Through a series of thrilling episodes, the romance weaves its way to final love triumph—then not until a mysterious murder, and two strange disappearances are solved.

Miss Hammerstein, more beautiful and charming than ever, heads a cast of sterling ability. Playing opposite her, as the male lead, is Jack Mulhall, who will be remembered by all moviegoers for his work in the past. Wallace Beery, famous for his delineations of characters such as Karlov, which he portrays in "Drums of Jeopardy," is known to everyone as a star in his own right. Other prominent members of the cast are David Torrence, Maude George and Eric Mayne.

PEASANTS HEAVY LAND OWNERS

BREMEN, Oct. 4.—A German investigator of Russia, Dr. Adolph Grabowsky, declares that prior to the war the peasants of Russia owned thirty-five per cent of the land, while the royal family and the state owned an equal amount. Today the peasants possess ninety-seven per cent and the state three per cent of the land within the boundaries of the country.

MYSTERY ABODE IS FOUND BY COMPANY

Virginia Valli and Her Fellow Actors Made Find When on Location "The Signal Tower."

Legendary gossip with a touch of mystery to it added much to the pleasure of off-stage conversation and after-dinner fireside talk of the Virginia Valli production unit during the filming of exterior scenes for "The Signal Tower," the Universal-Jewel feature starring Miss Valli which comes tomorrow to the Dominion Theatre for a week's run.

The company spent several weeks in the Redwood timbered hills of Northern California, staying at the Noyo River tavern, near Port Bragg. From there they made daily location trips along the tracks by means of an electric "speeder." One day scenes were filmed near an abandoned estate. It was easily seen that it had once been beautiful. Now, the vast yard was overrun with underbrush and the quaint old house was in a sad state of decay. It appeared for all the world to be a miniature of some tragedy-stricken mansion.

Native of that territory were reticent about its history, but through insistence, the picture people learned that its proprietor was supposed to have wandered away from the place one day, many years ago, and had never been seen again, or heard from.

Sugar can be made from corn as cheaply and easily as from cane, by a newly developed process.

MARY PICKFORD COMES TO COLUMBIA

"Dorothy Vernon of Haddon Hall" Will Be Shown at Popular House for Three Days

Manager Clark, of the Columbia Theatre, announces as the next attraction for his house Mary Pickford's latest production, "Dorothy Vernon of Haddon Hall," which will be shown on Monday, Tuesday and Wednesday only. This picture, now being released throughout the country by United Artists, is based on the popular novel of the same name by Charles Major. The book was one of America's most sensational "best sellers," and the photoplay is one of the high spots in this year's dramatic offerings.

In support of Miss Pickford is a cast which reads like a Blue Book of Screenland, no expense having been spared in the selection of players best suited for their roles. Allan Forrest portrays Sir John Manners; Marie McDermott is Sir Malcolm Vernon, cousin of Dorothy; Sir George Vernon, father of Dorothy, is ably handled by Anders Randolph, and Wilfred Lucas plays the Earl of Rutland.

Other celebrities in the cast include Clara Bames, Estelle Taylor, Courtenay Foote, Mme. Garrie Dammery, Lottie Pickford Forrest, Malcolm Waite, Howard Gaye, Colin Kenny, Eric Mayne, Jack Fowler and Olaf Shavian.

"In 'Dorothy Vernon of Haddon Hall,'" said Manager Clark, "Mary Pickford gives her greatest screen characterization, for this picture offers an appeal to men, women and children alike, and my patrons will bear me out that it is the most stupendous picture the star has ever made."

Marshall Neilan acts as director for Miss Pickford for the first time since "Daddy Long Legs," and has brought into this production that "humanness" for which he is justly famous. The photography is in the able hands of Charles Rosher, who has been identified with Miss Pickford for years and is without peer in his profession.

FLOW OF OIL IN ROMANIA

BUCHAREST, Oct. 4.—The production of crude oil in Roumania during the month of July amounted to approximately 1,100,000 United States barrels. For the first seven months of 1924 crude production has amounted to about 7,000,000 barrels.

Almost fifty per cent of the present crude production is coming from the wells of companies in which British capital is known to be heavily interested, while the principal American enterprise in Roumania is obtaining about ten per cent of the present production.

Body Not Recovered

QUEBEC, Oct. 3.—Despite consistent efforts which have been made ever since the disaster that caused the death of Sir William Price in a landslide at Kenogami, yesterday, the body has not yet been recovered. Acting on the possibility that Sir William may have been carried into the River au Sabie, a number of men patrolled the river all day today, but without any success.

CONSERVATIVE CARD DRIVE SUCCESSFUL

Hon. T. G. Coventry, M.P.P., Opens
Saatchi Party and Dance—Fine
Prizes Feature Proceedings

The series of military five hundred tournaments and dances which the Saatchi Liberal-Conservative Association is conducting this winter got off to a most auspicious start last night, when the opening round in the card drive was held in the Conservative Club rooms, top floor of the Campbell Block. The affair was a great success in every particular, and the large number present greatly enjoyed the entertainment.

Hon. T. G. Coventry, M.P.P., for Saatchi, in a short address, opened the proceedings, and wished the association every success in its winter social programme. The sum of \$14.50 was given away in scrip prizes, and Mrs. McEary won the special prize of half a ton of coal. The prize winners were as follows: First, Mrs. Humphreys; Miss Mosley; Mr. Giles; Mr. Meilen; second, Mrs. Muldon; Mrs. Cuthbertson; Mrs. McOrmond; Mrs. Mike Macdonald; third, Mrs. Gillson; Mrs. Lawrie; Mrs. Tomlin; Mr. Coventry; ten bid, Mrs. Rennie and Mr. Earle.

Following the card playing, dancing was indulged in, this amusement continuing until midnight. The music for the dance was provided by Messrs. L. Osborne and J. Byng.

The committee in charge of these weekly military five hundred drives announce that it is offering a prize of one \$10 scrip to the lady with the highest score at the end of the season, and also a similar award to the gentleman who shows the highest score at the conclusion of the tournament. A record will be kept throughout the season of all scores.

UNEMPLOYED WARNED AWAY FROM PROVINCE

Labor Department Points Out That
Outside Workers Can't Be
Provided With Jobs

In order to prevent congregation of unemployed in British Columbia this winter, workers outside the Province are being warned by the Provincial Department of Labor not to come to the Coast in the expectation of finding work. Mr. J. D. McNiven, Deputy Minister of Labor, has dispatched circulars containing the warning to various points on the prairie in the hope that unemployed men who were brought into the West to help with the harvest, could be persuaded to return East.

"Every winter we have strangers coming to us from the prairie, and have spent their money in traveling from place to place looking for employment," Mr. McNiven said. "We are sorry for them, but naturally the men who have their homes in this Province and know the local conditions have the best chance of getting work. I would strongly advise any man not to come as a stranger to British Columbia within the next four or five months, unless he has either enough to maintain himself throughout the winter or assurance of obtaining employment. Otherwise he is

A HAPPY FAMILY

Paul Whiteman, the famous conductor, who is now making a tour of Canada with his orchestra, is shown with Mrs. Whiteman and Paul Whiteman, Jr.

able to find that his hard-earned money has been swallowed up in traveling expenses, and that there is nothing at the end of it.

"In the last week of August and early September, British Columbia sent 6,000 men to the harvest fields. In the ordinary way they would not be expected back so early as this, and probably there would not be a large number returning until the latter part of this month.

"At Fernie, where some of these men have arrived," said Mr. McNiven, "there has been a coal strike in progress for some time, and hundreds of men out of work, so there are enough people on the ground to take care of all the employment that may be offered. Further west in the interior and on the coast there is no shortage of labor. We have always a number of concerns closing down in the Fall, and though we are hoping that these will be offset by some of our lumber camps and mills opening up, we are anxious about the prospect of employment when our own men return to us."

Moonshine recently dumped into a sewer practically ruined the sewer.

Y.M.C.A. CUPS SHOWN IN SPENCER WINDOWS

Cups and other trophies of the Y.M.C.A. displayed in the Broad Street windows of David Spencer, Ltd., are proving a useful aid to the organization in its present membership drive.

Yesterday some of the young athletes from the association twice joined the display, and gave demonstrations in the windows of physical drill, tumbling and boxing, under the direction of Assistant Physical Director A. McKinnon.

Photographs of past Y.M.C.A. triumphs appear in the windows with the cups, and create much interest among old residents of the city by virtue of the reminiscences they occasion.

Poisoned Mother and Father

NEW YORK LIFE MEN GATHER HERE

WESTERN DIVISION \$100,000 CLUB
COMES FOR THIRD TIME

Mr. Alex. Peden, Local Manager,
Boasts Victoria as Convention
Centre—150 Expected

The \$100,000 Club of the Western Division of the New York Life Insurance Company will hold its annual convention in Victoria on Thursday, Friday and Saturday, October 16, 17 and 18. This will be the third time that the New York Life has met in convention in this city, and it is anticipated that the gathering will be one of the largest and best that have ever been conducted by the 100,000 Club.

The New York Life Insurance Company was the first insurance concern to hold a convention on the Pacific Coast, and it has been through the untiring efforts of Mr. Alexander Peden, local manager of the company, who has represented it here for 14 years, that the company has held two annual meetings in Victoria and is holding the third. Mr. Peden first started his campaign to secure the annual convention for Victoria at Atlantic City in 1912, and each year for the next six years strove to accomplish his objective. The 100,000 Club came to Victoria in 1918, were so delighted with the city and environs that they returned in 1922, and will be here next week again for their 1924 conference.

To the New York Life Insurance Company goes the honor and record of being the first insurance company to hold a convention in Victoria and on the Pacific Coast, as well as being the only insurance concern to have met in Victoria for three annual gatherings.

New York Life Ranks First
The New York Life ranks first among the life insurance companies in amount of mortgage investments in British Columbia, while there are

MR. ALEX. PEDEN

only four Canadian life insurance companies whose total assets amount to more than the New York Life has invested in Canada.

The delegates to the 100,000 Club convention will come from cities in Oregon, Washington, Idaho, Montana, British Columbia and the Yukon. The first convention session will be held at 2:30 p.m. Thursday at the Empress Hotel, which will be the convention headquarters.

The New York Life will entertain at a ball in honor of the visiting delegates, local policy holders and friends of the company. In the Empress Hotel, on that night, from 9 p.m. to 1 a.m. Professor Ozard's orchestra will furnish the dance music. Dress will be optional. Any policy holders who may not receive tickets for the dance, may obtain same at the office of the New York Life, Bayward Building. All who attend will be guests of the company, the function being of a complimentary character.

The convention sessions will be resumed on Friday morning and after-

noon, with the concluding meeting on the Saturday morning. On Friday evening a banquet will be held in the Empress Hotel, which will be attended by Mr. L. C. Lindsay, superintendent of all New York agencies; Mr. A. S. Elford, inspector of the Western division, and other officials of the company.

LEGISLATURE SITS EARLY NEXT MONTH

Opening Date Is Changed From Octo-
ber 27 to November 3, to Give
Cabinet Time to Prepare

November 3 is the date set for the opening of the British Columbia Legislature, according to an announcement made yesterday by Premier Oliver. Approval of the Lieutenant-Governor has been secured.

Some weeks ago it was announced that the opening of the House would most likely occur on October 27, but it was held by members of the Cabinet that the choice of that date did not give the Government sufficient time in which to make complete preparations, and consequently, at a special meeting of the Cabinet yesterday morning, the decision to delay the opening for a week, was confirmed. The Premier's recent trip to Ottawa and the North Okanagan by-election served to delay the work of preparation.

Premier Oliver is still refusing to talk politics for publication. Asked about probable features of the approaching session, he said that he had not had sufficient time to go into the various questions. It is common knowledge, however, that among the matters which will cause the House considerable worry and expenditure of effort, are the beer situation, the Capilano watershed dispute between the city of Vancouver and the Department of Lands, and questions relating to economy in administration.

Jewels are declared to influence the temperament of those who wear them, some having a soothing influence, while others irritate.

GOVERNMENT CLOSES PUBLICITY BUREAU

Action in Line With Economy Policy
—Objection Is Registered
by Secretary

On the recommendation of Hon. J. D. MacLean, Minister of Finance and Education, it has been decided to close the Provincial Publicity Bureau, and the office will cease to function on Monday. Dr. MacLean will carry on an investigation to determine the usefulness and worth of the bureau, and it is possible that the closing will be temporary. The action has been taken in line with the policy of retrenchment in cost of administration.

Vigorous objection to the action of the government in closing the office has been taken by Mr. H. W. Hart, whose duties as secretary of publicity have concluded in consequence.

"I should be lacking in my duty if I neglected to point out the seriousness of the contemplated step. There is nothing more important than publicity; especially when there is a crying need for development in order to lighten the insupportable burden carried by many citizens. The business man who carries a full line of valuable stock and neglects to let the people know invites the disaster which inevitably follows."

"Sound business policy calls for intelligent publicity, and instead of curtailing in that direction there should be a decided expansion!"
"At the present time British Columbia is ripe for progressive publicity. I have written every Board of Trade and publicity organization in the Province, suggesting a publicity conference. I have accepted invitations to address the convention of Associated Boards of Trade at Kamloops, in November, and Cloverdale Board on October 24th. In all parts of the Province the suggestion has been received with enthusiasm, and there is a general belief that a great advance will be made."

Her Beauty Makes You Gasps!

Saanich War Memorial Gives Public Service

Health Centre, Built in July, 1921, at Cost of \$25,000, Commemorates Sacrifices of Men and Women in Great War—Public Health Nursing Service Features Activities of Centre—Clinics Render Invaluable Aid to Residents of District

IN grateful memory to those brave men and women who died in the service of their country, the Saanich War Memorial Health Centre was erected, and now Victorians are given the opportunity to contribute to the worthy undertaking of building in this city a memorial which will commemorate the sacrifices made by those gallant men and women who fell gloriously in action during the Great War.

The Great War brought to the notice of the people of the world in a startling manner the fact that a large proportion of human beings are suffering from physical defects which are preventable in childhood.

Taking cognizance of these facts, the Saanich Health Committee, a representative body embracing the Municipal Council, the School Board and the people, resolved to build a health centre from which should radiate health—a place to which the expectant mother might apply for the advice which is going to mean so much to the unborn child and to posterity, and to which the pre-school as well as the school child can go and have its health built upon a firm foundation. Results have justified the splendid effort which was made by this far-seeing committee, and the Saanich Health Centre stands as the most highly developed type we have anywhere in Canada today.

The building, which was completed in July, 1921, is situated on three and three-quarter acres of land at the corner of Glenford Avenue and Saanich Road, which is the main

road to Sidney and the Bellingham Ferry. It is 60 feet by 40 feet, built of hollow tile with stucco over, is three stories high and was built at a cost of approximately \$25,000.

Interior of Health Centre
As one enters the hall on the ground floor, the office is seen, and on either side are the operating and dental rooms, with bathrooms, toilets, etc., also a supply room and four wards with eight beds, six of which are used for cases such as malnutrition, tonsillitis, etc. The nurses' quarters are situated on the upper floor, with sitting-room, bedroom, bathroom, etc. On the basement floor are several offices in an unfinished state at present, in addition and complete are the dining, kitchen, laundry and furnace rooms, also the sleeping quarters of the kitchen staff.

The staff in residence are as a rule the superintendent, school, district and house nurses, the janitor and housekeeper. In addition to this, students come for their field experience from the University and the Provincial Board of Health. They each spend two weeks, and, judging from the letters received by the superintendent, they enjoy their experience in Saanich very much, although it includes at times many sacrifices on their part.

These students have gone through an intensive course which not only includes all phases of public health nursing, but also, auto mechanics, driving, repairs, etc. The public health nurse of today is required to be an all-round "handy man," and

Commemorates Sacrifices of War Heroes

SAANICH WAR MEMORIAL HEALTH CENTRE

must be able and willing to ride, drive, walk, row a boat, or, indeed, to use any means available for transportation purposes.

Public Health Nursing
The public health nursing service, which is being directed from the Health Centre and carried on by a superintendent nurse, one school nurse and two district nurses, consists of the following:

Well Baby Clinic—Two each month. Six hundred and twenty-four babies, registered to date.
School Work—Individual classroom inspection once each month, except in case of an outbreak of communicable disease, when the nurse makes a daily examination of the pupils until the danger of communication is passed. The teachers are instructed in observing signs and symptoms and reporting to the Health Centre.

Pupils are weighed and measured once in the school year. Subsequent months the children are encouraged to weigh themselves and record the result under the supervision of the nurse. Underweight is weighed every month. Charts are placed in every classroom for this purpose. After each inspection the nurse gives a health talk to the class upon such matters as personal cleanliness, care of the teeth, etc. The talks are made suitable to the grade. Tooth-brush and handkerchief drills are given to each primary class, rolls of honor being given each year to pupils who observe health rules.

Little Mothers' League classes are for girls between the ages of 10 and 14 years. A definite course on infant hygiene, which includes the proper dressing and feeding of the baby, with practice on a baby doll. The classes cover a period of twelve weeks, with examination, badge and certificate issued by the Provincial Board of Health.

Attractive health posters are placed in every classroom. Children are encouraged to make health posters themselves about fruit, vegetables, sunshine, teeth, nails, etc. Prizes are given by the Provincial Board of Health for the best health poster.

Dental Work
The dental works at the Centre three hours, from 9 a.m. to 12 noon every school day. In this way twenty-five pupils approximately have dental care weekly.

The last Friday of each month at least four tonsil operations are done. The children are put to bed and cared for, and remain from six to thirty-six hours, until quite recovered.

Once each month all suspects are encouraged to attend chest clinics, and supervision is maintained at intervals by visiting the homes, or arrangements are made for transfer to the sanatorium.

Social service work is an important part of the programme, as there is no organization in Saanich for this purpose.

All babies born in Saanich are followed up. It is almost a year since the baby once a month. All through the pre-school period supervision is maintained.

Lectures are conducted through all the Fall and Winter months; the classes covering a period of twelve weeks, with examination and certificate issued by the Provincial Board of Health.

Educational Work
Addresses on various phases of public health nursing, child welfare, etc., are given as part of every month's programme. Health Centre activities are shown on colored slides.

The district work includes maternity work and all nursing which is not communicable; a certain amount of education work and distribution of health literature. This service is heavy owing to night calls.

Six beds are utilized for a certain type of patient such as malnutrition, tonsillitis, etc.

The Health Centre is organizing pre-natal, pre-school and eye and ear clinics, this latter being a vital necessity for the school children. The work has increased with surprising rapidity during the past year, as the following figures will show, which includes individual attention to cases—nursing, school, welfare, etc.: Year ending December, 1922, 13,853; year ending December, 1923, 14,357.

OFFICERS ELECTED AT RALLY MEETING

The St. Andrew's "Andrews" held their rally banquet on Friday evening in order to elect officers for the coming season. Those elected were: President, Mr. Charlton Smith; vice-president, Mr. Tom Little; secretary, Mr. Kenneth Morris; treasurer, Mr. Archie Wood; board of directors, Messrs. Cecil Ridout, Jack Brown, Bob Addie. The banquet of the evening was Mr. Parr, and his message was enjoyed by all the members present. The entertainment was in the hands of the entertainment committee composed of Messrs. Arthur Ridout, George Larrigan, Tom Little, and Charlie Smith.

THE BROWNS OVERRUN AMMAN

SWANSEA, Wales, Oct. 4.—Mrs. Mary Davies, of Hoel Brown, Tycroes, Ammanford, the "grand old lady" of the Amman Valley, celebrated the centenary of her birth this month. She invited to her birthday her twelve children, the eldest seventy-years old, sixty grandchildren and about 200 great-grandchildren.

Letters to the Editor

No letter to the editor will be inserted except on the proper signature and address of the writer. This rule admits of no exception.

Thin White Bear
Sir.—Would some of your correspondents tell us what are their wishes concerning the little white bear?

One thinks it's a punishment for having been born; another thinks he needs his mother. It's quite pathetic. I think, sir, if the bear could speak, he would say how glad he was to be in Victoria, with a good home at Beacon Hill where he is fed and kept clean, which, alas, is more than we can say of many poor children among us at the present time. Would it not be more creditable to those who have time and a kindly spirit to inquire into the welfare of little children? There is need for practical sympathy, and much can be done, even without money. It's broadminded home missionaries that are needed in Victoria today, and the little bear will be cared for, too.

527 Niagara Street, Victoria, B.C., October 4, 1924.

Industries for Vancouver Island

Sir.—In your issue of October 1 there is an editorial item about a correspondent in The Toronto Globe, relating to a train wreck. Among other things, it says that the car was carrying 2,000 baskets of canned strawberries from a Georgian Bay town being shipped to Vancouver, B.C., stating that this car had already passed through the hands of no less than three brokers, and suggests that the poor people of the Pacific Coast will have to pay through the nose for their strawberries next winter. The correspondent, naturally enough, concludes that there must be something radically wrong with the people of British Columbia when its people cannot raise enough fruit for their own consumption and advise an awakening of the growers of the province.

It is a very interesting article, and a great want of attention to the market of the grower's door and the resultant consequence of so little money getting into circulation at home, was not only pointed out but was directed.

The fact is we have too many all fighting along widely diversified lines with different objects in view, but generally all endeavoring with more or less selfish motives.

Mr. Joshua Hinchcliffe, M.P.P. In his address to the Kiwanis Club a few days ago, sounded a clarion note when he emphasized the great need for industries and markets for Vancouver Island. Pointing to the many difficulties and problems with which this island has had to contend, he suggests an industrial population as the most likely to bring about the desired change and turn the exodus from our shores to the right about face.

Why should this exodus of our best young men and women take place from a country blessed with many advantages? Our soil is of the best quality, our climatic conditions unsurpassed, or even equalled, by any other in the world. These are the two chief essentials to successful production from the soil. Where then does the fault lie? The only conclusion we can arrive at is that it must, of course, lie with the people themselves. A very limited tour through the states of Washington, Oregon, Montana or California, will very quickly open our eyes as to where the fault lies and to our shortcomings. In all of these states are to be found large canneries in each community of sufficient capacity to take care of the product of their respective communities, thus giving the producer a ready and direct market for his goods and making it possible for even the holders of small

acreage homes to realize their possibilities and turn their product into real cash, be it great or small.

The sooner the people of Vancouver Island, particularly the Victoria business people, realize the urgent need of an institution as above set forth, and get their heads together to push it to a successful conclusion, the sooner we will see the dawn of better times and more prosperous conditions.

With our thousands of acres of fertile valley stretches in all parts of Vancouver Island and contiguous islands, some of which have of late years come very much into prominence in productiveness, with our famous Saanich and Gordon Head districts, Esquimalt, Happy Valley, Scotchman and Sooke districts, all of which have given ample proof to the world of their wonderful productiveness, it should be clear, not only to the farmers themselves, but also to the business people of Victoria and other communities as well, that there must be something sadly wanting and that something is the want of an efficient cannery, as stated above. It would be an industry all our own, giving employment to an army of operatives, as well as keeping the producers or farmers, themselves, with their families, constantly occupied, as they would then have an object of giving more energy and attention to their land in order that it might produce the more abundantly and bring greater comfort and happiness to the people.

Business pursuits of all shades and degrees in the cities. For as the farmer prospers and makes money, so also do the other branches of industry and business in the community. All wealth must come from the soil in the first place, and all must reap the benefit of its coming. The establishment of such an institution in our midst could not fail to give an impetus to the patronage and general promotion of home products and that something is the want of a business. Both our raw and our canned fruits have gained a reputation for excellence of quality that renders it capable of taking care of itself under all fair competition, and if we do not succeed we ourselves are to blame. Our wholesale and retail dealers should stock up with the home product; every consumer should not only ask but see that he gets the home products. If this course is pursued it will become imperative duty both ways, and prosperity and endless good cannot help but follow.

In his address Mr. Hinchcliffe pointed out many of the causes of exodus from our shores of so many of our best citizens. At the same time he pays a very high tribute to Vancouver Island—as a place to live, its enchanting scenery, its healthy and pleasant climatic conditions, its great stretches of fertile soil, and its position, from a standpoint of wealth, as unsurpassed on the American continent—and he goes on to suggest the establishment of industries as a

relief from our present woes. He does not, however, particularize or point to where any innovations might be made or introduced that would lead us away from the cross-purpose condition that has stagnated us for so many years—building monuments, Memorial avenue, lavish expenditure on tourist propaganda, numerous golf links and many other equally useless and sinful expenditures of the people's taxes, none of which have ever got us anywhere, nor ever will. As I said before in a previous issue of your paper: "Give the people something worth coming to and you won't be able to keep them out, nor will our own people have any inclination to leave their homes." The people are getting tired of all this expensive extravagance and bunk and are now on the warpath for something more tangible, more realistic, something that will bring more comfort and happiness to the homes, something that will fill hungry bellies and obviate the necessity of tightening up one's belt so often to keep the pants from slipping down, and, lastly, something that will fill the people's hearts and minds with a sense of respect for and loyalty to home and country. The introduction of such an institution as described above will go far towards the elimination of our present evils and put Vancouver Island on the highway to prosperity. This would also go a long way towards encouraging the land-owners to occupy and work their own lands instead of renting to Orientals. Let us try it. We have been beguiled long enough by the hot-air of W. M. WILSON.

1460 Grant Street, Victoria, B.C., October 4, 1924.

Irish Free State Imports Total More Than Exports

DUBLIN, Oct. 4.—The total value of the imports of the Irish Free State during the first six months of this year was about \$187,331,000, while the value of the exports was \$109,387,465.

Of the exports, Great Britain took nearly \$18,500,000, and Northern Ireland a little more than \$15,000,000. United States is third on the list of recipients of Free State products, the total being \$439,000. From America the Free State took goods to the value of \$1,356,755, or nearly twenty times as much as it sold to America.

The Free State exports consisted for the greatest part of cattle, sheep, pigs, butter and eggs. In the six months the Free State bought nearly \$2,000,000 worth of touring motor cars.

Two Arrested on Suspicion
BARRE, Ont., Oct. 4.—Dr. W. M. Oakes, of Barrie, and Russell Merkle, garage man of New Lowell, are under arrest here on charges in connection with the death of Constance Brown, who died in a Toronto hospital on October 1.

PERCY GRAINGER WILL APPEAR IN A RECITAL HERE SOON

No organization can do much more in the way of offering education, pleasure, or indeed a totally new light on music and musicians than in presenting Percy Grainger to its following. This meteor-like personality with a brain that reflects as much sunlight as his hair, with erudition that the oldest professor might envy, with an insight that is undoubtedly heaven-born, is today one of the strongest influences in the musical life of the world. To write exhaustively of Percy Grainger is in the first place to write a book. Then comes the question as to what the book should be. Not a treatise upon music surely, for the would-be writer must go much further than that. He must be a writer upon psychological matters, and he must be great indeed, who would encompass or presume to explain the psychology of this truly great and extraordinary artist.

For those who love biography, it is told that Percy Grainger was born at Brighton, Melbourne, Australia, in 1892, and ever since he has drunk into his soul every sort of knowledge, every detail of every subject in which he has interested himself, aided by his mother who was his first music teacher, and most faithful critic and companion throughout her life. With her by his side he wandered into far lands, in each country imbibing the spirit of the people, and the heads of their musical life, and he has entered into these different atmospheres as a man calls home where he hangs his hat.

As early as 1907 Grieg recognized that Grainger was more than an ordinary talent, and lavished the title of genius upon him with all that it implies to a man chary of indiscriminate praise. This was during a visit of the young artist to his home.

In appreciation of the love borne to Grainger by Edward Grieg, his widow presented the young artist with the watch and chain which Grieg wore during the last years of his life, together with a number of signed manuscripts, letters and photos.

This great artist will be heard in a concert only, at the Royal Victoria Theatre on Wednesday, October 23, under the direction of the Ladies' Musical Club.

The "big boy" of the English literary world, Gilbert K. Chesterton, helps his god-daughter and her twin sister to celebrate their first birthday. These tiny lassies are the daughters of Mr. and Mrs. Patrick MacGill

Some of the boys of the Navy League Sea Cadet Corps watched the contests of their annual regatta from the training ship Stork on the Thames at Hammersmith recently

Knitted creations are becoming very popular and are taking the place of wraps. This shawl of black fibre silk forms a graceful covering for this beautiful model

Not satisfied with the beauty that nature gave them, these Indian lassies are taking a leaf out of the beauty book of their white sisters and "dolling" up a bit for a beauty contest for girls of their tribe at Pendleton, Ore.

T. Hall of Sheffield, aged seventy-four, was one of the competitors in the London-to-Brighton walk recently. En route he found a little pacemaker in Eyleen Duffiel

Queenie Thomas and Dolly Dorman, two popular actresses appearing in a well-known London revue, enjoy cigarettes on a rabbit shoot, while holidaying between rehearsals on a farm in Surrey

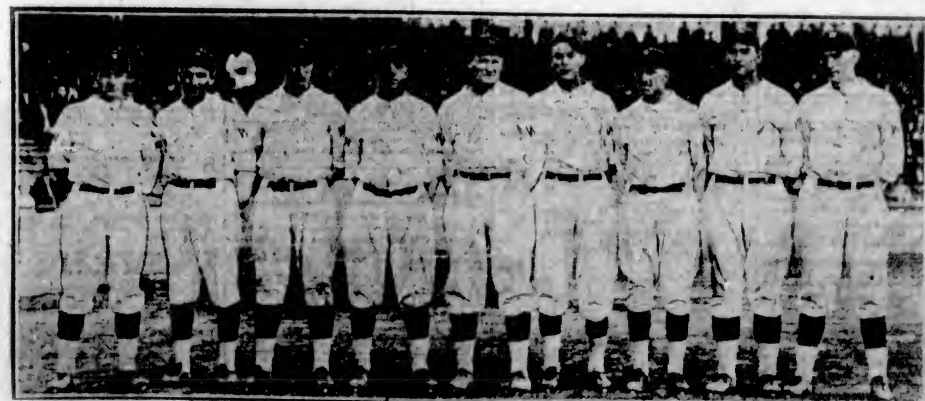

One Japanese hanging basket and one whisk broom makes this most attractive hat and fan. Miss Mary Tidwell of a Florida ladies' college is displaying the latest "styles" imported from the five and ten cent store

Captain Ramsay, D.S.O., R.N., and his wife, Princess Patricia, are shown on the platform at Waterloo Station, previous to Capt. Ramsay's departure for Canada. He has since returned to the old country

Fox-farming was only one of the many agricultural pursuits this party of Dutch editors investigated in their tour of Canada, which they made as guests of the C.P.R., with a view to acquiring data on Canadian conditions to place before prospective immigrants from Holland. They were photographed on A. S. F. Rankin's farm near Calgary

Here is the pitching staff of the Washington American League baseball team. With the team leading the New York Yankees, it seems certain now that these pitchers have brought their club to their first pennant. Left to right are: Zahniser, Specca, Ogden, Martini, Johnson, Mogridge, Russell, Marberry and Zachary

Sir Basil Zaharoff, the mystery millionaire of Europe, who is suspected to be one of the richest men in the world, has wed and set all Paris talking. His marriage to the Duchess of Marchena of Spain took place recently

Sir Gilbert Fox and his daughter were photographed on board a trans-Atlantic liner before leaving Southampton for New York. Father and daughter are touring through Canada to Vancouver

In Berlin all street cars have to stop before these white patches in the street and proceed only on direction of the policeman, thus giving pedestrians a chance to cross in safety

Finance and Commerce

GOOD SUPPORT ENDS FLURRY IN STOCKS

General List Unsettled at Close by Profit-Taking in Industrials and Attack on Illinois

NEW YORK, Oct. 4.—Prices continued to drift irregularly today when a general support of selling was renewed a few minutes before the close of trading. Good support in buying came into the market before the two selling movements, bringing to the fore several points of independent strength.

The general list was unsettled at the close by a selling attack directed against Illinois, following publication of reports that an \$11,000,000 issue of preferred stock shortly would be offered to common stockholders for subscription.

Resumption of profit-taking at the close gave an uneven appearance to the industrial list, which had been giving indications of pointing upward after the opening wave of selling had subsided.

Some Decisions

Railroad Steel Spring declined three points, and losses of one to two points were registered by Fisher Body, Stromberg, Carburetor, Mack Truck, Fiat preferred, Woolworth, and Otis Steel preferred.

Buying orders, which filtered in before the market closed, were distributed over a rather wide list, with the motor, food, tobacco and public utility shares giving the best demonstrations of group strength, although the price movement in each was by no means uniform.

American Tobacco issues were the most conspicuous strong spots, the common shares mounting three points and the "B" stock 2.8. Gains of one to two points were recorded by Jordon Motors, Goodyear Tire preferred, and Cuban Cigar preferred.

European Exchanges

European exchanges held steady in quiet trading following advice from London that negotiations for the German loan virtually had been completed, with all signs pointing to a successful flotation, gave a firm undertone to the European group.

Liberty bonds were irregular. Uncertain price movements characterized the London market in the week in the bond market.

The downward trend of prices continued, but narrow changes reflected a lack of demand rather than any desire to sell.

Foreign obligations were relatively firmer than the rest of the list. The statement of J. P. Morgan in London that negotiations for the German loan virtually had been completed, with all signs pointing to a successful flotation, gave a firm undertone to the European group.

WHEAT ESTABLISHES NEW HIGH YESTERDAY

Short Season Very Bullish, and Trading Involves Immense Volume of Grain

WINNIPEG, Oct. 4.—The short season of the wheat market was again very bullish this morning, with an extremely large volume of trade being worked in all grain. Wheat was strong from the start, unfavorable weather conditions throughout the Canadian West and continuance of bullish news from abroad being the chief factors.

At the peak, October established a new high at 162 1/2, and closed around the high with a net gain of 6 1/2 cents. November finished 5 1/2 cents higher, December 4 1/2 cents and May 4 1/2 cents.

The course grains were also showing strength and made good advances, although nothing like the sensational gains of the past few days.

Wheat—Open, High, Low, Close. Nov. 162 1/2, 163, 162 1/2, 162 1/2. Dec. 157 1/2, 158, 157 1/2, 157 1/2. May 144 1/2, 145, 144 1/2, 144 1/2.

Wheat—1 nov. 162 1/2, 2 nov. 160 1/2, 3 nov. 158 1/2, 4 nov. 156 1/2, 5 nov. 154 1/2, 6 nov. 152 1/2, 7 nov. 150 1/2, 8 nov. 148 1/2, 9 nov. 146 1/2, 10 nov. 144 1/2.

Barley—1 nov. 144 1/2, 2 nov. 142 1/2, 3 nov. 140 1/2, 4 nov. 138 1/2, 5 nov. 136 1/2, 6 nov. 134 1/2, 7 nov. 132 1/2, 8 nov. 130 1/2, 9 nov. 128 1/2, 10 nov. 126 1/2.

Oats—1 nov. 124 1/2, 2 nov. 122 1/2, 3 nov. 120 1/2, 4 nov. 118 1/2, 5 nov. 116 1/2, 6 nov. 114 1/2, 7 nov. 112 1/2, 8 nov. 110 1/2, 9 nov. 108 1/2, 10 nov. 106 1/2.

Rejected, 4 nov. 124 1/2, 5 nov. 122 1/2, 6 nov. 120 1/2, 7 nov. 118 1/2, 8 nov. 116 1/2, 9 nov. 114 1/2, 10 nov. 112 1/2.

Barley—1 nov. 144 1/2, 2 nov. 142 1/2, 3 nov. 140 1/2, 4 nov. 138 1/2, 5 nov. 136 1/2, 6 nov. 134 1/2, 7 nov. 132 1/2, 8 nov. 130 1/2, 9 nov. 128 1/2, 10 nov. 126 1/2.

Oats—1 nov. 124 1/2, 2 nov. 122 1/2, 3 nov. 120 1/2, 4 nov. 118 1/2, 5 nov. 116 1/2, 6 nov. 114 1/2, 7 nov. 112 1/2, 8 nov. 110 1/2, 9 nov. 108 1/2, 10 nov. 106 1/2.

Rejected, 4 nov. 124 1/2, 5 nov. 122 1/2, 6 nov. 120 1/2, 7 nov. 118 1/2, 8 nov. 116 1/2, 9 nov. 114 1/2, 10 nov. 112 1/2.

Barley—1 nov. 144 1/2, 2 nov. 142 1/2, 3 nov. 140 1/2, 4 nov. 138 1/2, 5 nov. 136 1/2, 6 nov. 134 1/2, 7 nov. 132 1/2, 8 nov. 130 1/2, 9 nov. 128 1/2, 10 nov. 126 1/2.

Oats—1 nov. 124 1/2, 2 nov. 122 1/2, 3 nov. 120 1/2, 4 nov. 118 1/2, 5 nov. 116 1/2, 6 nov. 114 1/2, 7 nov. 112 1/2, 8 nov. 110 1/2, 9 nov. 108 1/2, 10 nov. 106 1/2.

Rejected, 4 nov. 124 1/2, 5 nov. 122 1/2, 6 nov. 120 1/2, 7 nov. 118 1/2, 8 nov. 116 1/2, 9 nov. 114 1/2, 10 nov. 112 1/2.

Barley—1 nov. 144 1/2, 2 nov. 142 1/2, 3 nov. 140 1/2, 4 nov. 138 1/2, 5 nov. 136 1/2, 6 nov. 134 1/2, 7 nov. 132 1/2, 8 nov. 130 1/2, 9 nov. 128 1/2, 10 nov. 126 1/2.

Oats—1 nov. 124 1/2, 2 nov. 122 1/2, 3 nov. 120 1/2, 4 nov. 118 1/2, 5 nov. 116 1/2, 6 nov. 114 1/2, 7 nov. 112 1/2, 8 nov. 110 1/2, 9 nov. 108 1/2, 10 nov. 106 1/2.

Rejected, 4 nov. 124 1/2, 5 nov. 122 1/2, 6 nov. 120 1/2, 7 nov. 118 1/2, 8 nov. 116 1/2, 9 nov. 114 1/2, 10 nov. 112 1/2.

Barley—1 nov. 144 1/2, 2 nov. 142 1/2, 3 nov. 140 1/2, 4 nov. 138 1/2, 5 nov. 136 1/2, 6 nov. 134 1/2, 7 nov. 132 1/2, 8 nov. 130 1/2, 9 nov. 128 1/2, 10 nov. 126 1/2.

Oats—1 nov. 124 1/2, 2 nov. 122 1/2, 3 nov. 120 1/2, 4 nov. 118 1/2, 5 nov. 116 1/2, 6 nov. 114 1/2, 7 nov. 112 1/2, 8 nov. 110 1/2, 9 nov. 108 1/2, 10 nov. 106 1/2.

Rejected, 4 nov. 124 1/2, 5 nov. 122 1/2, 6 nov. 120 1/2, 7 nov. 118 1/2, 8 nov. 116 1/2, 9 nov. 114 1/2, 10 nov. 112 1/2.
